Series 5: Social Statistics

Labour Force Survey Q1 2018

Foreword

The purpose of the Labour Force Survey (LFS) in Kosovo is to provide statistical data on statistical indicators of the labour market and facilitate their comparison with previous years. Labour Force Survey includes 598 Enumeration Areas (EAs) in the entire territory of Kosovo.

Report of LFS in the first quarter of 2018 contains information on employment and unemployment according to age, gender, employment status, economic activity, occupation and other areas of the labour market.

In the first quarter of 2018, the employment rate is 28.8 %, the unemployment rate is 26.5 % while the inactivity rate is 60.8 %.

LFS data indicate that the percentage of people employed part-time in the first quarter of this year is 4.2 %. Self-employment (as a percentage of employees) for the quarter was 21.1 %. Percentage of employees in unstable jobs (persons who are self-employed and have no employees and those who work without pay in a family business) was 19.8 %. Trade, manufacturing, construction and education continue to employ almost half of employed persons.

Regarding the participation in the workforce which was 39.2 % in this period, the number of females belonging to the labour force was 16.6 % and 61.4 % was for males.

The unemployment rate among young people is 54.0 %.

Long-term unemployment of young people (age 15-19) who have been unemployed for more than 12 months for this quarter was 38.6 %.

The percentage of young people who are not employed nor in education or training - NEET (respondents aged 15-24) is 31.1 %.

KAS thank the participants and other stakeholders, especially its staff in the implementation of LFS first quarter of 2018. At the same time, KAS informs all users of official statistics that KAS, within budget opportunities, is continuously making capacity building efforts to publish stable and more quality statistics.

According to the Law on Official Statistics, No. 04/L-034, the Kosovo Agency of Statistics is responsible for the production of official statistics in the Republic of Kosovo, therefore, when using this data, the source shall be cited.

Comments, remarks, suggestions and proposals regarding this publication are welcome and can be sent to email address: social@rks-gov.net

Introduction

Kosovo Agency of Statistics (KAS) has started the implementation of the Labour Force Survey (LFS) in 2001, and has continued as an annual survey until 2009. Due to the preparation of the Population Census, the Labour Force Survey (LFS) was not conducted in 2010 and 2011.

Since 2012, Labour Force Survey (LFS) is developed according to Eurostat methodology as the continued survey (52 calendar weeks – reference weeks), as well as:

- Revised questionnaire (following the Eurostat guidelines)
- New sample frame (based on the Population, Households and Dwellings Census in Kosovo 2011)
- Longitudinal sub-sample, where each household selected is interviewed four times (once in three months, the first time in the selected household is the Survey and three following interviews are Re-surveys that tracks eventual changes of indicators, in that household selected from quarter to quarter)
- Interview of the households was conducted via laptop, through the methods CAPI – Computer Assistance Personal Interviewing, which enables faster generation of data than through the PAPI method, respectively through the traditional method of data collection through interview with paper and pencil, which are entered to the computer.

The main objectives of LFS are collection of information mainly on the supply side of the labour market, i.e. information on those who are working or actively looking for a job.

Acknowledgements

Since 2014, the LFS is realized with KAS budget. We express our gratitude to the hard work of the heads of regional offices of KAS, who supervised the field work, and to the families who have shared their time and provided data by helping in this way the collection of such detailed information.

Definitions

The working age population includes people aged 15 to 64 years. This measure is used to give an estimate of the total number of potential workers within the economy.

The workforce consists of employed and unemployed persons, according to precise definitions given below. Inactive persons are not considered part of the workforce.

1. **Employed:** persons who during the reference week did any work for pay, profit or family gain, in cash or in kind, or who were temporarily absent in their work.
2. **Unemployed:** persons who during the reference week:
 - Were without work, i.e. they were not in paid employment or self-employed;
 - Were currently available for work, i.e. they were willing to start paying job or self-employment within two weeks; and
 - Seeking work, i.e. they had taken specific steps during the past four weeks in search of paid employment or self-employment.
3. **Inactive persons:** persons who during the reference period were neither employed nor unemployed.

Classification of the population in these three above categories depends on the application of the principle of activity - what did the person do actually during the reference week - and a set of priority rules on activities that give priority to employment over unemployment and unemployment on economic inactivity. Classification also depends on a clear understanding of which activities are considered as "employment".

The participation rate in the workforce is the percentage of the working age population of a country that engages actively in the labour market (employed or unemployed). The labour force (employed and unemployed) to the working age population, expressed as a percentage is:

$$\text{Participation rate in the workforce} = \frac{\text{Employed} + \text{Unemployed}}{\text{Working age population}} \times 100$$

The inactivity rate is the percentage of the working age population of a country that is not part of the labor force (neither employed nor unemployed). When put together, the rate of inactivity rate and participation in the workforce give result of 100 percent.

Employment to population ratio, also known as the employment rate, is the percentage of the working age population of a country that is employed.

$$\text{Employment to population ratio} = \frac{\text{Employed population}}{\text{Working age population}} \times 100$$

The unemployment rate is the percentage of the labour force that is unemployed. Workforce is defined as the basis for this indicator and not the working age population.

$$\text{Unemployment rate} = \frac{\text{Unemployed}}{\text{Labour Force}} \times 100$$

Discouraged workers are persons who do not have jobs, who are currently available for work but have given up looking for work because they believe that they can not find work. This category of discouraged persons is included in the inactive population category.

