## Foreword

Kosovo Agency of Statistics (KAS) has made regular annual publication of the Consumer Price Index (CPI), respectively Harmonized Index of Consumer Prices (HICP) in order to provide statistical serial data of consumer price changes from May 2002 - December 2016. The annual publications of Consumer Price Index (CPI) published prior to 2002-2014 were published under the base month May 2002 = 100, while the annual publication of the Harmonised Index of Consumer Prices (HICP), harmonized according to international concept, has been implemented since January 2015 and contains time series, period 2002-2017 recalculated under the base year **2015 = 100**.

Consumer Price Index (CPI), namely the Harmonized Index of Consumer Prices (HICP), is a relative indicator that presents the dynamics of change or movement of retail prices for most representative items and services consumed by households in certain periods of time involved in **groups and subgroups** classified according to international nomenclature called COICOP (Classification of Individual Consumption by Purpose).

The Consumer Price Index (CPI), ie the Harmonized Consumer Price Index (HICP) as a statistical parameter or the Living Cost Index is also taken as a parameter for measuring inflation. This publication is also a result of creating time series on price dynamics and comparability.

This statistical parameter has a special significance for the country's economic and financial flows, development of financial policies, measuring the living standard, harmonization of personal income, commercial flow, and other.

Consumer Price Index (CPI), namely the Harmonized Index of Consumer Prices (HICP), is built according to European standards and methodologies and the data are regularly used by local and international institutions.

KAS thanks all collaborators of regional statistics, local and international professional staff and trade-service enterprises etc., as the main source of data compilation for this regular research.

The proposals, suggestions and feedback can be send via e-mail [economic@rks-gov.net](mailto:economic@rks-gov.net)

Consumer Price Index (CPI), namely the Harmonized Index of Consumer Prices (HICP), is a regular monthly publication.

## HICP Methodology

HICP Kosovo, produced by Kosovo Agency of Statistics (KAS), is produced by methods of the Harmonized Index of Consumer Prices (HICP). Eurostat has defined the HICP as the European standard of consumer price indices. Index calculated and their results are presented by Classification of Individual Consumption by Purpose (COICOP), the international classification which classifies consumption in divisions, groups and classes of items. By COICOP, KAS has allocated 91 classes of defined consumption (at 4-digit level) further to 408 products (elementary aggregate). KAS has defined aggregation weight for each element and each month collects prices for each elementary aggregate.

Each month the HICP is calculated in two steps:

1. Elementary indices (elementary aggregate indicator) calculated from the collected prices by using the formula of unweighted geometric average (Jevon).
2. The indices of the highest level, including the HICP itself, are calculated by averaging the elementary indices by formula of weighted arithmetic average (Laspeyres).

Elementary aggregate weights are based on estimates of annual consumer spending. KAS, for 91 classes of consumption, estimates the annual consumer spending from the Household Budget Survey (HBS) and National Accounts (NA); weights within the consumer classes come from KAS domestic sources. Specific weights from January 2013 were based on estimates of the data from the Household Budget Survey (HBS) and National Accounts (NA) that refer to 2012, while from January 2015 specific weights are based on updated data from the National Accounts (NA) and the Household Budget Survey (HBS) 2013.

From January 2016, specific weights for items and services harmonized by E-CoICoP (Eurostat recommendations) are based on data from the National Accounts (NA) and the Household Budget Survey (HBS) 2014. As from January 2017 specific weights for items and services are based only on data from the National Accounts (NA) 2015. Annually updated weights ensure that HICP reflects current consumer trends.

Total annual consumption expenditure is defined as all domestic (within-country) monetary purchases of the household sector. This matches the NA category called *Household Final Monetary Consumption (HFMC)* and means the weights must exclude the value of consumption of own production and costs for owner-occupied housing. Until December 2014 the weights included expenditure of only domestic consumers, while from January 2015 are also include expenditure of non resident consumers.

To estimate monthly price change, KAS staff collect prices for a set of specific items (often called a *market basket*) chosen to represent the elementary aggregates. The goal is to collect all prices of exactly the same items every month; whenever a price cannot be collected, carefully developed procedures must be applied to avoid a biased result.

