Series 4: Population Statistics

Kosovo Vital Statistics for 2005

Enti i Statistikës së Kosovës
Zavod za Statistiku Kosova
Statistical Office of Kosovo

Foreword

In this bulletin, Statistical Office of Kosovo (SOK) publishes the base data and some indicators on Births, Death, Marriages and Divorces on natural movements of vital occurrence in Kosovo.

The data in this Bulletin are final and are the result of annually regular researches of vital statistics for 2005.

The sources of data for vital statistics on births, deaths and marriages are Registry Books, while reported units are Civil Registry Offices (Registrar) of Kosovo.

For divorces the reported units are Kosovo District Courts.

The data collection was done through special statistical instruments: statistical questionnaire of births DEM-1, statistical questionnaire of deaths DEM-2, statistical questionnaire of marriages DEM-3 and the statistical questionnaire of divorces SHK-1.

According to the law provisions on managing the registry books, cases of births, deaths and marriages are obligatory to be registered, in registry books, in the place where the event occurred, whether or not the persons who are related with the event, live in that location permanently or in some other place.

The results of demographic statistics are worked out and published according to permanent/usual dwelling principle of the person, that according to the international rules it is adapted to permanent population concept (resident), which principal is applied in case of population census.

In case of using this information published in this bulletin, the Department of Population Statistics of SOK carefully will accept suggestion, proposals and eventually any remarks that will help us in the future in order to affluence the content of this publication.

In preparation of this Bulletin worked: Head of Population Statistics Department Mr. Kadri Sojeva, Senior Officers of PSD Ms. Nazife Pushka and Sanije Uka.

1 Short History

The data for births, deaths and marriages during 1900-1912 were obtained through Turkish registers that were guided in special administrative offices and in religious institutions.

Also, during the period of 1921-1939, the data for vital statistics were obtained mainly through evidences in religious institutions (churches and mosques), a small amount of data was obtained through state registers, whereas divorces for that period of time were collected mainly through religious institutions, and just a little bit through court.

After the Second World War, on 9th of May 1946, the Law on Marriages and Law on State Register Books was approved, where this matter was carried only in competencies of state organs.

Collection of data was done on monthly basis from officials, in summarized review, for births and deaths, and contained only the total and the gender. The collected monthly data were the preliminary demographic.

After 1951, demographic data were collected by individual questionnaires, afterwards processed and then obtained the final data, according to the permanent residence and the time when the case happened.

The collapse of System of Demographic Statistics starts with the beginning of political disorder in Kosovo in 1989, whereas the total collapse happened during the war in 1999, and continuous with the disorder and collapse of many register offices and the liquidation and stealing-withdrawing of many register books (in some municipalities also the register books from 1900) in Serbia.

First efforts for starting in function this institution were done by the end of 1999, where UNMIK forms new civil register that awake this institution with the new register books and certificates.

In 2000, the priority was "Reactivation of the Vital Statistical System" planned together with Population Statistics Department in SOK. General technical assistance was obtained from the Montreal University in Canada and then also from the Holland Government.

In August 2001, the data collection starts for births, marriages and deaths.

In January 2004, DSP reactivate the other part of VSS – divorces.

Demographic Statistics, after the war in 1999, initially were supported from CIDA (Canadian International Development Agency) for the first phase and together with the Holland Government for the second phase – UNFPA was as an executive agency of project.

1.1. Data source

Reported units of data for Births, Deaths and Marriages are the Offices of Civil Registry – Officials, whereas for divorces are District Courts.

The data are collected by special statistical questionnaires.

According to the Law Provisions on guiding the register books, birth, death and marriage cases, obligatory should be registered in register book, at the register office where the event occurred, not considering that the persons with whom the event is related are living in that place or some other place.

The outcomes of demographic statistics are processed according to the permanent residence principal (to the mother of born child, to the dead person or to the groom). For the divorced persons, the grouping is done according to the last residence where the married persons use to live together. So the demographic statistical outcomes were processed according to the permanent residence principal, that is corresponding to the conception of permanent population (resident) that is applied in the censuses.

This bulletin contains information related to vital occurrence that occurred during 2005, presented in table format, on country level and in the municipalities according to the main characteristics such as: age, gender, ethnicity, education, fertility, etc., that usually are required also in the census, on the Kosovo, Municipality and Permanent Residence level.

1.2. Inclusion

After the war in 1999, was estimated that the cases of vital statistics – births include around 85%, whereas deaths include around 75%. It is of a special importance the implementation of law regulations on registration of vital events (births and deaths) in the register books, at the civil offices. Vital events that happen in the dwellings where the majority of Serb lives, mainly are not registered at the Civil Offices of Kosovo. Therefore, DSP of SOK does not possess information for that part of population of Kosovo.