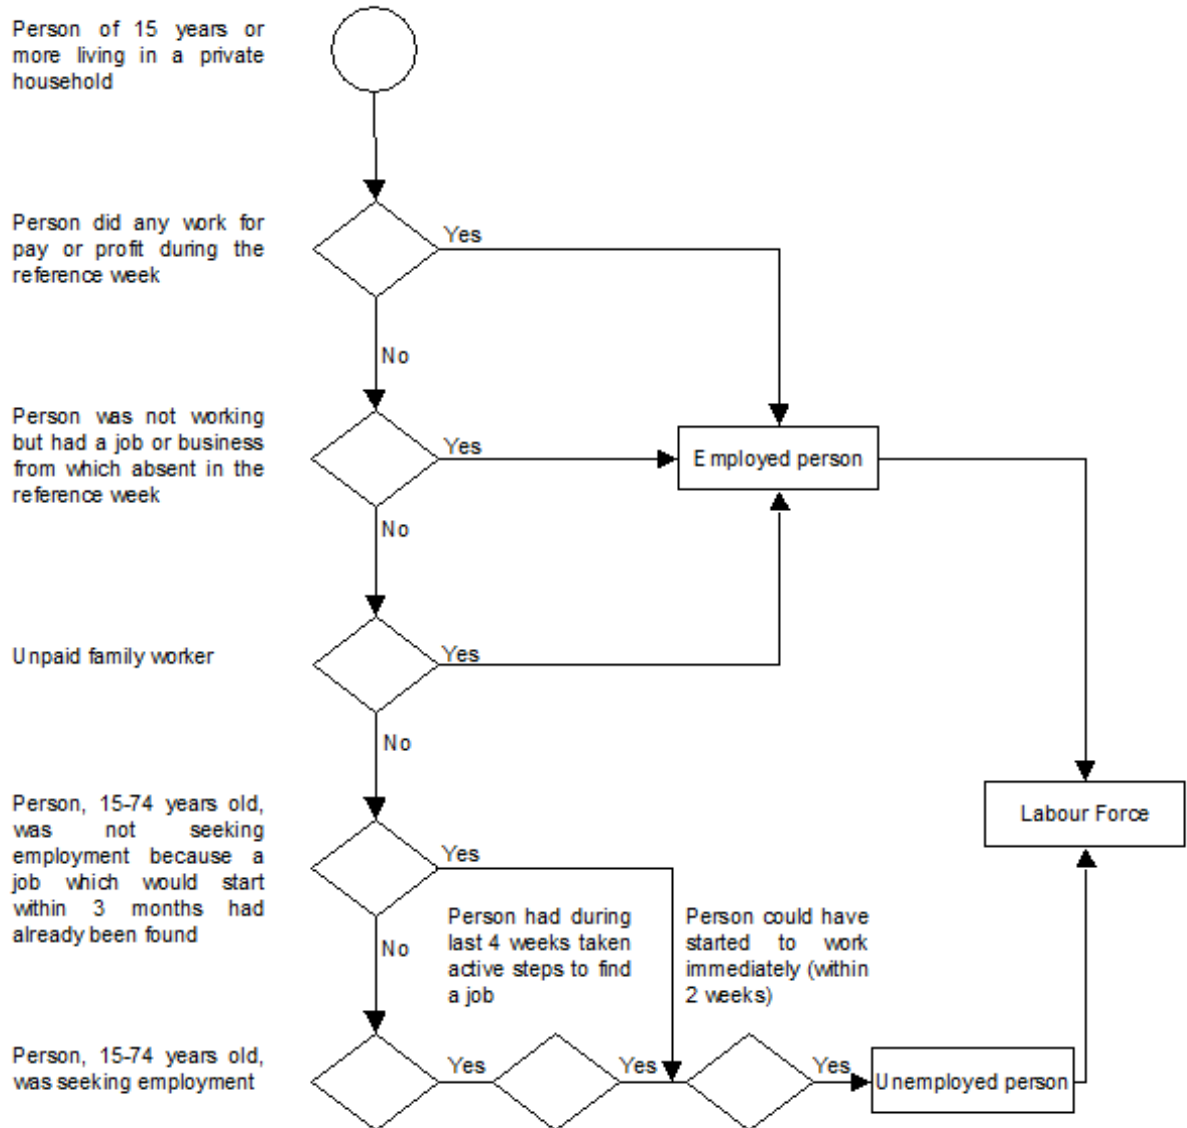

Youth unemployment refers to the unemployment rate of persons aged 15-24 years.

NEET form part of young people (age 15-24) who are neither employed nor attending school nor not even training.

Unstable employment refers to self-employed persons who have no employed persons or unpaid family workers. These kind of employees are less likely to have formal work arrangements and more likely for lacking appropriate working conditions.

The diagram below illustrates the criteria used for classification of the population in working age as employed, unemployed or inactive.

Graph. 1: Classification of the workforce in the Labour Force Survey of the European Union

