Brief history

In the period of 1921-1939, Divorces have been collected primarily from religious institutions and very few from civil courts.

After 1951, data was collected by individual questionnaires, which were then processed and final data obtained, according to the permanent residence and the time when the event occurred.

After 1951, the data collected through individual questionnaires have been processed afterwards and resulted into **final** data, according to permanent residence and the time when the event occurred.

In January 2004, the Department of Population Statistics reactivates the remaining part of the Vital Statistics System (VSS) - divorces.

Source of data

Reporting units for Divorces are the Basic Courts in Kosovo.