KAS data collectors, who are based in seven regional centers, collect approximately 6000 prices during the period of 10<sup>th</sup> - 20<sup>th</sup> of each month. They obtain prices in stores, markets, service enterprises and other retail outlets in thirteen municipalities of Kosovo:

- Gjakovë
- Gjilan
- Istog
- Mitrovicë
- Pejë
- Kamenicë
- Vushtri
- Podujevë
- Prizren
- Prishtinë
- Suharekë
- Ferizaj
- Rahovec

The KAS central office staff in Pristina collects prices for items such as electricity, water, postal and telecom services, and rail transport.

### **Elementary Indexes**

Elementary index for a month is equal to its index in the previous month multiplied by the price change measured on a monthly basis, calculated from collected prices. KAS uses the geometric mean formula (Jevon) to calculate monthly changes: geometric average rate of the current month in geometric average price collected for the previous month.

#### Index for elementary aggregate **e** for month **m**

$$I_e^m = I_e^{m-1} \times \left[ \left( \prod_{i=1}^{n_e} p_i^m \right)^{1/n_e} / \left( \prod_{i=1}^{n_e} p_i^{m-1} \right)^{1/n_e} \right] \quad I_e^0 \equiv 100$$

$I_e^m$  = Price index for elementary aggregate **e** for month **m**

$I_e^{m-1}$  = Price index for elementary aggregate **e** in month **m-1**

$p_i^m$  = Price for item **i** in month **m**

$p_i^{m-1}$  = Price for item **i** in month **m-1**

$n_e$  = Number of collected prices for elementary aggregate **e**

### **Higher-level indexes**

In Kosovo's HICP indexes are calculated first for groups (of elementary aggregates) and these are combined to obtain the overall HICP.

Higher-level indexes are weighted by arithmetic averages of elementary indexes. In the current CPI, which uses the *Young* formula until December 2013, the weights are shares of the unadjusted weight-period expenditures. Since January 2014 the index will use the *Lowe* formula, with weights that are shares of weight-period expenditures that have been updated for price change. (The *Lowe* formula is closer to the actual *Laspeyres* formula).

Both the *Young* and *Lowe* formulas are weighted by arithmetic averages with weights that are shares of consumption expenditure and so both are *Laspeyres-type* index formulas. Currently HICP uses the *Young* index formula whose weights are shares of expenditures during the weight period (2010). New weights from NA data and from the 2012 HBS and are applied from January 2014. CPI has passed in calculating indexes by *Lowe's* formula; (weights have been spending part of 2012 calculated by price changes in December 2013, and by January 2015 are applied new weights from the NA data and the HBS 2013 calculated with the price changes in December 2014 (HICP weights).

## Index weights

### Young Formula Weights for Elementary Aggregates within Groups

$$w_{e,g}^b = \frac{x_e^b}{\sum_{e=1}^{k_g} x_e^b} \quad \sum_{e=1}^{k_g} w_{e,g}^b = 1$$

$w_{e,g}^b$  = Weight for elementary aggregate  $e$  within group  $g$  in weight-period  $b$

$x_e^b$  = expenditure for elementary aggregate  $e$  in weight-period  $b$  (Currently  $b = 2012$ )

$k_g$  = Number of elementary aggregates in group  $g$

### Young Formula Weights for Groups within the Overall CPI

$$w_g^b = \frac{\sum_{e=1}^{k_g} x_e^b}{\sum_{g=1}^h \sum_{e=1}^{k_g} x_e^b} \quad \sum_{g=1}^h w_{e,g}^b = 1$$

$w_g^b$  = Weight for group  $g$  in weight period  $b$

$h$  = Number of groups in CPI

### Lowe Formula Weights for Elementary Aggregates within Groups

$$w_{e,g}^b = \frac{x_e^b \times a_e^{b \rightarrow v}}{\sum_{e=1}^{k_g} (x_e^b \times a_e^{b \rightarrow v})} \quad \sum_{e=1}^{k_g} w_{e,g}^b = 1$$

$w_{e,g}^b$  = Weight for elementary aggregate  $e$  within group  $g$  in weight-period  $b$   
(Effective January 2014,  $b = 2012$ )

$a_e^{b \rightarrow v}$  = weight adjustment factor for elementary aggregate  $e$

$$a_e^{b \rightarrow v} = I_e^v / \frac{1}{12} \left( \sum_{m=Jan}^{Dec} I_e^{m/b} \right)$$

$I_e^v$  = Price index for elementary aggregate  $e$  for month  $v$

(Effective January 2014,  $v =$  December 2013)