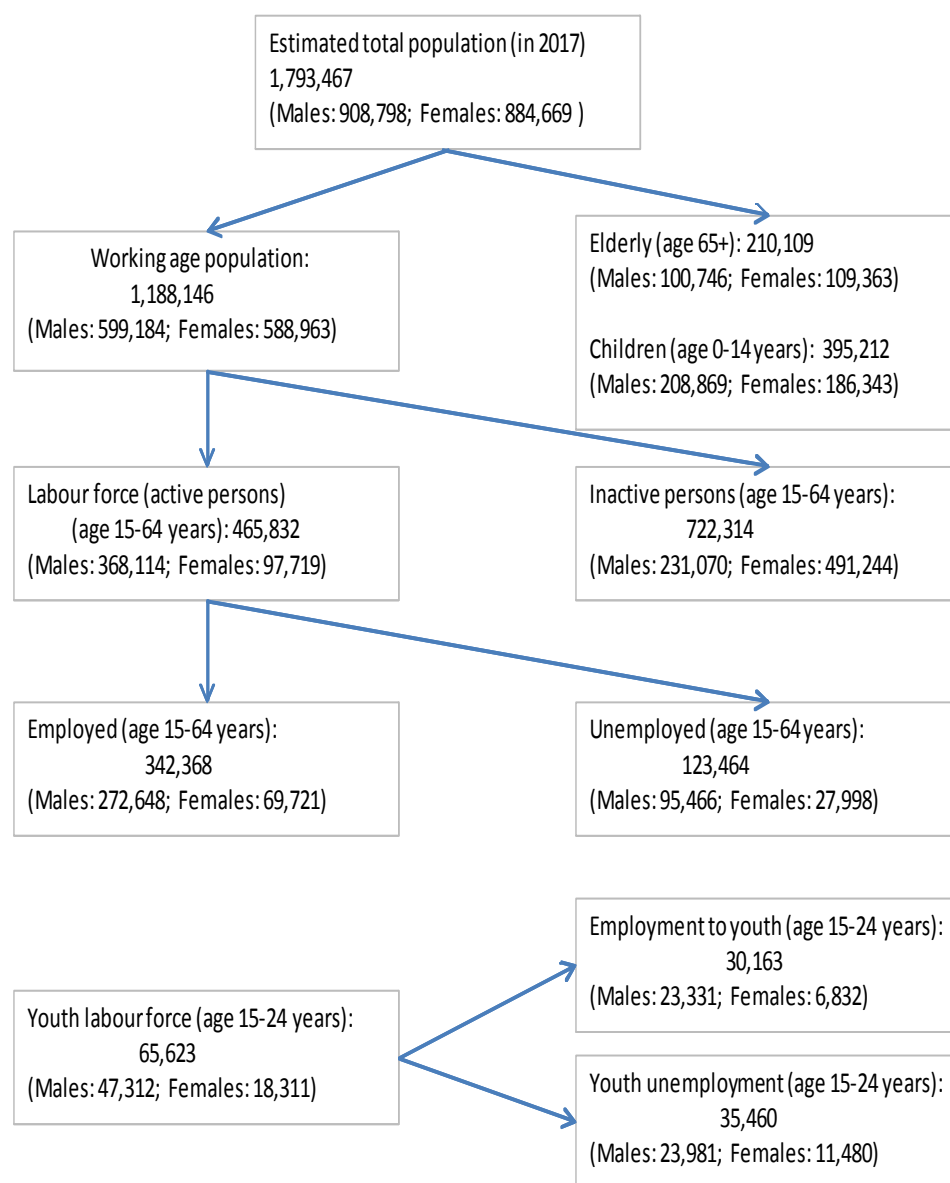

Key indicators

Graph 1 presents a summary of the state of the labour market of Kosovo's population based on the Labour Force Survey in the first quarter 2018. Among the main results of the LFS in the first quarter of 2018, as shown in Graph 1 and elaborated further in this report, are:

- Almost two thirds of Kosovo's population is of working age (age 15-64). It is expected that the working age population to increase rapidly over the next decade as Kosovo is among the countries with the youngest population in Europe.
- Of the working age population, 60.8 % are not economically active, which means that they are not employed and have not been active in search of employment during the past four weeks and / or are not ready to start working within two weeks.
- From 39.2 % of the population that is economically active, 26.5 % (123,464 persons) are unemployed. This means that 60.8 % (342,368) of economically active persons are employed, by creating an employment to population ratio (employment rate) of 28.8 %.
- 60.8 % of the working age population is inactive.
- There are significant gender differences in all labour market.
- One in five (16.6 %) females of working age are active in the labour market, compared with about three-fifths (61.4 %) of working-age males
- Among persons in the labour force, unemployment is higher for females than for males (28.7 % compared to 25.9 %).
- The employment rate among working age females is only 11.8 %, compared with 45.5 % for males.
- This very low degree of unemployment among females stems from the combination of very low participation in the labour force and high unemployment.
- Females were mainly employed in the education, health and trade sectors (51.2 % of employed females). Males were mainly employed in the sectors of trade, construction, and manufacture (employing 42.4 % of employed males).
- Youth unemployment is very high in Kosovo
- In the first quarter of 2018, young people in Kosovo had two times more likely to be unemployed than adults. Among persons aged 15-24 in the labour force, 54.0 % were unemployed.

- Unemployment is higher among young females (62.7 %) than young males (50.7%).
- Nearly one-third (31.1 %) of those aged 15 to 24 years in Kosovo were not in education, employment or training (NEET). This figure is 31.0 % for young females compared with 31.2 % for young males.
- Most of those employees reporting to work fulltime.
- 95.8 % of respondents reported working full time in their main job.
- The reasons for working part-time differ between the genders, as females, taking on the role of care within the family, reduce the hours available for employment.
- The number one reason for males not working full time, was the lack of a full-time job.
- 19.8 % of employed people belonged to the category of unstable employment. This means that they are either employed in their business (own-account workers), or contribute to a family business (paid or unpaid).
- Only 18.9 % of employed persons had a permanent contract in their main job, while 81.1 % had temporary contracts, no significant differences between males and females. People who had temporary contracts were asked why they had this kind of contract and 75.8 % of respondents reported that there was no other available contract.
- Net salaries of most employees were between € 300 to € 400 per month. Gender differences were observed with 5.9% higher for males than for females.

Percentage of unstable employment to total employment	20,2	17,9	19,8

1. Employment

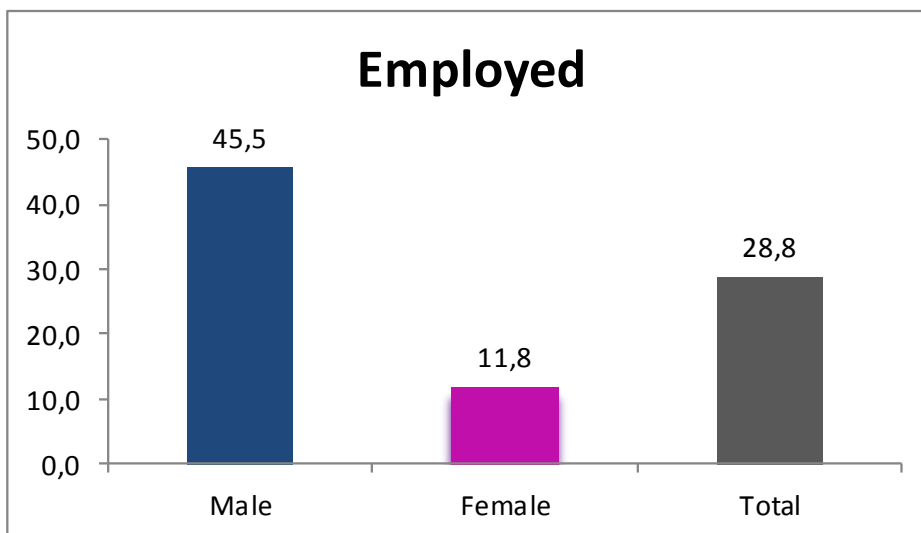

1.1: Employment by gender

Out of the entire population of working age, 28.8 % were employed. The employment rate was higher for males than for females: 45.5 % of males of working age were employed compared to 11.8 % of females of working age.

