## Foreword

Kosovo Agency of Statistics (KAS) has prepared the publication of results of industrial production statistics or PRODCOM for 2015.

Starting from 2015 and onwards this research is an integral part of the KAS Statistical Programme and is based on statements of enterprises. This research will be published on a regular annual basis.

The results of this research show the evolution of industrial production in the economy of Kosovo. Also these results are used for the purposes of compiling the national accounts and are important in the preparation of Gross Domestic Product by production and expenditure approach on a quarterly basis.

Publication of annual PRODCOM statistics contains comprehensive and detailed data in the field of annual industrial production statistics. The data presented are collected through annual PRODCOM survey on industrial production PRODCOM2015.

This publication may be subject to possible revisions due to the application of new methodologies by EUROSTAT.

Publication was prepared by:

Ilir T. Berisha – Director of Department

Ismail Sahiti – Head of Division,

Hysni Elshani - Head of Sector,

Muhamet Kastrati - IT specialist for SBR,

Valdete Navakazi - Officer,

Luljeta Krasniqi-Çela – Officer

## **1 The objective, methodology and scope of the survey**

### **1.1. Objective**

Subject to inclusion of PRODCOM and reporting units of PRODCOM are all commercial enterprises and other legal entities with over 10 employees, which are taking active industrial production or exercised industrial services on own account or on a contract basis, during the reference year, under the definition of industrial sectors B, C and E (only branch 36) of NACE 2015. The survey aims to meet demands for more comprehensive statistical information on the conditions of market economy and provides data on the economic activities of enterprises in the sector of industrial production.

### **1.2. Methodology and scope of the survey**

This research, PRODCOM, is realized in order to provide detailed data on the local market, to align with the international trade data and also enable a comparison of the domestic market to the international market at a detailed level of product / individual goods, which is the goal of the EU PRODCOM research with which it is aligned. All data on the level of products are assembled according to the EU PRODCOM List 2015 which is an integral part of the Regulation on the EU PRODCOM.

This publication contains detailed data on industrial production at the country level. The notion or the term "industry" is defined by products (and services) sector B, C, D and E (only group 36) by NACE Rev. 2. (Regulation 02/2011). This definition on the industry is harmonized with the definition which is used in the EU PRODCOM statistics.

Sources and methods of data collection: The source of all data published in this publication are the result of statistical PRODCOM survey on industrial production for 2015. Was conducted by KAS under the Law on Official Statistics, the KAS Annual Plan on the implementation of statistical surveys for 2016 and statistical research standards on industry 2015 - PRODCOM.

The subject of the PRODCOM survey for 2015 is the possible and realised production of the industrial products, and the quantity and value of sold industrial production.

Does not include the product which is exploited or will be used for further processing in local units which belong to the same business (reporting unit). It includes realized production for subsistence and production under contract with the customer.

The data on production are presented in the following economic activities at NACE 2 and the list of products, based on the percentage. Data for processing are collected throughout the country. All PRODCOM data refer to one year period, starting from 1.01.2015 to 31.12.2015. Presented are only the data on production conducted within the territory of the Republic of Kosovo.

Does not include the product which is conducted outside the territory of the Republic of Kosovo on behalf of local entities or businesses.

Hereinafter are provided specific methodological explanations and are suggested to all users as an indispensable tool for the correct interpretation of the data and their use.

PRODCOM indicators on industrial production.

### **1.3. Sample frame and sample selection**

To create (determine) the sampling framework are used data from the statistical register of businesses. All enterprises that have declared one of the taxes during the reference years for previous years are considered active. The selection of sample is done on the basis of criteria which included all enterprises that represent 80% of turnover for the relevant activity NACE Rev.2.

### **1.4. Procedures for data collection**

In collecting the data we have applied methods that we considered more efficient for the conditions and circumstances in our country.

Business survey included in the sample is performed by the method of direct interview when it has been possible, in other words, when the responsible persons at enterprises have been able to do so.

In certain cases, when the interview was impossible to be realized directly, questionnaires are left to responsible persons in companies in order to meet them and after a few days, the same, supplemented, is taken by the interviewers.

## 2 Definitions and key indicators

### 2.1. Definitions

PRODCOM is the label for production statistics on industrial production of the EU, defined by Regulation No.3924/91. Abbreviation is derived from the name in French "Production Communautaire" (Community Production).

The PRODCOM list – is a list of products, goods and services specified in the labels of the PRODCOM survey.

#### Product-production

The production is the result of an economic activity. It is used as a notion for products which have physical dimension to services. According to the concept of research, PRODCOM' is according to the list of EU products. In accordance with the concept of ready production - is considered any product which during the process of industrial production has reached a certain level of processing and is encoded with a particular code according to the list of products.

Concepts and definitions used in the PRODCOM survey of the Republic of Kosovo are aligned with the PRODCOM survey of the EU.