$I_e^{m/b}$  = Price index for elementary aggregate  $e$  in month  $m$  in year  $b$

### Lowe Formula Weights for Group within Overall-CPI

$$w_g^b = \frac{\sum_{e=1}^{k_g} (x_e^b \times a_e^{b \rightarrow v})}{\sum_{g=1}^h \sum_{e=1}^{k_g} (x_e^b \times a_e^{b \rightarrow v})} \quad \sum_{g=1}^h w_{e,g}^b = 1$$

### *Indexes for higher-level Groups*

$$I_g^m = \sum_{e=1}^{k_g} w_{e,g}^b * I_e^m \quad I_e^0 = 100$$

period 0 is May 2002 for most items,  
but later for items that entered at a later date

### *Overall HICP*

Overall HICP is a weighted arithmetic average of the indexes of groups. CPI used in the formula of Young, but since January 2014 has passed in using Lowe formula.

Because the groups have different bases indexed (most have a base May 2002 = 100, but the groups added later have otherwise, since January 2016 the indices are calculated with base year 2015 = 100), indices of groups should be re-based on a common period, which is the month  $v$  (previous month before new weights being put into use).

$$HICP^m = HICP^v \times \sum_{g=1}^n w_g^b \times \frac{I_g^m}{I_g^v} \quad HICP^0 = 100$$

$HICP^m$  = Harmonized index of consumer prices for the month  **$m$**

$v$  = previous month before new weights being put into use). (Currently  $v$  = 2015=100)

# Kosovo Agency of Statistics

## *short description*

**Kosovo Agency of Statistics** is a professional institution which deals with collection, processing and publication of official statistical data. As such acts since 1948 and has passed through several historical stages, structured according to state regulation of those times.

On 2 August 1999, the Agency has resumed his professional work (after nine years of interruption of all statistical series detrimental to the interest of Kosovo), as an independent institution under the Ministry of Public Administration. Since 12.12.2011 the Agency operates in the frames of the Prime Minister's Office. Office is funded by the Kosovo Consolidated Budget, but also by donors for specific projects and for technical professional support.

**Kosovo Agency of Statistics** acts according to the Law No. 04/L-036 which entered into force on 12.12.2011. The Programme of Official Statistics 2013/2017 is currently implemented for the development of the statistical system in correlation with European Union Statistics (EUROSTAT).

**Kosovo Agency of Statistics** has this organizational structure: **Departments for statistical production;** (*Department of Economic Statistics and National Accounts, Department of Agriculture and Environment Statistics and Department of Social statistics.* **Support Departments;** *Department of Methodology and Information Technology, Department for Policy Planning, Coordination and Communication, Department of Census and Surveys and Department of Administration.* **Within the Agency also operate; Regional Offices; Gjakove, Gjilan, Mitrovica, Peja, Prizren, Prishtina and Ferizaj**

Number of employees and budget are still limited. In KAS are employed in total 143 workers, of whom 98 (68,58 %) at the headquarters of the Agency, while in the Regional Offices, 45 (31,5%). Agency's educational qualifying structure is as follows: 61,7% with university education, 15,4% with secondary but not tertiary education, and 17,5% with secondary education.

We have professional and technical cooperation with all Ministries of the Government of Kosovo, especially with the Ministry of Economy and Finance, Central Bank of Kosovo, with international institutions, EUROSTAT, International Monetary Fund, World Bank, Sweden's SIDA, DFID, UNFPA, UNDP, UNICEF, and with the statistical institutions of the countries in the region.

**Kosovo Agency of Statistics** almost completely covers the territory of Kosovo, based on the statistical structure of the enumeration areas as the basic unit and sole in the country from where obtains first hand information. All surveys conducted in the field use the extension of the samples in these enumeration areas but also a statistical methodology according to international recommendations. During the collection of statistical data and reports from reporting entities are involved professionals, technicians, administrators, servants of the country offices, field enumerators from regional offices, etc.

In 2011, the project of Population Census, Households and Dwellings was successfully implemented, and in 2014 was successfully carried out the Agriculture Census. The result obtained from these censuses will have an important role in the policies for development.

**The mission of the Agency;** to meet the needs of users with qualitative statistical data, objective, in time and space so that users have reliable base to conduct regular analysis in the interest of planning and project development at the municipal and country level. To support government institutions, scientific institutes, research academies, businesses in order to provide proper information for decision-makers and other users in Kosovo.