Compared with the previous LFS (Q3 2017) in Kosovo, there is a drop by 0.1 % in employment rate, where this decrease to males was 1.3% while to females the decrease was by 0.7%.

Compared with the same period last year (Q1 2017) of LFS in Kosovo, we have decreased the employment rate by 0.1%, where this decrease in females was 1.2% while to males we have an increase by 0.9%.

Graph. 1.1: Employment rate by gender

1.2: Employment by age group and educational level

The employment rate in the age group was highest among persons aged between 35-44 years (41.0 %) and lowest among youth (15-24 years) (9.0 %).

The employment rate for females for the age group 25-54 ranges from 13.9% to 16.4%. In the age group 25-34, the employment rate is 14.8%, with a 1.4 % increase in the age group 35-44 (16.4%) and a decrease by 2.5 % compared to the age group 45-54 years (13.9%). While females employed in the young age group (15-24 years) were only 4.4 % while in the age group (55-64 years) were 11.9%.

To males (Table 1.1), the employment rate was highest for the age group 35 to 44 (69.9%), followed by the age group 45 to 54 (68.6%) and the lowest for young people (13.0%).

Tab.1.1: Number of employees and employment rate by gender and age group

Kosovo	Male	Female	Total
EMPLOYMENT (IN THOUSAND)			
15-24	23,3	6,8	30,2
25-34	57,6	15,7	73,3
35-44	78,2	21,6	99,7
45-54	74,5	16,1	90,6
55-64	39,0	9,6	48,6
15-64	272,6	69,7	342,4
Employment to population ratio (%)			
15-24	13,0	4,4	9,0
25-34	47,1	14,8	32,1
35-44	69,9	16,4	41,0
45-54	68,6	13,9	40,4
55-64	51,0	11,9	31,0
15-64	45,5	11,8	28,8

Tab. 1.2: Employment by educational level

Kosovo	Male	Female	Total
EMPLOYMENT (IN THOUSAND)			
No formal education	0,3	0,4	0,7
Primary	36,5	9,4	45,9
Secondary education, vocational	99,5	17,9	117,5

Secondary education,	20,9	17,9	27,3	30,5
Tertiary	57,5	58,0	15,4	16,1
Total	100,0	100,0	100,0	100,0

Table 1.3 shows that the requirements for jobs are higher for government positions, where over half of all employees (59.9%) have completed higher education.

1.3: Employment status

In the first quarter of 2018, 72.6% of employed persons were employees, 7.7% were self-employed and had other employees, 13.4% were self-employed with no other employees and 6.3% were family workers (Table 1.4). The majority of employed females had the status of employees (79.4% compared with 70.9% for males).

Tab. 1.4: Employment status by gender (%)

Kosovo	Male	Female	Total
Employment Status (%)			
Employee	70,9	79,4	72,6
Self-employed with employees	9,0	2,7	7,7
Self-employed without employees	13,9	11,5	13,4
Unpaid family worker	6,3	6,5	6,3
Total	100,0	100,0	100,0

1.4: Unstable employment

Besides the low level of employment in Kosovo, 19.8 % of employed persons worked in unstable jobs. Workers in unstable jobs are either self-employed people without employees or those who work without pay in a family business. These two groups of workers are likely lower to have a formal work agreement compared to workers with pay and salary.

Males are more likely to hold such unstable jobs (20.2 % of employed males compared with 17.9% of employed females). Expressed in absolute numbers, 67,705 of 342,368 employees belong to the category of unstable employment (Table 1.5). Employees in occupational areas are less likely to be employed in unstable jobs (Table 1.6), as well as persons with higher level of education (Table 1.7).

Tab. 1.5: Unstable employment by gender

Total	100,0	100,0	100,0

1.5: Types of contracts

Regarding the type of contract that the interviewed employees had, the majority (87.6%) had an individual contract, while the rest worked without a contract. For young adults (age 15 to 24 years), the percentage of those who worked without contracts was 31.5 %.

From people who have an employment contract, only 18.9 % had a permanent contract for their main job, while 81.1% had temporary contracts. The figures are similar for males and females. People who have temporary contracts were asked why they had this kind of contract and 75.8 % of respondents reported that there was no other contract type available.

When asked if they had their rights in their main job, to benefit from social security scheme at work, the survey data showed that only 12.9 % of employees had this right.

1.6: Employment by activity

Trade, construction, education and manufacturing employ more than half of employed persons in the first quarter of 2018 (see Tables 1.8 and 1.9). Trade employ 17.2%, continuing with construction with 11.7%, education with 11.5 %, and manufacturing with 10.1% of employed persons in Kosovo.

Education, trade, and health care were the three leading female employers (employing 51.2% of employed females). , Trade, construction, and manufacturing sectors are the most common occupations for males (employing 42.4% of employed males).

1.7: Employment by occupation

In the first quarter of 2018, most of the employees were working in positions of service and sales, in elementary occupations, as professionals and craft workers (Table 1.10).

Almost half of employed females were professional, technical and related occupations with (40.1%), 21.9% were in services and sales and 9.0% in elementary occupations. Males were distributed across sectors, but most were employed in service and sales (26.4%), 15.0% as craft workers and work related, in elementary occupations (18.5%) and 13.9% were professionals (Table 1.10).

Tab. 1.10: Employment by occupation and gender (in %)

Kosovo (age 15 and over)	Male	Female	Total
EMPLOYMENT BY OCCUPATION (IN THOUSAND)			
Legislators, senior officials and managers	19,7	5,9	25,6

* From this quarter onwards for employees by occupations will be used the new classification of occupations "Classification of occupations 08".

1.8: Employment models

Only 0.1 % of the employed population reported that they had a second job during the reference week.

In their main job, 95.8% of respondents reported working full time and 4.2% part-time. Gender differences were observed, with females more likely to work part-time (5.2% compared with 4.0%).

For those who do part-time work, reasons differed between the genders, females take a greater role in family care thus reducing the hours available for work (Table 1.11). The number one reason for males not working full time was the lack of availability of full-time work.

