Statistical Office of Kosovo (SOK) in this Bulletin, publishes basic data and some indication about births, in Kosovo in 2010.

Data in this bulletin are final and are the result of regular monthly surveys, while processing and publication of data is annual.

Source of data of statistics of births, are register books for births, and the reporting units are, the Civil Registry Offices of Kosovo.

Collection of data is done through special statistical instruments: statistical questionnaire for births DEM-1

According to legal provisions on the management of register or recording books, cases of births are mandatory to be registered (recorded) in the registry books, for births, the place where it occurred, regardless if the persons related to the event, have permanent residence in that place or in any other place.

Demographic statistical data for births are edited and published under the principle of permanent/ordinary residence of mother that according to the international rule corresponds with the concept of permanent population (resident), which principle, applies in the Census.

In the case of use of this information published in this bulletin, the Department of Population Statistics, SOK, will accept suggestions, proposals and any remarks which will help us to enrich the content of this bulletin in the future.

Publication was prepared by:

Kadri Sojeva, Director of Department of Population statistics,
Hamide Kunushevci, Chief of Division,
Nazife Pushka, Chief of Sector,
Sanije Uka Chief of Sector,
Ajshe Avdiu, Senior Official for Vital statistics,
Data processing - Arijeta Sojeva, Senior Official for Vital statistics,
Ahmet Cakolli – Design official

Brief history

Data for births during 1900-1912 were obtained through Turkish registers that were guided in special administrative offices and in religious institutions.

During the period of 1921-1939, the data for vital statistics were also obtained mainly through evidences in religious institutions (churches and mosques); some small amount of data was obtained through state registers.

After the Second World War, on 9th of May 1946, the Law on State Register Books is approved and this matter was carried in competencies of state bodies alone.

Collection of data for births has been carried out in a monthly basis by clerks in a summarized review and they contained only the total and the gender. The collected monthly data were **preliminary** demographic results.

After 1951, demographic data were collected through individual questionnaires, processed afterwards and resulted in **final** data, according to the permanent residence and the time when the case occurred.

The collapse of the System of Demographic Statistics starts with the beginning of political disorder in Kosovo in 1989, but the total collapse happened during the war in 1999, and continues with the disorder and collapse of many register offices and the liquidation and stealing-withdrawing of many register books in Serbia (in some municipalities also the register books from 1900).

First efforts to start the operation of this institution were made by the end of 1999 when UNMIK establishes new civil register by giving this institution a new register books and certificates to be used.

In 2000, the priority was "Reactivation of the Vital Statistical System" planned together with the Department of Population Statistics in SOK. General technical assistance was received from the Montreal University in Canada and from the Holland Government.

In August 2001, starts the data collection for births.

After the war in 1999, Demographic Statistics was initially supported by CIDA (Canadian International Development Agency) for the first phase, and together with the Holland Government for the second phase – UNFPA was as an executive agency of the project.

Data resource

Reported units of data for Births are the Offices of Civil Registry – Officials. Data are collected by special statistical questionnaires DEM-1.

According to the law provisions on guiding the register books, birth cases are mandatory to be registered in register book at the register office where the event occurred, not considering that the persons with whom the event is related are living in that or some other place.

The outcomes of demographic statistics are processed according to the permanent residence principal of the born child. So, the demographic statistical outcomes were

processed according to the permanent residence principal that corresponds with the concept of permanent population (resident) applied in Censuses.

This bulletin contains information related to vital occurrence that occurred in 2007 and presented in table format, on country and municipality level, according to the main characteristics such as age, gender, ethnicity, education, fertility, etc., that are usually required also in the population census in Kosovo - municipality and permanent residence level.

Scope

After the war in 1999, it was estimated that the cases of vital statistics –births- include around 85% while in 2009 the inclusion is around 90%. The implementation of law regulations on registration of vital events in the register books at the civil offices is of special importance.

Vital events that happen in the settlements where the majority of Serb live, mainly are not registered at the Civil Offices of Kosovo, therefore, DSP of SOK does not possess information for that part of the population of Kosovo.