1.3. Estimation of number of inhabitants

In lack of data for the number of population in Kosovo, since the last census in 1981, for Statistical Office of Kosovo appeared necessary the population estimation. The estimation was done based on statistical methods for estimation, prognosis and projections. In calculation were used the data that came from administrative source also the estimations that were done from mix commission of civil register estimation of 2000. Total population in Kosovo, at the end of 2005 was estimated to be 2.069.989 inhabitants.

The population whether increasing or decreasing with the positive or negative natural growth and also based on positive or negative weld of migrations. This can be presented by this formula:

$$P_1 = P_0 + (L - V) + (I - E)$$

P_1 – is the estimated population at the end of the year,
 P_0 – is the average number of population in the middle of the year,
 L – is the number of births within calendaring year,
 V – is the number of deaths within calendaring year,
 I – is the number of immigrations, and
 E – is the number of emigrations within calendaring year.

1.4. Elementary analysis

Based on the data presented in the tables of this bulletin, for 2005 natality is 18 promil, mortality 3.5 promil, natural growth 14.5 promil, Nuptials 7.6 promil, whilst divorced is 9.2%.

Births:

Based on gathered information in this publication for 2005, in Kosovo are registered 37.455 births, from them 37.218 were born alive, whilst 237 were born dead. Vital coefficient 5,2 (report between births and deaths). Masculinity coefficient is 109. Coefficient of deaths – fetal deaths in 1000 births was 6,3 promil. 90,5% of births occurred in medical institutions, whilst other part occurred in another place. The biggest number of mothers that delivered children is the age group of 25-29 with 36,7%, age group of 20-24 with 26,8%, age group of 30- 34 with 22,6%, and other age groups compound 13,9% from the total number of births. Average age of women that delivered children in 2005 is 27,7 years old. The mothers that delivered the first child are 38,6%, mothers that delivered the second child are 29,8%, mothers that delivered the third child are 18,3% and so on. According to the weigh of the born child, in medical institutions, the biggest number of infants is with weight of 3000-3499gr or 35,4%, 3500-3999gr or 24,9%, 2500-2999gr or 14,0% etc. Infants born with the weight less then 1999gr are only 1,7%. For the children born outside medical institution, according to the research methodology, the data for the infants' weight are not requested. According to the

education, mothers with elementary school are 54,3%, whilst with high schools and faculties are 3,8% etc.

Deaths:

In 2005, there are registered 7.207 death cases, from which 56,3% are male and 43,7 are female. From all death cases registered there are 357 infants or 5,0%. In Kosovo during 2005, 63,6% of death cases occurred at home and only 36,5% occurred in hospital. For cases that occurred at home, it is very difficult, or maybe there are no data obtained, in order to determine the cause of death, and also other characteristics necessary that are required in statistical methodology. Violent deaths are considering being 3,1%

Marriages:

In 2005, in Kosovo were registered 15.732 marriages. Average age of the married persons is 28,6 years old. Unmarried male that get married are 86,6%, whilst unmarried female that get married are 94,5%. According to the education with secondary school, the male dominate with 69,3%, whilst married female dominate with 53,2%.

Divorces:

In 2005 in Kosovo there were total 1.445 divorces. 97% of divorces are Albanian ethnicity. According to the marriage duration, the second year of marriage dominates with 12,9%, third year dominates with 11,9%, fourth year with 10,2% of divorced persons. Divorces by age group, both male and female, dominates the age group of 30-34 years old, then age group 25-29 years old, etc. 49,5% of the divorced persons don't have children. Then, couples with 2 children dominate with 16,5%, couples with three children 13,4% and couples with one child 10,0%.

The most frequented name (more common) for 2005, for female was the name Agnesa by 180 persons, Rinesa by 177 persons, etc, whilst for male was the name Altin by 170 persons, Endrit by 145 persons, etc.

Statistical Office of Kosovo (SOK) - a brief description

The Statistical Office as a professional office has been in operation since 1948, and has passed through all the historic phases of Kosovo. On August 2nd 1999 the Office restarted its work as an independent and professional institution of public administration of Kosovo. Kosovo Consolidated Budget and various donors for particular projects finance the Office.

A Statistical Regulation (Regulation 2001/14) came into force 2 July 2001. SOK is an executive agency attached to the Ministry of Public Services (MPS). A Master Plan (medium term development plan) for the statistical system in Kosovo has been produced.

Organization structure: Seven Regional Offices (Pristine, Peja, Gjakova, Prizren, Ferizaj, Gjilan and Mitrovica) and Head Quarters in Prishtina have at present a total of 134 employees, 88 at HQ and 46 at the Regional Offices. There is 1 Long Term Consultant from Statistics Sweden, financed by Sida and 1 Project Coordinator, Statistics Sweden Projects, SOK. The Office has a fully-fledged field organization for surveys with experienced enumerators and sufficient transport. Local and international expert group are working in the population census project.

The Office Mission is to fulfill the needs of users for objective statistical data and analyses in order to support government departments and provide proper information for decision-makers and other users in Kosovo.