Tab. 1.11: Reasons for working part-time by gender (%)

Kosovëo	Male	Female	Total
Caring for children or adults with disabilities	0,9	2,6	1,2
Disability or illness	1,8	0,0	1,4
Other personal or family reasons	1,4	41,9	9,3

Does not want a full-time job	1,1	0,0	0,9
Other reason	1,3	6,1	2,3
Total	100,0	100,0	100,0

Approximately three-fifths of the employees have worked between 40-48 hours a week. Almost two-tenths (12.5%) of employees have worked 60 or more hours per week. Within a week, 12.2 % of employees worked less than 40 hours.

Males tend to work longer hours than females, 22.2 % of males work more than 48 hours a week compared with 5.2 % of females (Table 1.12). A greater proportion of employed females (13.9%) worked less than 40 hours compared with 11.7 % of males.

Tab. 1.12: Employment by hours of work per week and by gender

Kosovo	Male	Female	Total
EMPLOYMENT BY THE NUMBER OF HOURS (IN THOUSAND)

1.9: Net monthly salary

The net wages of the majority of employees were between 300 € and 400 € per month. Gender differences were observed with 5.9% higher for males than for females.

Graph. 1.2: Net monthly salary for employees by gender

2. Unemployment

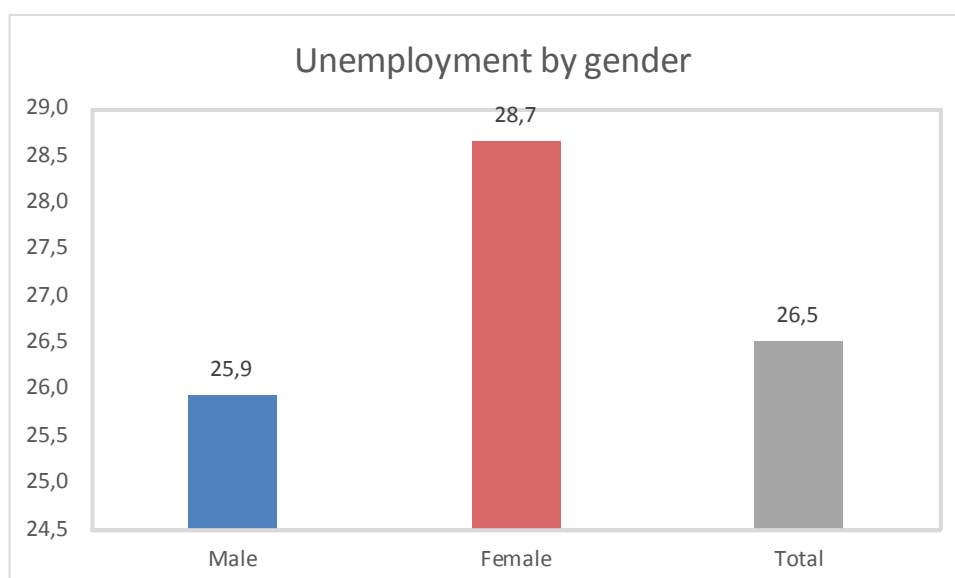

2.1: Unemployment by gender

According to the first quarter of LFS 2018, in Kosovo there were 123,464 persons aged 15-64 years who were unemployed, 95,466 of whom were males and 27,998 females (Table 2.1). The unemployment rate was 26.5 %, higher for females than for males, respectively 28.7% and 25.9 % (Graph. 2.1).

Compared with the previous quarter of LFS 2017 (Q4 2017), in Kosovo we have decreased the unemployment rate by 4.1%, where for males was 2.8% and for females there is a decrease by 8.4%.

Compared with the same period last year (Q1 2017) of LFS, in Kosovo there is a decrease in unemployment rate of 4.0%, where this decrease in males was 3.4% while in females the decrease was 5.9%.

Graph. 2.1: Unemployment rate by gender

Tab. 2.1: Number of unemployed and unemployment rate by gender

Kosovo	Male	Female	Total
UNEMPLOYMENT (IN THOUSAND)			
15-64	95,5	28,0	123,5
UNEMPLOYMENT RATE (%)			
15-64	25,9	28,7	26,5

2.2: Unemployment by age group and educational level

The new population in Kosovo has a very high unemployment rate of 54.0% (Table 2.2). As for other age groups, the lowest rate of unemployment has been observed among people aged 55-64 (9.5%).

Tab. 2.2. Number of unemployed and unemployment rate by gender and age group

Kosovo	Male	Female	Total
UNEMPLOYMENT (IN THOUSAND)			
15-24	24,0	11,5	35,5
25-34	35,3	10,4	45,7
35-44	19,5	4,1	23,6
45-54	11,9	1,7	13,6
55-64	4,8	0,3	5,1
15-64	95,5	28,0	123,5
UNEMPLOYMENT RATE (%)			
15-24	50,7	62,7	54,0
25-34	38,0	39,9	38,4
35-44	20,0	16,0	19,1
45-54	13,8	9,4	13,1
55-64	10,9	3,5	9,5
15-64	25,9	28,7	26,5

The unemployment rate was highest for people without formal education (48.4% of this group were unemployed) and lowest for persons who had completed higher education (14.6%).

Table 2.3. Number of unemployed and the unemployment rate by educational level and gender

Kosovo	Male	Female	Total
UNEMPLOYMENT (IN THOUSAND)			
No formal education	0,7	0,0	0,7
Primary	21,5	3,4	24,8
Secondary vocational education	47,7	11,7	59,4
Secondary education, gymnasium	15,6	6,8	22,4
Tertiary	10,0	6,1	16,1
Total	95,5	28,0	123,5
UNEMPLOYMENT RATE (%)			
No formal education	69,7	0,0	48,4
Primary	37,1	26,3	35,1
Secondary education, vocational	32,4	39,5	33,6
Secondary education, gymnasium	17,1	43,6	21,0
Tertiary	14,1	15,5	14,6
Total	25,9	28,7	26,5

Education has improved prospects in the labour market, especially for males, since 69.7 % of males without formal education were unemployed, compared with 14.1 % of those who had completed tertiary education.

