## Preface

Kosovo Agency of Statistics respectively Department of Agriculture and Environment Statistics, has begun to collect data on prices for agricultural products since November 2003. In the beginning the number of items was limited. With the change of base year from 2003 to base year 2005, prices were collected for 64 items agricultural products. Currently with the change of basic year from 2005 to 2010, prices are collected for 67 items agricultural products. The purpose of Output price index is to measure the price movements for the products sold by the farmer. Plan for the future is to increase the number of products. As a complement to the Output price index is the Input Price Index.

The change of the base year, for Output price index and agricultural price production is done based on the recommendations of Eurostat, relying on Handbook for EU Agricultural Price Statistics Version 2.0 March 2008 from the base year 2005 = 100 in the base year 2010 = 100, where the change of base year is recommended to be carried out in every five years

This is the fourth – three publication on Output Price Index of Agricultural Products and the absolute average prices of agricultural products produced by Kosovo Agency of Statistics. In this publication, the Output Price Index of Agricultural Products is introduced for some major agriculture products.

Kosovo Agency of Statistics is grateful to the Swedish International Development Cooperation Agency (SIDA) for the support in building up the agro monetary statistical system.

KAS is also grateful for the cooperation to all associates from KAS' regional offices, the collaborators (respondents) from the holdings where the prices have been collected such as: agricultural farms, industrial enterprises, commercial etc.

We are especially grateful to Swedish experts for price statistics, Mr. Anders Grönvall, Mr. Jimmie Enhall and others who directly or indirectly assisted on finalization of this publication.

Suggestions, proposals and remarks for this publication are welcome and can be sent to: E- mail: [agriculture@ks-gov.net](mailto:agriculture@ks-gov.net).

This publication was prepared by following personnel:

Annual prices Kosovo 2010-2016 .....	29
Methodology .....	32
Questionnaire .....	34

## Output Price Index for agriculture products

The publication includes data from January - December 2010 - 2016. This publication is based on collection of prices for domestic products in Kosovo. The price collection was carried out at markets, farms and other places where prices on agriculture products are available.

The products which make up the base for the Output Price Index are divided into two main groups: Crop- and Animal Output. Within Crop Output, prices are collected under the following groups; Cereals, Forage plants, Vegetables, Potatoes and Fruits. Within Animal Output, prices are collected for Animals and Animal Product. For Animals prices are collected for four categories; Cattle, Sheep, Pigs and Poultry. These prices are based on the live weight of the animals. Within animal products prices are collected for Milk, Eggs and Honey. All prices are calculated in Euro and the measurement unit is in kg, liter and piece.