Estimation of number of Inhabitants

In the absence of data on the number of population in Kosovo since the last census of 1981, the Statistical Office of Kosovo considered the need of the assessment of population. The estimations were based on statistical methods for evaluations, prognoses and projections. In calculation were used data from the administrative sources and assessments made by the mix evaluation committee of civil registry in 2000. The total population in Kosovo in early 2009 is estimated to be 2,181,139 inhabitants.

Population increases or decreases with positive or negative natural increase and based on positive or negative balance of migrations.

This can be presented with this formula:

$$P_1 = P_0 + (L - V) + (I - E)$$

- P₁** – the estimated population at the end of the year,
- P₀**- the average number of population in the middle of the year,
- L**- the number of births within the calendar year,
- V**- the number of deaths within the calendar year,
- I**- the number of immigrations, and
- E**- the number of immigrations within the calendar year.

Elementary analysis

According to the data presented in the tables of this bulletin, for 2010 the birth rate is 15.3 per thousand (promil).

Births:

Born alive

Exit or full disclosure of from the mother of a product regardless the duration of pregnancy, which after such separation, breathes or shows any other sign of life, such as the beating heart, throb of the cordon umbilikal or movements of voluntary muscles, regardless of whether or not the cord is cut or whether it is umbilikal placenta. Each product of such a birth is considered born alive

Born dead

Death before discharge or extraction of the product from its mother, regardless of the duration of pregnancy, death is defined by the fact that after such separation the fetus is not breathing or does not show any other sign of life, such as the beating heart, throb umbilikal or movements of the cordon set of voluntary muscle

Based on information collected in this publication, in 2010, Kosovo has registered 33966 births, of whom 33751 were born alive, while 215 were born dead.

Vitality coefficient is 4.7 (the ratio between live births and total deaths). Coefficient of masculinity is 111.7

Rate of dead births (stillbirths), fetal deaths per 1000 births was 6.4 per thousand. In medical institutions occurred 98.3% of births, while the rest occurred elsewhere.

The largest number of mothers who gave birth, is 25-29 years age group with 35.2%, 20-24 years age group with 24.8%, age group 30 - 34 years with 24.2%, and other age groups comprise 15.8% of the total number of births.

The average age of women who gave birth in 2010 is 28.0 years.

The first child born occurred in 43.2% of mothers, 28.1% of mothers gave birh to the second child and 17.5% mothers to the third child and so on.

According to the weight of the born child, in health institutions, the majority of infants was with weight of 3000-3499gr. or 31.5% 3500-3999 gr. 23.4%, 2500-2999 gr. 12.0% etc. Babies born alive weighing less than 1000 gr. constitute only 0.3%

For children born outside the medical institution, according to the methodology of the survey data are not required for their weight.

According to education, mothers dominate with primary education at the top with 44.0%, secondary but tertiary and faculty participate with 7.8% etc.

Frequent name in 2010 for girls was the name, Sara 114, Elsa 107 etc, while for boys was the name Dion 156, Leon 151, etc.