2.3: Youth unemployment

Based on the first quarter of LFS 2018, 28.7 % of the unemployed in Kosovo were young people (aged 15-24 years) with 15.9 point difference between males and females.

A significant proportion of the young population is unemployed (54.0%) and youth unemployment among females is higher (62.7 %) compared to males (50.7%).

Tab. 2.4: Percentage of unemployed youth in total unemployment and unemployment rate among young people by gender

Kosovo	Male	Female	Total
Percentage of unemployed youth in total unemployment (%)	25,1	41,0	28,7
Percentage of youth as unemployed in young population (%)	50,7	62,7	54,0

In the first quarter of 2018, young people in Kosovo were two times more likely to be unemployed compared to adults, with figures almost similar for males and females (Table 2.5).

Tab. 2.5: Unemployment rate of young people to adults, by gender

Kosovo	Male	Female	Total
The rate of youth unemployment to adult unemployment	2,3	3,0	2,5

2.4: Duration of unemployment

Unemployed respondents were asked how long are unemployed. A large number (62.9%) of the unemployed reported that they are unemployed for longer than 12 months. Small differences were observed according to gender (65.1% males and 55.5% females).

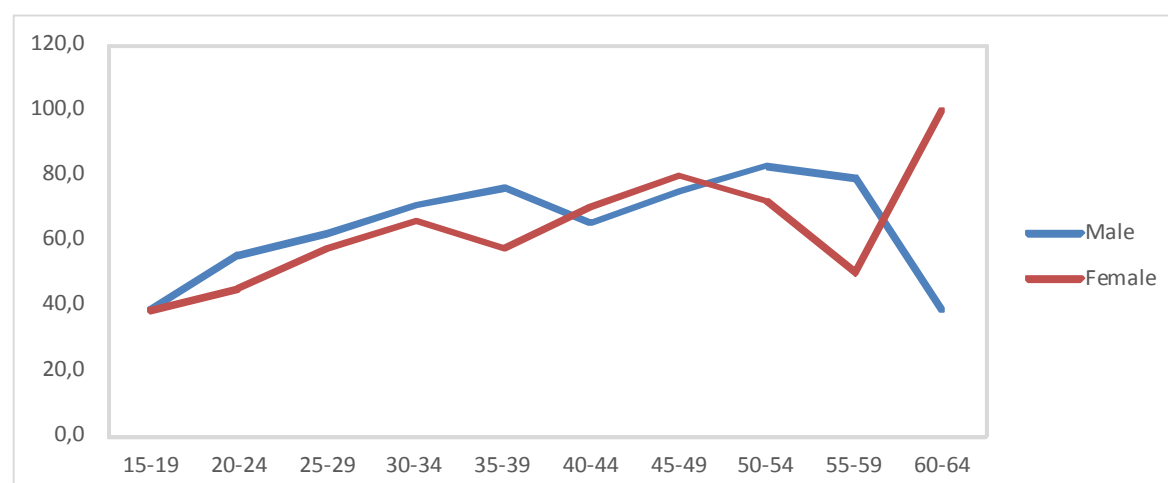

(Table 2.6) shows that the likelihood of being unemployed for more than a year increased with age.

Table 2.6: Duration of unemployment for more than a year by age group and gender (%)

Kosovo	Male	Female	Total
15-19	38,6	38,5	38,6
20-24	55,3	45,4	52,0
25-29	62,3	57,5	61,2
30-34	70,7	65,7	69,5
35-39	76,0	57,5	72,8
40-44	64,9	69,8	65,8
45-49	74,9	79,6	75,6
50-54	82,7	71,8	81,8
55-59	79,1	50,0	77,8
60-64	38,8	100,0	51,9
Total	65,1	55,4	62,9

Graph 2.2 shows that the age group 30-34, although young, female unemployment for more than a year reaches 65.7% compared with 70.7 % for males.

Graph. 2.2. Duration of unemployment for more than a year by age group and gender (%)

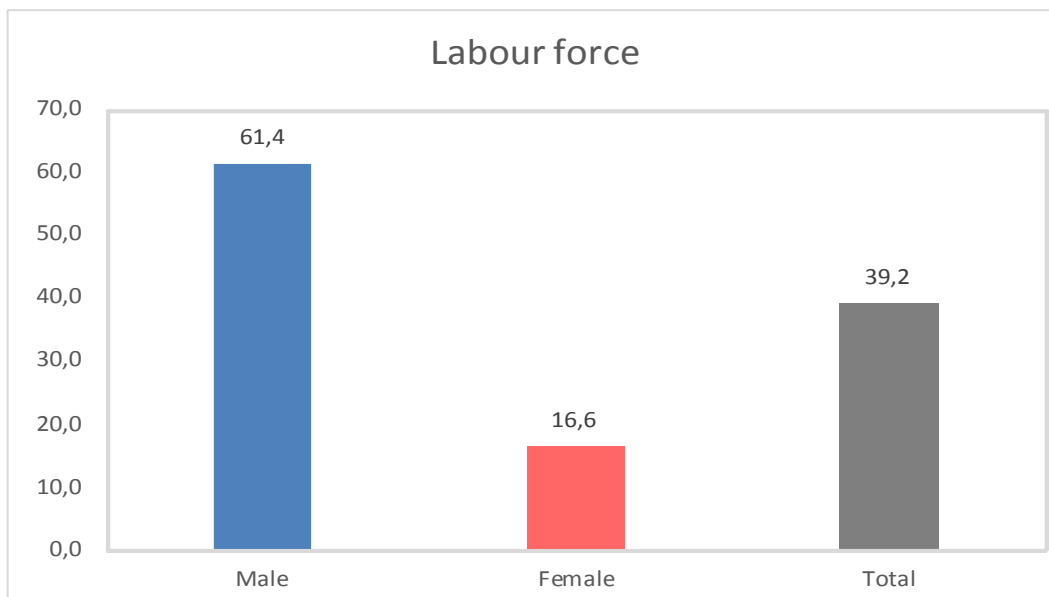

3. Participation in the work force

In the first quarter of 2018, out of the total estimated population of 1,793,467, the total population of working age (15 to 64) was 1,188,146 people. 39.2% of people of working age participate in the labour force (economically active). This means that they were either employed or unemployed (but actively looking for work and available for work). The remaining 60.8% were economically inactive (Graph. 4.1). Economically inactive persons include students, housewives, discouraged workers and others who were not actively looking for a job and this category is examined in more detail in the next chapter.

