METHODOLOGICAL EXPLANATIONS AND GLOSSARY OF TERMS

- METHODOLOGICAL EXPLANATIONS

Under the Law on Population, Households and Housing Census 2011, no. 03/L-237 adopted on October 7, 2010 by the Assembly of Kosovo, the Census has been conducted from 1 to 15 April 2011 based on the state on March 31, 2011 at 24:00. (Census critical moment).

In this Census have been included all persons with usual residence (permanent) in the Republic of Kosovo (regardless of their citizenship) and regardless whether during the census they were present in their usual residence or temporarily absent (were absent or expected to be absent for less than 12 months).

In case of the use of these data it shall be taken into account that municipalities with Serb majority: Zveçan, Leposaviç, Zubin Potok and North part of Mitrovica didn’t participate in Population Census conducted in April, 2011.

Population Census has been carried out by traditional methodology: data is collected from questionnaires, visiting every household. Questionnaires have been filled in by enumerators. The enumeration in collective buildings has been carried out by a special group for enumerators. During the enumeration there have been three main types of questions: R1- Dwelling Questionnaire, R2- Household Questionnaire and R3- Individual Questionnaire. In the course of the Census there were efforts on enumeration of population living abroad for more than 12 months, by applying a supplementary form (S1). All operational phases and methodological ones have been tested during three(3) previous pilot censuses that have been conducted.