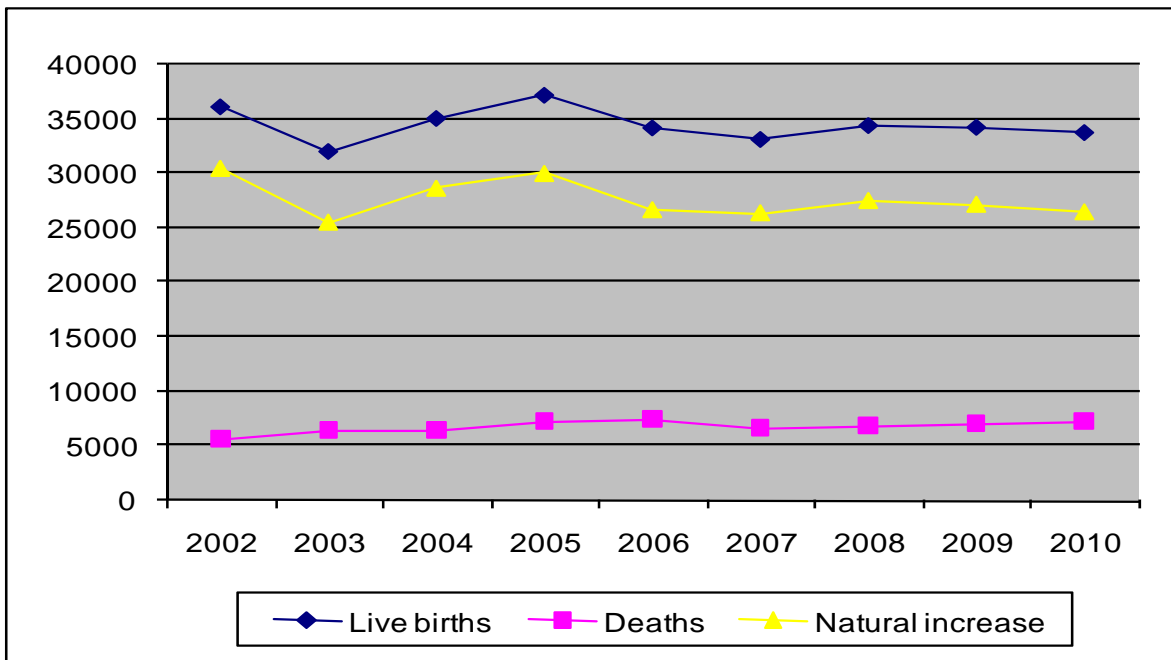

840 babies were born twin while triple were born 36 babies.

Statistical Office of Kosovo

short description

Statistical Office of Kosovo is a professional institution which deals with collection, processing and publication of official statistical data. As such acts since 1948 and has passed through several historical stages, structured according to state regulation of those times.

On 2 August 1999, the Office has resumed his professional work (after nine years of interruption of all statistical series detrimental to the interest of Kosovo), as an independent institution under the Ministry of Public Administration. Office is funded by the Kosovo Consolidated Budget, but also by donors for specific projects and for technical professional support.

Statistical Office of Kosovo operates under Regulation 2001/14 which entered into force on 2 July 2001. Law on official statistics is in process for approval. Strategic development plan 2009-2013 is the middle term implementation for the development of statistical system in correlation with the European Union statistics (EUROSTAT). **Statistical Office of Kosovo** has this organizational structure: production departments; (Department of Economic statistics and National Accounts, Department of Population statistics, Department of Agriculture and Environmental statistics and Department of Social statistics. **Support Departments;** (Department of Methodology and Information Technology, Department of Administration. **Within the Office we also established** Office of the Population Census, Households and Dwellings. **Regional Offices;** Gjakove, Gjilan, Mitrovica, Peja, Prizren, Prishtina and Ferizaj

Number of employees and budget are still limited. Employees are total of 134 workers, of them 96 (71.6%) at the headquarters of the Office, while in the Regional Offices, 38 (28.4%), with qualifying structure, 65.4% with university education to 34.6% with secondary education.

We have professional and technical cooperation with all ministries of the Government of Kosovo, especially with the Ministry of Economy and Finance, Central Bank of Kosovo, with international institutions, EUROSTAT, International Monetary Fund, World Bank, Sweden's SIDA, DFID, UNFPA, UNDP, UNVEF, and the statistics of countries in the region.

Statistical Office of Kosovo almost completely covers the territory of Kosovo, based on the statistical structure of the enumeration areas as the basic unit and sole in the country from which it gets first hand information. All surveys conducted in the field use the extension of the samples in these enumeration areas but also a statistical methodology according to international recommendations. During the collection of statistical data and reports from reporting entities are involved professionals, technicians, administrators, servants of the country offices, field enumerators from regional offices, etc.

We have successfully implemented the project of Population Census, Households and Dwellings in 2011, Census that was not carried out since 1981. Results obtained from the Census will have an important role in compiling the development policies.

The mission of the Office; to meet the needs of users with qualitative statistical data, objective, in time and space so that users have reliable base to conduct regular analysis in the interest of planning and project development at the municipal and country level. To support government institutions, scientific institutes, research academies, businesses in order to provide proper information for decision-makers and other users in Kosovo.
