F o r e w o r d

Kosovo Agency of Statistics (KAS), the Department of Social Statistics (DSS), publishes basic data and some indicators on Births inside and outside Kosovo (abroad) for 2016.

The data in this publication are final and are the result of regular monthly surveys, while processing and publication of data is yearly.

Source of data for births are Civil Registers with No.2004/46 for Births. Reporting units are the Civil Status Offices (Registrars) of Kosovo.

Collection of the data was done through special statistical instruments: statistical questionnaire for births (DEM-1).

According to legal provisions on managing the registry books, cases of births are mandatory to register in the registry books at the place where the event (birth) occurred, regardless of the persons who are related to the event, if their permanent residence is in that place or somewhere else.

The results of demographic statistics for births are processed and published according to the principle of permanent/ordinary residence of the mother that, according to international rules, answers the concept of permanent population (resident) which principle is applied also in the case of the census.

When using this information published in this publication, the KAS Department of Social Statistics will accept suggestions, proposals and remarks which will help to enrich the content of this publication in the future.

Avni Kastrati –Director of the Department of Social Statistics

In preparation of the publication have contributed:

Arijeta Sojeva - Senior Officer for Vital Statistics
Sanije Uka - Senior Officer for Population Statistics
Elvira Tahiri – Officer for Population Statistics
Vjollca Berisha - Officer for Vital Statistics
Ahmet Cakolli – Officer for Design

 Questionnaire for cases of births DEM -1	 46

Brief history

Data on births during the years 1900-1912 were obtained through Turkish tefters' books, which were led through the special administrative offices and in religious institutions.

Also in the period of 1921-1939, the data for vital statistics were provided mainly through religious institutions (churches and mosques), a small portion is provided through the state civil registers.

After World War II, on May 9, 1946, the Law on State Register Books was approved, and this matter was carried in competencies of the state bodies.

Data collection was done on a monthly basis by clerks in a summarized review, for births, which contained only the total and gender. Collected monthly data were **preliminary** demographic results.

After 1951, demographic data were collected through individual questionnaires, processed afterwards in order to gain **final** data, according to permanent residence and the time when the event occurred.

Destruction of the Demographic Statistics System starts with the beginning of political disorder in Kosovo in 1989, while total destruction happened during the war in 1999, and continued with the disorder and collapse of many register offices and the liquidation and stealing-withdrawing many register books (in some municipalities also the register books from 1900) in Serbia.

The first attempts to start the operation of this institution are made at the end of 1999 when UNMIK establishes new civil register with new registry books and certificates.

In 2000, the priority was "Reactivation of the Vital Statistics System" planned in the Department of Population Statistics in KAS. General technical assistance was provided by the University of Montreal in Canada, and later by the Dutch government.

In August 2001 starts the collection of the data on births

After the war in 1999, demographic statistics initially were supported by CIDA (Canadian International Development Agency) for the first phase and the Dutch Government for the second phase – the UNFPA was as an executive agency of the project.

In December 2011 came into force the Law on Official Statistics of the Republic of Kosovo with No 04/L-036.

Source of data

Reporting units of data for Births are the Civil Status Offices.
Data are collected by special statistical questionnaire DEM-1.

According to legal provisions on managing the registry books, cases of births are mandatory to be registered in the registry books in the Civil Status Office where the event occurred, without considering that the persons with whom the event is related live in that place or somewhere else.

The results of demographic statistics are processed according to the principle of permanent residence of the mother of a child born. So the demographic statistical outcomes are processed according to the principle of permanent residence, which corresponds to the concept of permanent population (resident) applied in the population census.

This bulletin contains information about vital phenomena that occurred in 2016, presented in tabular form, nationally and according to municipality, according to characteristics such as age, gender, ethnicity, education, fertility, etc. which is also usually required in the population census, in the level of Kosovo, municipality and permanent residence.

Inclusion

The implementations of regulations on registration of vital events is of special importance - births in civil registers, in civil status offices.

Births:

Live birth

is the complete expulsion or extraction from its mother of a product of conception, irrespective of the duration of pregnancy, which, after such separation, breathes or shows any other evidence of life, such as beating of the heart, pulsation of the umbilical cord, or any definite movement of voluntary muscles, whether or not the umbilical cord has been cut or the placenta is attached.

Fetal death /stillbirths

A fetal death is death prior to the complete expulsion or extraction from its mother of a product of conception, irrespective of the duration of pregnancy, as indicated by the fact that after such expulsion or extraction the fetus does not breathe or show any evidence of life, such as beating of the heart, pulsation of the umbilical cord, or definite movement of voluntary muscles.

