P r e f a c e

Agriculture and Environment Statistics Department started to collect data on prices for agriculture products in November 2003. In the beginning it was started to collect prices with limited number of items, now actually prices are collected for 44 items (agriculture products). In the future it is planned to both increase the number of products and also to complement it with an Input Price Index.

This is the fifth publication on Output Price Index and Average Absolute Prices for agriculture products produced by Statistical Office of Kosovo (SOK). In this publication, Output Price Index was calculated for some major agriculture products.

SOK is grateful to the Swedish International Development Cooperation Agency (SIDA) for their support of build up the agro monetary statistics system. SOK also is grateful for their corporation of all co-workers at the regional offices, other respondents of data collection as: agriculture farms, industrial and trade enterprises etc.

Especially grateful to Swedish price statistics experts Mr. Anders Grönvall, Mr. Tomas Eriksson, Mr. Daniel Persson and Statistics Sweden Long-term consultant Mrs. Milva Ekonomi and others who directly or indirectly assisted on finalisation of this publication.

This publication was prepared by following personnel from Agriculture and Environment Statistics Department at SOK.

Bajrush Qevani - Director of Department,
Haki Kurti – Chief of Division,
Violeta Arifi – Gashi – Chief of Section,
Kademsha Bajramaga – Statistical officer

Suggestions, proposals and remarks for this publication are welcome and will help us to have more effective publications for users.

Output Price Index for agriculture products 2007

The publication includes data from January to December 2007. To make comparisons and see changes there are also data from year 2006 and November 2003, (November 2003=100).

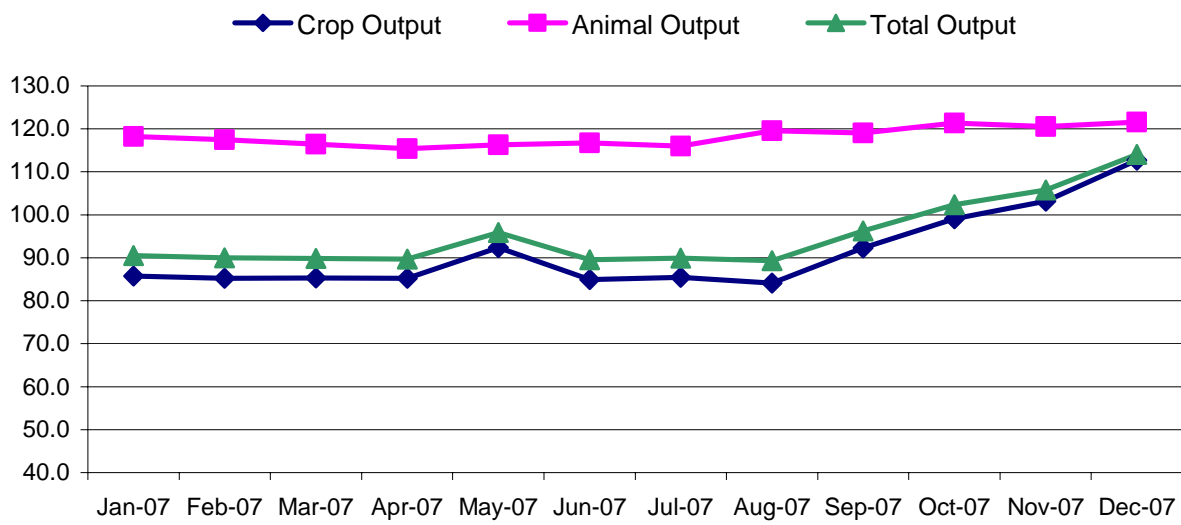

This publication is based on collection of prices for domestic products in Kosovo. The price collection was carried out at markets, farms and other places where prices on agriculture products are available.

The products which make up the base for the Output Price Index are divided into two main groups: Crop- and Animal Output. Within Crop Output, prices are collected under the following groups; Cereals, Industrial crops, Forage plants, Vegetables, Potatoes and Fruits. Within Animal Output, prices are collected for Animals and Animal Product. For Animals prices are collected for four categories; Cattle, Sheep, Pigs and Poultry. These prices are based on the live weight of the animals. Within animal products prices are collected for Milk, Eggs and Honey. All prices are calculated in Euro and the measurement unit is in kg, litre and piece.

Figure 1 shows monthly Output Price Index from January to December 2007 for Total Output as well as for Crop- and Animal Output (November 2003 = 100).

In 2007 the annual index for Animal Output has decreased with 2.4 % compared with 2006. On the other hand, the index for Crop Output has increased with 16.1 % between 2006 and 2007. Total Output Index has also increased with 12.2 %.