Compared with the previous quarter of LFS (Q4 2017) in Kosovo, we have a decrease in the workforce participation rate by 3.7%, where this decrease for males was 4.3%, whereas for females this decrease was 3.3%.

Compared to the same period last year of LFS (Q1 2017) in Kosovo, there is a decrease of the participation rate in the workforce by 2.5%, where this decrease for males was 1.7% while for females was 3.2%.

Graph. 3.1: Participation rate in the labour force by gender

Graph 3.1 clarifies that labor force participation among females was much lower than among males: 16.6% of females were active compared to 61.4% of males.

The rate of participation in the workforce was highest among people aged 30-34 (54.4%) and the lowest among people aged 15 to 19 with 6.2% (Table 3.1). The low participation rate of young people is not surprising as most of this group attend school.

Males aged 40-44 years had higher participation rates (89.2%), while for females the highest rate was in the age group 30-34 years (25.6%) (Table 3.1).

Tab. 3.1: Labour force and the participation rate in the labour force by gender and age group

Kosovo	Male	Female	Total
Labour force (in thousand)			
15-19	7,8	3,4	11,1
20-24	39,5	14,9	54,5
25-29	50,7	13,9	64,5
30-34	42,3	12,2	54,5
35-39	46,1	12,7	58,8
40-44	51,6	13,0	64,6
45-49	47,9	9,7	57,6
50-54	38,5	8,1	46,6
55-59	29,2	5,7	34,9
60-64	14,6	4,2	18,7
Total 15 - 64	368,1	97,7	465,8
Rate of participation in labour force (%)			
15-19	8,1	4,0	6,2
20-24	46,8	21,1	35,1
25-29	72,5	23,8	50,4
30-34	80,7	25,6	54,4
35-39	85,4	20,5	50,7
40-44	89,2	18,8	50,8
45-49	84,0	15,9	48,7
50-54	74,8	14,8	44,0
55-59	64,8	13,2	39,5
60-64	46,4	11,3	27,4
Total 15 - 64	61,4	16,6	39,2

4. Inactive persons

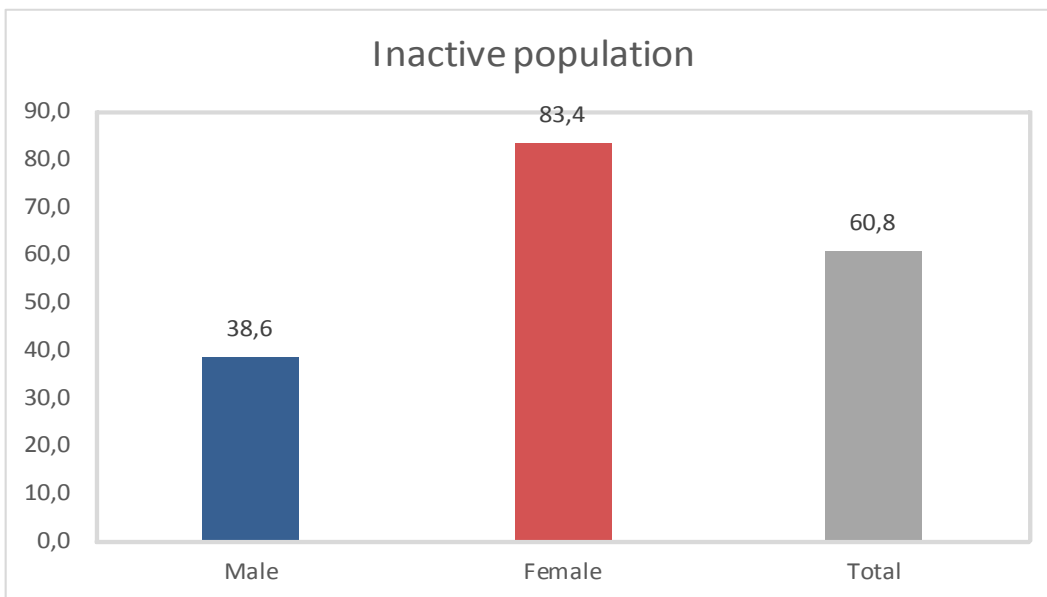

Special attention is paid to the description and estimation of the employed population and the unemployed, which together comprise the Labour Force (or economically active persons). However, the category of "inactive" is equally important. Changes in activity rates are an important part of labour supply impact on potential economic growth. This is due to the large number of potential workers among those currently inactive.

Compared with the previous LFS (Q4 2017) in Kosovo, there is an increase of inactivity rate by 3.7%, where this increase for males 4.3%, whereas for females this increase was 3.3%.

Compared with the same period last year of LFS (Q1 2017) in Kosovo, there is an increase of inactivity rate by 2.5%, where this increase for males was 1.7% while for females was 3.2%.

Graph. 4.1 clarifies that the largest participation is among females than among males: 83.4% of females were inactive compared to 38.6% of males.

Graph 4.1: Inactive participation rate by gender

4.1: Inactive young people not in education, employment, or training (NEET)

The youth of this group (NEET) involves young people who are unemployed, not in school, nor trained, i.e. they are completely detached from the labour market and does not participate neither in the education system. High rates of this group in the population of young people raise concerns about youth employment in the future as it indicates detachment from the labour market. In addition, a large number of young people not engaged in countries with high unemployment of young people, such as Kosovo, can cause reduced profits due to increased competition, and has the opportunity to contribute to social problems.

In the first quarter of 2018, 104,591 of young people (aged 15 to 24) in Kosovo do not attend school, were not employed or in training, and account for 31.1 % of the young population. Part of NEET for females is 31.0% compared with 31.2% of males (Table 4.2).

