Foreword

This Bulletin, produced by the Statistical Office of Kosovo (SOK), contains basic data and some indicators on Deaths in Kosovo for 2007.

Data in this Bulletin are final thereof are results of annual and regular researches of vital statistics domain.

Resources of such a data are Registry Books for Deaths, while reported units are Civil Registry Offices of Kosovo (Registarar.)

Data collection has been carried out through special statistical instrument: statistical questionnaire for deaths - DEM-2.

According to the law provisions on managing the registry books, cases of deaths are mandatory to be registered in registry books in the place where the event occurred, whether or not the persons who are related with the event live in that location permanently or even in some other places.

The results of demographic statistics are processed and published according to the permanent/usual dwelling principle of the person that, according to the international rules, it is adapted to the concept of permanent population (residency); this principal is applied also in case of population census.

When using this information (data) published in this Bulletin, the Department of Population Statistics of SOK will accept suggestions, proposals and/or any remarks that will help to affluence the content of this publication in the future.

This Bulletin has been prepared by:

Head of Population Statistics Department, Mr. Kadri Sojeva,
Chief of Division, Ms. Hamide Konushevci, and
Chief of Sections, Ms. Nazife Pushka, and Ms. Sanije Uka.

Computer data processing, Ms. Nazife Pushka.

Design – Mr. Ahmet Cakolli i

Pristina, July, 2008

Chief Executive Officer, SOK,
Avni Kastrati

Short History

The data for deaths during 1900-1912 were obtained through Turkish registers that were guided in special administrative offices and in religious institutions.

During the period of 1921-1939, the data for vital statistics were also obtained mainly through evidences in religious institutions (churches and mosques); some small amount of data was obtained through state registers.

After the Second World War, on 9th of May 1946, the Law on Marriages and Law on State Register Books are approved and this matter was carried in competencies of state bodies alone.

Collection of data was been carried out in a monthly basis by clerks in a summarized review and they contained only the total and the gender. The collected monthly data were the *preliminary* demographic results.

After 1951, demographic data were collected through individual questionnaires, processed afterwards and resulted in *final* data, according to the permanent residence and the time when the case occurred.

The collapse of the System of Demographic Statistics starts with the beginning of political disorder in Kosovo in 1989, but the total collapse happened during the war in 1999, and continues with the disorder and collapse of many register offices and the liquidation and stealing-withdrawing of many register books in Serbia (in some municipalities also the register books from 1900).

First efforts to start the operation of this institution were made by the end of 1999 when UNMIK establishes new civil register by giving this institution a new register books and certificates to be used.

In 2000, the priority was "Reactivation of the Vital Statistical System" planned together with the Department of Population Statistics in SOK. General technical assistance was received from the Montreal University in Canada and from the Holland Government.

In August 2001, starts the data collection for deaths.

After the war in 1999, Demographic Statistics was initially supported by CIDA (Canadian International Development Agency) for the first phase, and together with the Holland Government for the second phase – UNFPA was as an executive agency of the project.

Data Resource

Reported units of data for Births are the Offices of Civil Registry – Officials. Data are collected by special statistical questionnaires.

According to the Law provisions on guiding the register books, death cases are mandatory to be registered in register book at the register office where the event occurred, not considering that the persons with whom the event is related are living in that or some other place.

The outcomes of demographic statistics are processed according to the permanent residence principal of the dead person. So, the demographic statistical outcomes were processed according to the permanent residence principal that corresponds with the concept of permanent population (resident) applied in censuses.

This bulletin contains information related to vital occurrence that occurred in 2007, presented in table format, on country and municipal level, for natural and violent deaths according to the main characteristics such as age, gender, ethnicity, education, etc.

Scope

After the war in 1999, it was estimated that the cases of vital statistics –deaths- include around 75%. The implementation of law regulations on registration of vital events in the register books at the civil offices is of special importance.

Vital events that happen in the dwellings where the majority of Serb live, mainly are not registered at the Civil Offices of Kosovo, therefore, DSP of SOK does not possess information for that part of the population of Kosovo.

Elementary Analysis

Based on the information's collected in this publication, reported from families and registered in the Registry Books for Deaths, in 2007, in Kosovo were registered 6681 cases of deaths, of them 3867 males or 57,9% and 2814 females or 42,1%.

Mortality is 3.1 promil.

37,9% of the cases of death occurred in the medical institutions, while 62,1% occurred at home or other place.

By the municipality where the event occurred, Pristina is in the first place with 30%, second place is Prizren with 9,9% , third place is Gjakova with 6.3%, and so on.

71,2% of the dead persons are age 60 and above.

