Graph 2 real growth rate

Graph 3 Consumption expenditure

Methodological notes

I. GROSS DOMESTIC PRODUCT (GDP)

The most important economic aggregates emanating from the national accounts is Gross domestic product (GDP), a measure of the economic performance of a country in a given period of time .

There are three approaches for compilation of the GDP: production approach, expenditure and income approach.

GDP by production approach is equal to the total gross value added for all economic activities, plus taxes on products less subsidies on products.

It deserves notice, that GDP measure production by resident units irrespectively of the location of the productive activity.

Production approach:

$$\text{GDP} = \text{GVA} + \text{TP} - \text{SP}$$

Where:

GDP = Gross domestic product (market price)

GVA = Gross value added (basic price)

TP = Taxes on products

SP = Subsidies on products

1. Output

Output is measured in a given time period as the value of the goods and services produced by resident establishments. Output can either be delivered to other units or it may be used for own-account consumption or own-account gross fixed capital formation.

2. Intermediate consumption

Intermediate consumption is the total value of inputs used, consumed or transformed in the production process. Intermediate consumption includes goods and services produced by other economic units only (own production is excluded from that). Similarly to output, it is measured in a given time period.

3. Value added

Value added is a vital production economic concept that refers to the value generated by a unit engaged in productive activity. Gross value added is defined as total output minus intermediate consumption. Value added is calculated separately for each resident activity in an economy. It provides an important measurement of productive activity at detailed level.

Expenditure approach:

The GDP by expenditure approach is derived as the sum of all final expenditures on goods and services. These final expenditures are grouped into three big categories: Final consumption, Gross Capital Formation and Net exports (E-I). Since the GDP measures domestic production, the value of expenditures on imports is subtracted from all other expenditures, using the following formula:

$$\text{GDP} = \text{FC} + \text{GCF} + (\text{E}-\text{I})$$

FC = final consumption

GCF = gross capital formation

E = export

I = import

Components of the Gross Domestic Product

Household Final Consumption

The household consumption is the main component of GDP by expenditure approach and represents the costs of the resident households, in order to obtain goods and services necessary for their needs and demands. It includes not only directly paid for goods and services, but also the acquisition through income in kind or from own production.

The total Household consumption was derived from the Household Budget Survey, which is organized in KAS.

Final consumption expenditure of General Government

Government final consumption is measured as the sum of purchases of goods and services, compensation of employees and consumption of fixed capital less receipts from sales.

Gross capital formation

Based on ESA2010 methodology, the GCF represents the sum of the Gross fixed capital formation and changes in inventories.

The estimation of Gross Fixed Capital Formation covers acquisitions less disposals of tangible assets and major improvements to tangible non-produced assets, which are used more than one year. The estimates on the GFCF include the following types of assets: dwellings, other buildings and structures, machinery and equipment.

Main data source for investments are import data for the machinery and equipment. Also the domestic production of construction material is used.

The changes in inventories are measured by the value of the entries into inventories less the value of withdrawals and the value of any recurrent losses of goods held in inventories. The estimation of the changes in inventory is based on the results of the Structural Business Survey, carried out by KAS.

Final Consumption of Non-Profit Institutions Serving Households
Non-profit institutions include the non-profit organizations (NGO).

Export and Import of goods and services

Export of goods and services consist of transactions in goods and services from residents to non-residents.

Import of goods and services consist of transactions in goods and services from non-residents to residents.

The export and import of goods data are provided by the Customs of Kosovo, while the export and import of services are provided by Balance of Payment (BoP) elaborated by CBK.

Data sources

Statistical data sources

Results of surveys and publications carried out by KAS as: household budget survey, labor force survey, agriculture household survey and KAS publications;

Foreign trade statistics: import and export of goods;

Consumer Price Index, import price indices, producer price indices and other indices collected in KAS;

Final data of Census Population 2011 and estimation of the population

Administrative data sources:

Ministry of Finance concerning the budget and treasury data;

Central Bank of Kosovo, Balance of Payment and other data;

Ministry of Public Administration, concerning the NGO data;

Ministry of Agriculture, concerning agriculture data;

Kosovo Tax Administration-tax data.

Kosovo Agency of Statistics

short description

Kosovo Agency of Statistics is a professional institution which deals with collection, processing and publication of official statistical data. As such acts since 1948 and has passed through several historical stages, structured according to state regulation of those times.

On 2 August 1999, the Agency has resumed his professional work (after nine years of interruption of all statistical series detrimental to the interest of Kosovo), as an independent institution under the Ministry of Public Administration. Since 12.12.2011 the Agency operates in the frames of the Prime Minister's Office. Office is funded by the Kosovo Consolidated Budget, but also by donors for specific projects and for technical professional support.

Kosovo Agency of Statistics acts according to the Law No. 04/L-036 which entered into force on 12.12.2011. Strategic development plan 2009-2013 is the middle term implementation for the development of statistical system in correlation with the European Union statistics (EUROSTAT).

Kosovo Agency of Statistics has this organizational structure: production departments; (Department of Economic statistics and National Accounts, Department of Agriculture and Environment statistics and Department of Social statistics. **Support Departments**; Department of Methodology and Information Technology, Department of Policy Planning, Coordination and Communication, Department of Census and survey and Department of Administration.

In ASK are employed in total 139 workers, of them 104 (74,8 %) at the headquarters of the Agency, while in the Regional Offices, 35 (25,2%), with qualifying structure, 70,5% with university education to 29,5% with secondary education.

We have professional and technical cooperation with all Ministries of the Government of Kosovo, especially with the Ministry of Economy and Finance, Central Bank of Kosovo, with international institutions, EUROSTAT, International Monetary Fund, World Bank, Sweden's SIDA, DFID, UNFPA, UNDP, UNICEF, and with the statistical institutions of the countries in the region.

Kosovo Agency of Statistics almost completely covers the territory of Kosovo, based on the statistical structure of the enumeration areas as the basic unit and sole in the country from which it gets first hand information. All surveys conducted in the field use the extension of the samples in these enumeration areas but also a statistical methodology according to international recommendations. During the collection of statistical data and reports from reporting entities are involved professionals, technicians, administrators, servants of the country offices, field enumerators from regional offices, etc.

We have successfully implemented the project of Population Census, Households and Dwellings in 2011, Census that was not carried out since 1981. Results obtained from the Census will have an important role in compiling the development policies.

The mission of the Agency; to meet the needs of users with qualitative statistical data, objective, in time and space so that users have reliable base to conduct regular analysis in the interest of planning and project development at the municipal and country level. To support government institutions, scientific institutes, research academies, businesses in order to provide proper information for decision-makers and other users in Kosovo.