### The annual index changes in 2016 compared with 2015 (change in %)

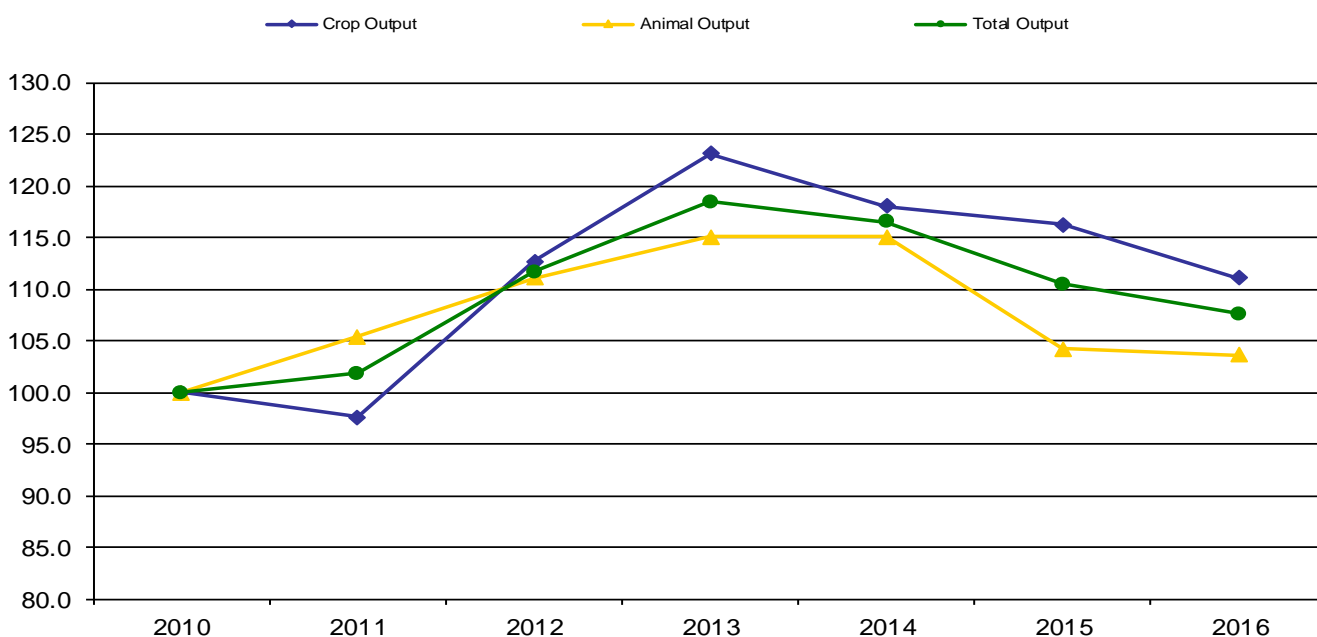

The annual index in 2016 has decreased with – 4.4 % for Crop Output compared to the same period 2015. The index for Animal Output has decreased with -1.1 % between 2015 and 2016. Total Output Index has also decreased during the period with – 2.6 %.

### The annual index changes in 2016 compared with 2010 (change in %)

The annual index in 2016 has increased with 11.1 % for Crop Output compared with 2010. The index for Animal Output has increased with 4.9 % between 2010 and 2016. Total Output Index has also increased with 7.6 % compared with 2010.

Figure 1. Shows Annual Output Price Index from 2010-2016 for Total Output as well as for Crop- and Animal Output (2010 = 100).

## Methodology

Prices and Price indices in this publication have been calculated according standards for price statistics in European Union. The project for calculating these Prices and Price Indices was conducted in the frame of the project of “Improving agro monetary statistics” in cooperation with Statistic Sweden and with financial support by Sida (Swedish International Development Cooperation Agency).

Prices have been collected since November 2003 and are collected in seven regions: Pristina, Mitrovica , Peja, Gjakova ,Prizren, Ferizaj and Gjilan,. Prices are collected around the 15<sup>th</sup> in every month. Since the start the number of different prices that are collected have increased step by step. Therefore some prices are not available for the whole period. Prices are now collected for 64 products and measures prices that farmers receive for the part of their production that are sold. Weights to calculate aggregated indices are mainly based on Economic Accounts of Agriculture (EAA) from 2010, which is the base year in the indices (2010=100). It should be pointed out that the weights, in value or promille, only reflect the part of the agricultural production in Kosovo that are sold outside the agricultural household. For some products the value of the total production can be considerably higher than what is reflected in the weights.

According to EU standards, quarterly and annual indices are supposed to be calculated by each member state. The EU indices in this publication follow the methodology developed in EU. For national needs, also a monthly index is calculated. This index is calculated slightly different from the quarterly index. In short, the monthly index does not use monthly weights on aggregated level (when calculating code 10, 13 and 14). However for most crop groups (code 01, 03, 04 and 06) monthly weights are used within the group to calculate the group aggregates. On the other hand the quarterly index have variable quarterly weights everywhere. For this reason, the monthly and the quarterly indices might have slightly different developments if they are compared. However, the EU annual index and the Kosovo annual index are exactly the same. In both cases, the index is calculated as weighted annual index with monthly respectively quarterly weights.

The total weights, quarterly weights and monthly weights are fix during the base period. They all reflect the situation that was present in 2005. By having fix weights, the index is guaranteed only to measure price movements, which is the purpose of the index.

To compare the EU index presented in this publication with other countries, the Eurostat website is recommended (<http://epp.eurostat.ec.europa.eu/portal/page/portal/eurostat/home>).