4

4 - 1 Wheat – is domestic, 2 Barley for production of beer, 3 Maize – Hybrid 448, 4 Sunflower, 5 Hay produced in meadow, 6 Wheat straw (Stubble wheat), 7 Lucerne, 8 Cabbage (Hybrid 4), 9 Onions- second quality, 10 Pepper- variety Sombork, 11 Spinach- variety Matador, 12 Beans- second quality, 13 Tomatoes- variety Arleta, 14 Cucumber- variety Cornishon, 15 Watermelon– is domestic product, 16 Leek, 17 Garlic, 18 Potatoes- variety Condor, 19 Apple –variety Ida red, 20 Pear-variety autochthones, 21.Plums–variety Stanley, 22 Chestnuts – domestic product, 23 Grapes-variety Hamburg, 24 Live weight per 1kg for bulls and heifers aged 18-22 months domestic pedigree, 25 Live weight per 1kg for pigs aged 10-12 months domestic pedigree, 26 Live weight per 1kg for sheep domestic pedigree (white, mug) aged older than 12 months, 27 Hens– domestic (18 weeks old), 28 Milk –price for 1litre cow milk with 3.2% fat, 29 Honey domestic product, 30 Price for 30 pieces of eggs, medium class of quality

Methodology

Price indices in this publication have been calculated according standards for price statistics in European Union. The project for calculating these prices and price indices was conducted in the frame of the project of "Improving agro monetary statistics" in cooperation with Statistic Sweden and with financial support by Sida (Swedish International Development Cooperation Agency).

Prices have been collected since November, 2003 and are collected in seven regions: Peja, Pristina, Prizren, Ferizaj, Gjilan, Gjakova, and Mitrovica regions. Prices are collected around the 15th in every month.

Prices are collected for 44 products and measures prices that farmers receive for the production that are sold outside the sector.

Preliminary weights to calculate aggregated indices are mainly based on agriculture household survey 2002. In the future these weights should be obtained from the Economic Accounts for Agriculture (EAA).

Base month for the index calculations is November 2003 (Nov 2003=100).

Calculation of elementary Price Index

Calculations of elementary indices are in general done by using following formula, with un-weighted arithmetic mean price.

$$R_i^t = \frac{\frac{1}{n} \sum P_{ij}^t}{\frac{1}{n} \sum P_{ij}^o} \cdot 100$$

R_i^t – Elementary index for month t and product i

P – Collected price

i – Product i

j – Price j recorded for product (in general price for region)

t – Observed month

0 – Base month

Calculation of aggregated Price Index

Calculating aggregated index for total Output or subgroups of Output Index is done using following formula.

$$I^t = \sum R_i^t \cdot \frac{w_i^0}{\sum w_i^0}$$

I^t – Aggregated index for period t

w_i^0 – Weighting factor in base period for product i

i – Product i

t – Observed month

0 – Base month

Statistical Office of Kosova, a brief description

The Statistical Office of Kosova (SOK) is a professional office operating since 1948. The SOK passed through some of the historic phases and it has been structured by the state rule of that time. The SOK restarted its work on August 2, 1999, as an independent and professional office working in the frames of the Ministry of Public Services (MPS). The SOK is financed by the Kosovo Consolidated Budget and by donors for the various projects.

The Statistical Office of Kosovo acts pursuant the UNMIK Regulation 2001/14 that entered into force on July 2, 2001. A medium-term Master Plan is being developed for the statistical system of Kosovo compatible with the European Statistics.

The SOK Organization Structure; Composes of four productive departments (Department of Economic Statistics and National Accounts, Department of Population Statistics, Department of Social Statistics and Department of Agricultural and Environment Statistics), seven Regional Offices (located in Gjakova, Gjilan, Mitrovica, Peja, Prizren, Pristina and Ferizaj), two support departments (Department of Methodology and Information Technology and Department of Administration), as well as the Office of the Population Census.

Total number employees are 134, of them 96 (71.6%) within the SOK offices whilst 38 (28.4%) in regional offices.

There is also a support and cooperation with the international institutions.

The Statistical Office of Kosova covers Kosovo entirely. For implementation of the surveys in the field, the SOK uses appropriate sampling and methodology approach. In the collection of the reports from the reporting units, the SOK engages professionals, technicians, administrators and civilians from the local offices and regional field population census.

Recently, a team of national and international experts are working in the project of the population census.

SOK Mission is to fulfill the needs of the users with the reliable statistical data and with regular analyses in order to support government departments and to provide them with the proper information for decision-making process including other users in Kosova.