First quarter of the year counts 28,7% of death cases, and the month of February takes the first place with 9,9%.

Albanians participate with 94%.

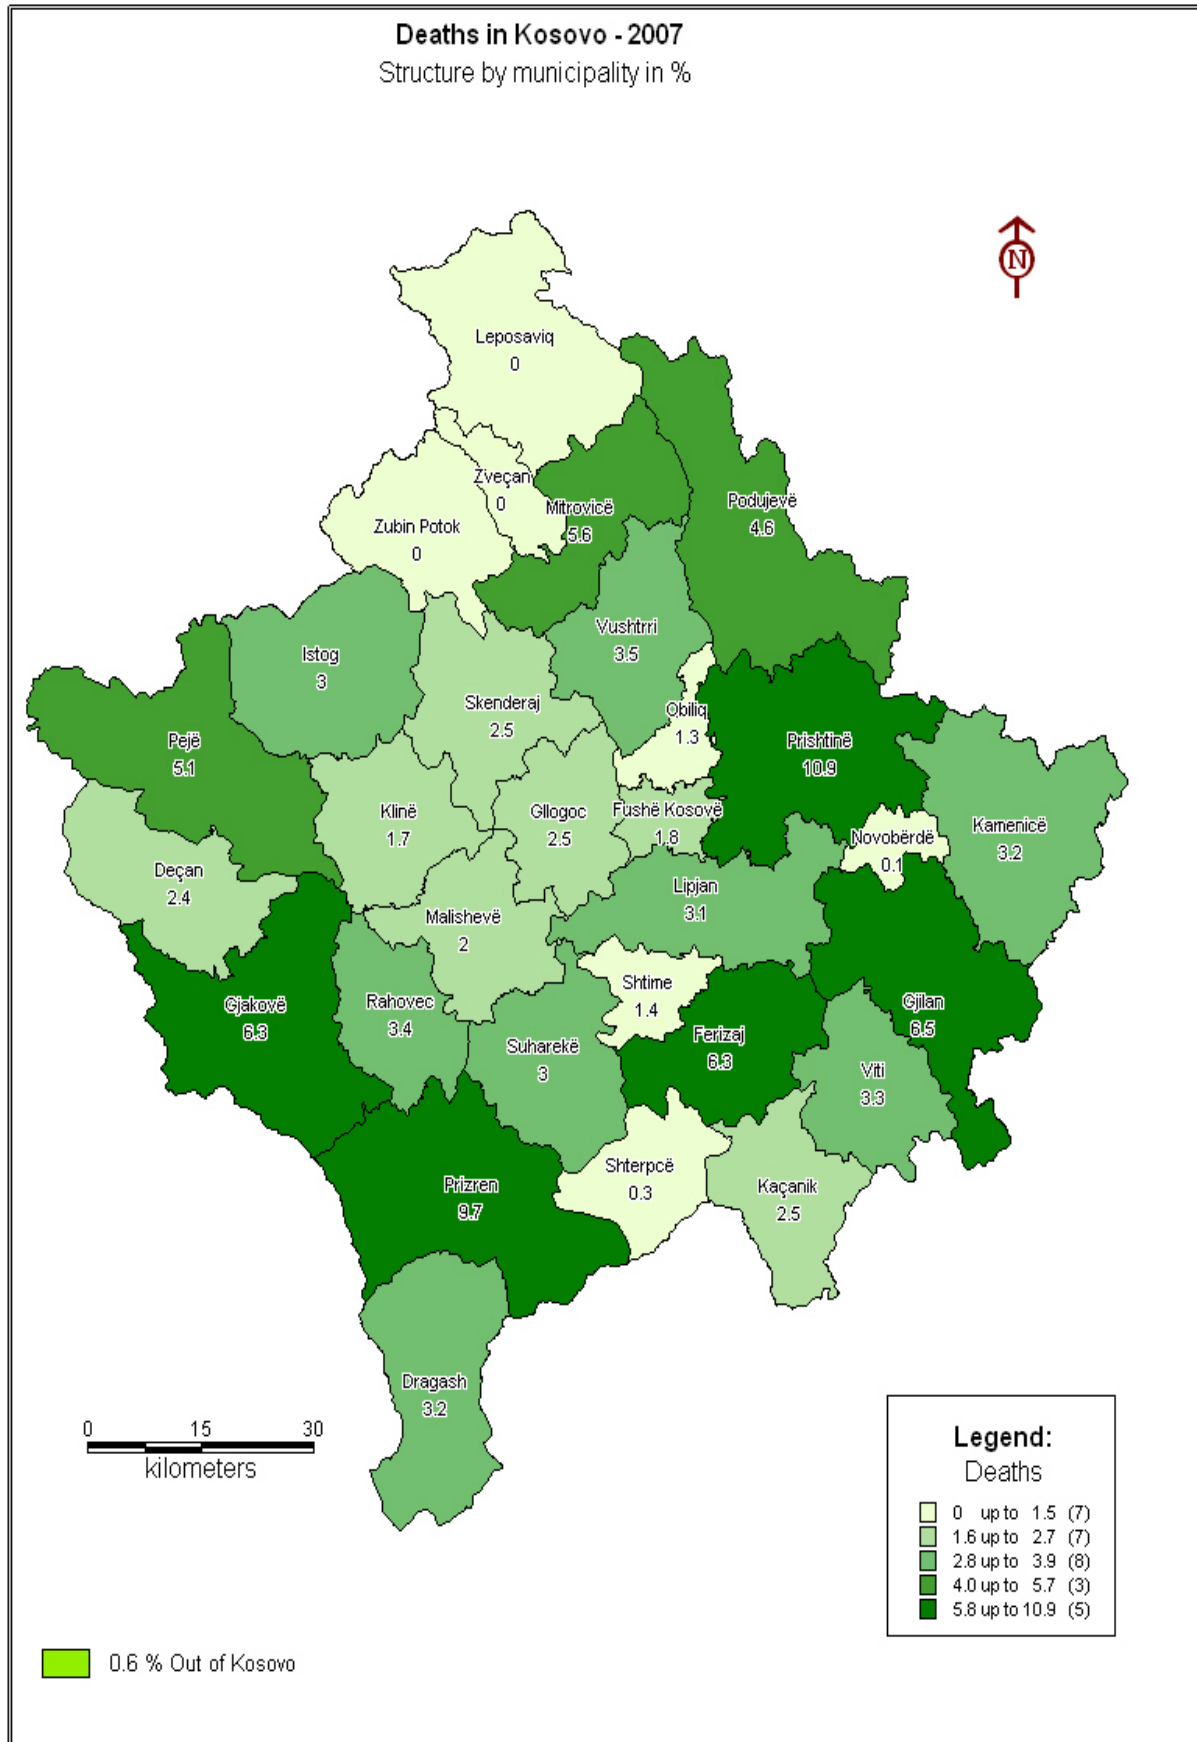

Violent deaths in 2007 counts 214 cases or 3,2%.

Disasters take 142 or 66.4%, suicides 33 or.4% and murders 39 or 18.2%. Here, dominant age group is 20-49 yrs old, for both females and males. .

Dead infants in 2007 were 366 and their participation in total cases of deaths is 5.5%. Males take 196 or 53.6%, Females 170 or 46.4%.

Perinatal cases of death – up to 6 days were 254 or 69.4%, neonatal cases of death – 7 up to 27 days were 54 or 14.8% and post-neonatal cases of death – 28 days up to 11 months were 58 or 15.8% infants.

Statistical Office of Kosovo, a brief description

The Statistical Office of Kosovo (SOK) is a professional office operating since 1948. The SOK passed through some of the historic phases and it has been structured by the state rule of that time. SOK restarted its work on August 2, 1999, as an independent and professional office working in the frames of the Ministry of Public Services (MPS). SOK is financed by the Kosovo Consolidated Budget and by donors for the various projects.

The Statistical Office of Kosovo acts pursuant the UNMIK Regulation 2001/14 that entered into force on July 2, 2001. A medium-term Master Plan is being developed for the statistical system of Kosovo compatible with the European Statistics.

The SOK Organization Structure; composes of four departments for production of statistics (Department of Economic Statistics and National Accounts, Department of Population Statistics, Department of Social Statistics and Department of Agricultural and Environment Statistics), seven Regional Offices (located in Gjakova, Gjilan, Mitrovica, Peja, Prizren, Pristina and Ferizaj), two support departments (Department of Methodology and Information Technology, and Department of Administration), as well as the Office of the Population Census.

Total number employees is 134, of them 96 (71.6%) within the SOK offices whilst 38 (28.4%) in regional offices.

There is also a support and cooperation with the international institutions.

The Statistical Office of Kosovo covers Kosovo entirely. For implementation of the surveys in the field, the SOK uses appropriate sampling and methodology approach. In the collection of the reports from the reporting units, the SOK engages professionals, technicians, administrators and civilians form the local offices and regional field population census.

Recently, a team of national and international experts is working in the project of the population census.

SOK Mission is to fulfill the needs of the users with the reliable statistical data and with regular analyses in order to support and provide government departments with the proper information for decision-making process including other users as well.