They provide additional explanations of some terms that are utilized for PRODCOM statistics within these methodological explanations and have no definitive understanding of the meaning of these words, and in another context might have a different meaning. The aim is only to help users of PRODCOM data in their correct interpretation.

Enterprise is the smallest combination of legal entity with manufacturing unit of products or services which has independence in decision-making, especially for the use of its material and monetary resources. An enterprise may carry one or several economic activities.

Active enterprises - are considered only those enterprises that have declared one of the taxes or any employees for the reference year. Enterprise is the smallest combination of legal entity with manufacturing unit of products or services which has independence in decision-making, especially for the use of its material and monetary resources. An enterprise may carry one or several economic activities.

Active enterprises - are considered only those enterprises that have declared one of the taxes or any employees for the reference year.

Statistical units are industrial enterprises and local units of non-industrial enterprises that produce products defined by the PRODCOM list.

Statistical units or parts thereof which "physically" are outside the territory of Kosovo, are not included. The inclusion of statistical units is made on the basis of Statistical Business Register, which is updated annually. Particular criterion of involvement in PRODCOM research is that each class of industry (from 05.10 to 36.00) in NACE to enable sufficient inclusion of statistical units with the participation of at least 90% of gross value added of each class of industry. If that criterion is not met for any class of NACE, then the inclusion is expanded to include statistical units with less than 10 employees.

## 2.2. Key indicators

**Table 1. Structure according to employees, realized production and realized sales (in value and quantity) for sections B, C and E in 2015** %

Sector	Group	Economic activity	Number of employees	Produced quantity	Value in euro of produce	Total amount sold	Total value of sold
B	05-09	Extractive industries (mining and quarrying)	24.08	0.75	10.78	0.32	10.51
C	10-33	Manufacturing	72.23	84.88	87.75	98.57	88.02
E	36-39	Water supply, activities of waste management and treatment	3.69	14.37	1.47	1.11	1.47
			100	100	100	100.00	100.00

# Kosovo Agency of Statistics

## *short description*

**Kosovo Agency of Statistics** is a professional institution which deals with collection, processing and publication of official statistical data. As such acts since 1948 and has passed through several historical stages, structured according to state regulation of those times.

On 2 August 1999, the Agency has resumed his professional work (after nine years of interruption of all statistical series detrimental to the interest of Kosovo), as an independent institution under the Ministry of Public Administration. Since 12.12.2011 the Agency operates in the frames of the Prime Minister's Office. Office is funded by the Kosovo Consolidated Budget, but also by donors for specific projects and for technical professional support.

**Kosovo Agency of Statistics** acts according to the Law No. 04/L-036 which entered into force on 12.12.2011. Programme of Official Statistics 2013/2017 is in implementation for the development of statistical system in correlation with the European Union statistics (EUROSTAT).

**Kosovo Agency of Statistics** has this organizational structure: production departments; (Department of Economic statistics and National Accounts, Department of Agriculture and Environment statistics and Department of Social statistics. **Support Departments**; Department of Methodology and Information Technology, Department of Policy Planning, Coordination and Communication, Department of Census and survey and Department of Administration. **Within the Agency are also established Regional Offices**; Gjakove, Gjilan, Mitrovica, Peja, Prizren, Pristina and Ferizaj

Number of employees and budget are still limited. In KAS are employed in total 143 workers, of whom 98 (68,58 %) at the headquarters of the Agency, while in the Regional Offices, 45 (31,5%). Agency's educational qualifying structure is as follows: 61,7% with university education, 15,4% with non-tertiary education, and 17.5% with secondary education.

We have professional and technical cooperation with all Ministries of the Government of Kosovo, especially with the Ministry of Economy and Finance, Central Bank of Kosovo, with international institutions, EUROSTAT, International Monetary Fund, World Bank, Sweden's SIDA, DFID, UNFPA, UNDP, UNICEF, and with the statistical institutions of the countries in the region.

**Kosovo Agency of Statistics** almost completely covers the territory of Kosovo, based on the statistical structure of the enumeration areas as the basic unit and sole in the country from which it gets first hand information. All surveys conducted in the field use the extension of the samples in these enumeration areas but also a statistical methodology according to international recommendations. During the collection of statistical data and reports from reporting entities are involved professionals, technicians, administrators, servants of the country offices, field enumerators from regional offices, etc.

In 2011, the project of Population Census , Households and Dwellings was successfully implemented, and in 2014 was successfully carried out the Agriculture Census. The result obtained from these censuses will have an important role in the development policies.

**The mission of the Agency**; to meet the needs of users with qualitative statistical data, objective, in time and space so that users have reliable base to conduct regular analysis in the interest of planning and project development at the municipal and country level. To support government institutions, scientific institutes, research academies, businesses in order to provide proper information for decision-makers and other users in Kosovo.