Based on information collected in this publication, in 2016, in Kosovo were registered 30410 births, of them birth that occurred in Kosovo were 23494, born live or alive were 23416, while 78 were fetal deaths of born dead, and births outside Kosovo were registered 6916, of them 6915 were live births and 1 fetal death.

Vital coefficient is 2.8 (ratio between live births and stillbirths in total). Coefficient of masculinity is 110.3

Coefficient of stillbirths per 1000 births was 3.3 per thousand live births (Births in Kosovo).

In medical institutions occurred 99.7% of births, while the rest occurred somewhere else.

The largest number of mothers who gave birth is the age group of 25-29 with 35.6%, 30-34 age group with 25.0%, 20-24 age group with 23.4%, and the other age groups constitute 17.0% of the total number of births.

The average age of women who gave birth in 2016 was 28 years.

The first child was born by 38.6% of mothers, 32.0% of mothers gave birth to the second child and 19.4% mothers gave birth to the third child, and so on.

According to the weight of the born child in medical institutions, the biggest number of infants is with weight 3000-3499 grams or 37.4%, 3500-3998 gr. 31.3%, 2500-2999 gr. 12.8% etc. Babies born live weighing less than 1000 grams make up only 0.2%.

For children born outside medical institution, according to the research methodology, the data are not required for their weight.

According to the educational level, mothers with secondary education compose 39.4%, primary school completed 29.3%, secondary not tertiary school and faculty participate with 23.3% etc.

The most frequent name for 2016 for Girls was the name, Alea 169, Sara 134, etc., while for Boys was the name Ajan 218, Noar 195, etc.

722 babies were born twins and triplets and more were born 30 babies.

Questionnaire for cases of births DEM -1

Kosovo Agency of Statistics

short description

Kosovo Agency of Statistics is a professional institution which deals with collection, processing and publication of official statistical data. As such acts since 1948 and has passed through several historical stages, structured according to state regulation of those times.

On 2 August 1999, the Agency has resumed his professional work (after nine years of interruption of all statistical series detrimental to the interest of Kosovo), as an independent institution under the Ministry of Public Administration. Since 12.12.2011 the Agency operates in the frames of the Prime Minister's Office. Office is funded by the Kosovo Consolidated Budget, but also by donors for specific projects and for technical professional support.

Kosovo Agency of Statistics acts according to the Law No. 04/L-036 which entered into force on 12.12.2011. Strategic development plan 2009-2013 is the middle term implementation for the development of statistical system in correlation with the European Union statistics (EUROSTAT).

Kosovo Agency of Statistics has this organizational structure: production departments; (Department of Economic statistics and National Accounts, Department of Agriculture and Environment statistics and Department of Social statistics. **Support Departments**; Department of Methodology and Information Technology, Department of Policy Planning, Coordination and Communication, Department of Census and survey and Department of Administration. **Within the Agency are also established Regional Offices**; Gjakove, Gjilan, Mitrovica, Peja, Prizren, Pristina and Ferizaj

Number of employees and budget are still limited. In KAS are employed in total 143 workers, of whom 98 (68,58 %) at the headquarters of the Agency, while in the Regional Offices, 45 (31,5%). Agency's educational qualifying structure is as follows: 61,7% with university education, 15,4% with with non-tertiary education, and 17,5% with secondary education.

We have professional and technical cooperation with all Ministries of the Government of Kosovo, especially with the Ministry of Economy and Finance, Central Bank of Kosovo, with international institutions, EUROSTAT, International Monetary Fund, World Bank, Sweden's SIDA, DFID, UNFPA, UNDP, UNIVEF, and with the statistical institutions of the countries in the region.

Kosovo Agency of Statistics almost completely covers the territory of Kosovo, based on the statistical structure of the enumeration areas as the basic unit and sole in the country from which it gets first hand information. All surveys conducted in the field use the extension of the samples in these enumeration areas but also a statistical methodology according to international recommendations. During the collection of statistical data and reports from reporting entities are involved professionals, technicians, administrators, servants of the country offices, field enumerators from regional offices, etc.

In 2011, the project of Population Census , Households and Dwellings was successfully implemented, and in 2014 was successfully carried out the Agriculture Census. The result obtained from these censuses will have an important role in the development policies.

The mission of the Agency; to meet the needs of users with qualitative statistical data, objective, in time and space so that users have reliable base to conduct regular analysis in the interest of planning and project development at the municipal and country level. To support government institutions, scientific institutes, research academies, businesses in order to provide proper information for decision-makers and other users in Kosovo.