Tab 4.1: Young people who are not employed, do not attend school or training (NEET) by gender

Kosovo	Male	Female	Total
Youth NEET (in thousand)	56,2	48,4	104,6
Percentage of youth NEET in young population (%)	31,2	31,0	31,1

5. Demographic and economic dependency ratios

Presented in Table 5.1 are three levels of economic dependency (data presented as the proportion of dependents per 100 out of working-age population):

- The degree of dependence of young people (respondents aged under 15 / respondents aged 15-64)
- The dependency of the elderly (respondents aged 65 + / respondents aged 15-64)
- The age dependency ratio (the respondents younger than 15 or older than 64 / respondents aged 15-64).

Tab 5.1: Demographic dependency ratios

Kosovo 2018	Rate of youth dependency	Rate of elderly dependency	Rate of age dependency
Q1 2018	33%	18%	51%

Another level used often, particularly in the publications of Eurostat, the degree of effective economic dependency of the elderly. This is an important indicator for assessing the potential impact of age on the social costs related to employment (pensions, etc.). This indicator is calculated as the ratio between the population aged 65+ (all classified as inactive) and total employment. For this report, Eurostat has determined the age range of employees from 20 to 64 years. According to projections, this indicator will increase to 68% in 2060 to EU28. In Kosovo, this ratio was 51 % in the first quarter of 2018.

Tab 5.2: Economic dependency ratios

Kosovo 2018	Effective economic dependency ratio of the elderly	Total rate of economic dependence
Q1 2018	62%	275%

The total economic dependence rate is calculated as the ratio between the total inactive population (15+) and employment (age 20-64). It measures the average number of persons aged 15 years and over, that "support" each employee. This ratio was 275% in the first quarter of 2018.

According to projections, by 2023 the ratio will continue to rise in the EU, at 122.2% in 2023 and 141.6% in 2060.

6. Data accuracy

The reliability and accuracy of the Labor Force Survey (LFS) outcomes is dependent on the lack of responses during the interview process, data processing errors, and during design and sample selection.

The odd effect due to sampling means that the results calculated from different samples deviate somewhat from each other. Employed and unemployed figures that are derived based on a larger and more representative sample are more accurate than those based on smaller samples.

Non-accuracy due to design and sample selection is assessed by the standard error of estimation. The size of the standard error is influenced by the size of the sample and variance of the variables that are the subject of the study. The standard error can be used to calculate the confidence interval within which the value of the population stands at a certain probability. The country-wide estimation of the number of unemployed based on LFS for the first quarter of 2018 is 26.5% and its standard error is 0.9% while the confidence interval for the number of unemployed is (24.7%; 28.4%).

Tab. 6: Accuracy of LFS-based estimates in the first quarter of 2018 at country level

Kosovo Q1	Quarterly estimates (%)	Standard error	Reliability Interval 95%		Variation coefficient (%)
			Low	High	
Employment rate	28,8	0,5	27,9	29,7	1,6
Unemployment rate	26,5	0,9	24,7	28,4	3,6
Rate of participation in the workforce	39,2	0,5	38,3	40,1	1,2

The accuracy of the ratings is presented based on their standard error. The standard error (square root of sample variance) describes how accurately the value of the parameter estimated by the sample is concentrated around the population parameter.

The main reliability figures derived from the standard error are the confidence intervals and the relative standard error (coefficient of variation). The confidence interval describes the width at which the real value of the parameter is in relation to the estimate calculated by the sample. When you calculate the confidence interval, the desired risk level is fixed. The 5% risk level applied to the workforce survey means that if the samples are retracted, in 95 cases out of a hundred, the real value of the parameter would be within the confidence interval and in 5 cases out of a hundred will be outside the confidence interval.

Kosovo Agency of Statistics

short description

Kosovo Agency of Statistics is a professional institution which deals with collection, processing and publication of official statistical data. As such acts since 1948 and has passed through several historical stages, structured according to state regulation of those times.

On 2 August 1999, the Agency has resumed his professional work (after nine years of interruption of all statistical series detrimental to the interest of Kosovo), as an independent institution under the Ministry of Public Administration. Since 12.12.2011 the Agency operates in the frames of the Prime Minister's Office. Office is funded by the Kosovo Consolidated Budget, but also by donors for specific projects and for technical professional support.

Kosovo Agency of Statistics acts according to the Law No. 04/L-036 which entered into force on 12.12.2011. Programme of Official Statistics 2013/2017 is in implementation for the development of statistical system in correlation with the European Union statistics (EUROSTAT).

Kosovo Agency of Statistics has this organizational structure: production departments; (Department of Economic statistics and National Accounts, Department of Agriculture and Environment statistics and Department of Social statistics. **Support Departments**; Department of Methodology and Information Technology, Department of Policy Planning, Coordination and Communication, Department of Census and survey and Department of Administration. **Within the Agency are also established Regional Offices**; Gjakove, Gjilan, Mitrovica, Peja, Prizren, Pristina and Ferizaj

In KAS are employed in total 147 workers, of whom 100 (68,0 %) at the headquarters of the Agency, while in the Regional Offices, 47 (32,0%). Agency's educational qualifying structure is as follows: 73,5% with university education, 13,6% with with non-tertiary education, and 12.9% with secondary education.

We have professional and technical cooperation with all Ministries of the Government of Kosovo, especially with the Ministry of Economy and Finance, Central Bank of Kosovo, with international institutions, EUROSTAT, International Monetary Fund, World Bank, Sweden's SIDA, DFID, UNFPA, UNDP, UNVEF, and with the statistical institutions of the countries in the region.

Kosovo Agency of Statistics almost completely covers the territory of Kosovo, based on the statistical structure of the enumeration areas as the basic unit and sole in the country from which it gets first hand information. All surveys conducted in the field use the extension of the samples in these enumeration areas but also a statistical methodology according to international recommendations. During the collection of statistical data and reports from reporting entities are involved professionals, technicians, administrators, servants of the country offices, field enumerators from regional offices, etc.

In 2011, the project of Population Census , Households and Dwellings was successfully implemented, and in 2014 was successfully carried out the Agriculture Census. The result obtained from these censuses will have an important role in the development policies.

The mission of the Agency; to meet the needs of users with qualitative statistical data, objective, in time and space so that users have reliable base to conduct regular analysis in the interest of planning and project development at the municipal and country level. To support government institutions, scientific institutes, research academies, businesses in order to provide proper information for decision-makers and other users in Kosovo.