### Calculation of elementary Price Index

Calculations of elementary indices are in general done by using following formula, with un-weighted arithmetic mean price.

$$R_i^t = \frac{\frac{1}{n} \sum P_{ij}^t}{\frac{1}{n} \sum P_{ij}^o} \cdot 100$$

$R_i^t$  – Elementary index for month t and product i

P – Collected price

i – Product i

j – Price j recorded for product (in general price for region 1,2,...,n)

t – Observed month

0 – Base month

### Calculation of aggregated Price Index

Calculating aggregated index for total Output or subgroups of Output Index is done using following formula.

$$I^t = \sum \left( R_i^t \cdot \frac{w_i^0}{\sum w_i^0} \right)$$

$I^t$  – Aggregated index for period t

$w_i^0$  – Weighting factor in base period for product i

i – Product i

t – Observed month

0 – Base month

## Questionnaire

Target definition
-------------------

Item number	Item name			Quantity	Unit	
Price Collector				Collection place/ Company		
Date						
Price						

<p>Enumerators notes</p> <ul style="list-style-type: none"> <li>- Detailed description of specific variety selected for re-pricing</li> <li>- Changes in the detailed description, date for changes</li> <li>- Treatment of quality change when description changed (information of over-lap price observation, alt. valuation of quality change)</li> </ul>

# Kosovo Agency of Statistics

## *short description*

**Kosovo Agency of Statistics** is a professional institution which deals with collection, processing and publication of official statistical data. As such acts since 1948 and has passed through several historical stages, structured according to state regulation of those times.

On 2 August 1999, the Agency has resumed his professional work (after nine years of interruption of all statistical series detrimental to the interest of Kosovo), as an independent institution under the Ministry of Public Administration. Since 12.12.2011 the Agency operates in the frames of the Prime Minister's Office. Office is funded by the Kosovo Consolidated Budget, but also by donors for specific projects and for technical professional support.

**Kosovo Agency of Statistics** acts according to the Law No. 04/L-036 which entered into force on 12.12.2011. Strategic development plan 2009-2013 is the middle term implementation for the development of statistical system in correlation with the European Union statistics (EUROSTAT).

**Kosovo Agency of Statistics** has this organizational structure: production departments; (Department of Economic statistics and National Accounts, Department of Agriculture and Environment statistics and Department of Social statistics. **Support Departments**; Department of Methodology and Information Technology, Department of Policy Planning, Coordination and Communication, Department of Census and survey and Department of Administration. **Within the Agency are also established Regional Offices**; Gjakove, Gjilan, Mitrovica, Peja, Prizren, Pristina and Ferizaj

Number of employees and budget are still limited. In KAS are employed in total 143 workers, of whom 98 (68,58 %) at the headquarters of the Agency, while in the Regional Offices, 45 (31,5%). Agency's educational qualifying structure is as follows: 61,7% with university education, 15,4% with non-tertiary education, and 17,5% with secondary education.

We have professional and technical cooperation with all Ministries of the Government of Kosovo, especially with the Ministry of Economy and Finance, Central Bank of Kosovo, with international institutions, EUROSTAT, International Monetary Fund, World Bank, Sweden's SIDA, DFID, UNFPA, UNDP, UNIVEF, and with the statistical institutions of the countries in the region.

**Kosovo Agency of Statistics** almost completely covers the territory of Kosovo, based on the statistical structure of the enumeration areas as the basic unit and sole in the country from which it gets first hand information. All surveys conducted in the field use the extension of the samples in these enumeration areas but also a statistical methodology according to international recommendations. During the collection of statistical data and reports from reporting entities are involved professionals, technicians, administrators, servants of the country offices, field enumerators from regional offices, etc.

In 2011, the project of Population Census , Households and Dwellings was successfully implemented, and in 2014 was successfully carried out the Agriculture Census. The result obtained from these censuses will have an important role in the development policies.

**The mission of the Agency**; to meet the needs of users with qualitative statistical data, objective, in time and space so that users have reliable base to conduct regular analysis in the interest of planning and project development at the municipal and country level. To support government institutions, scientific institutes, research academies, businesses in order to provide proper information for decision-makers and other users in Kosovo.
