## Series 5: Social Statistics

# Labour Force Survey Q2 2018

# Foreword

The purpose of the Labour Force Survey (LFS) in Kosovo is to provide statistical data on statistical indicators of the labour market and facilitate their comparison with previous years. Labour Force Survey includes 598 Enumeration Areas (EAs) in the entire territory of Kosovo.

Report of LFS in the second quarter of 2018 contains information on employment and unemployment according to age, gender, employment status, economic activity, occupation and other areas of the labour market.

In the second quarter of 2018, the employment rate is 28.5 %, the unemployment rate is 29.4 % while the inactivity rate is 59.6 %.

LFS data indicate that the percentage of people employed part-time in the second quarter of this year is 3.7 %. Self-employment (as a percentage of employees) for the quarter was 21.3 %. Percentage of employees in unstable jobs (persons who are self-employed and have no employees and those who work without pay in a family business) was 18.8 %. Trade, manufacturing, construction and education continue to employ almost half of employed persons.

Regarding the participation in the workforce which was 40.4 % in this period, the number of females belonging to the labour force was 17.4 % and 63.1 % was for males.

The unemployment rate among young people is 55.0 %.

Long-term unemployment of young people (age 15-19) who have been unemployed for more than 12 months for this quarter was 38.2 %.

The percentage of young people who are not employed nor in education or training - NEET (respondents aged 15-24) is 30.2 %.

KAS thank the participants and other stakeholders, especially its staff in the implementation of LFS first quarter of 2018. At the same time, KAS informs all users of official statistics that KAS, within budget opportunities, is continuously making capacity building efforts to publish stable and more quality statistics.

According to the Law on Official Statistics, No. 04/L-034, the Kosovo Agency of Statistics is responsible for the production of official statistics in the Republic of Kosovo, therefore, when using this data, the source shall be cited.

## Introduction

Kosovo Agency of Statistics (KAS) has started the implementation of the Labour Force Survey (LFS) in 2001, and has continued as an annual survey until 2009. Due to the preparation of the Population Census, the Labour Force Survey (LFS) was not conducted in 2010 and 2011.

Since 2012, Labour Force Survey (LFS) is developed according to Eurostat methodology as the continued survey (52 calendar weeks – reference weeks), as well as:

- Revised questionnaire (following the Eurostat guidelines)
- New sample frame (based on the Population, Households and Dwellings Census in Kosovo 2011).
- Longitudinal sub-sample, where each household selected is interviewed four times (once in three months, the first time in the selected household is the Survey and three following interviews are Re-surveys that tracks eventual changes of indicators, in that household selected from quarter to quarter)
- Interview of the households was conducted via laptop, through the methods CAPI – Computer Assistance Personal Interviewing, which enables faster generation of data than through the PAPI method, respectively through the traditional method of data collection through interview with paper and pencil, which are entered to the computer.

The main objectives of LFS are collection of information mainly on the supply side of the labour market, i.e. information on those who are working or actively looking for a job.

## **Acknowledgements**

Since 2014, the LFS is realized with KAS budget. We express our gratitude to the hard work of the heads of regional offices of KAS, who supervised the field work, and to the families who have shared their time and provided data by helping in this way the collection of such detailed information.

## Definitions

The working age population includes people aged 15 to 64 years. This measure is used to give an estimate of the total number of potential workers within the economy.

The workforce consists of employed and unemployed persons, according to precise definitions given below. Inactive persons are not considered part of the workforce.

1. **Employed:** persons who during the reference week did any work for pay, profit or family gain, in cash or in kind, or who were temporarily absent in their work.
2. **Unemployed:** persons who during the reference week:
  - Were without work, i.e. they were not in paid employment or self-employed;
  - Were currently available for work, i.e. they were willing to start paying job or self - employment within two weeks; and
  - Seeking work, i.e. they had taken specific steps during the past four weeks in search of paid employment or self-employment.
3. **Inactive persons:** persons who during the reference period were neither employed nor unemployed.

Classification of the population in these three above categories depends on the application of the principle of activity - what did the person do actually during the reference week - and a set of priority rules on activities that give priority to employment over unemployment and unemployment on economic inactivity. Classification also depends on a clear understanding of which activities are considered as "employment".

**The participation rate in the workforce** is the percentage of the working age population of a country that engages actively in the labour market (employed or unemployed). The labour force (employed and unemployed) to the working age population, expressed as a percentage is:

$$\text{Participation rate in the workforce} = \frac{\text{Employed} + \text{Unemployed}}{\text{Working age population}} \times 100$$

**The inactivity rate** is the percentage of the working age population of a country that is not part of the labor force (neither employed nor unemployed). When put together, the rate of inactivity rate and participation in the workforce give result of 100 percent.

**Employment to population ratio**, also known as the employment rate, is the percentage of the working age population of a country that is employed.

$$\text{Employment to population ratio} = \frac{\text{Employed population}}{\text{Working age population}} \times 100$$

**The unemployment rate** is the percentage of the labour force that is unemployed. Workforce is defined as the basis for this indicator and not the working age population.

$$\text{Unemployment rate} = \frac{\text{Unemployed}}{\text{Labour Force}} \times 100$$

**Discouraged workers are persons who do not have jobs**, who are currently available for work but have given up looking for work because they believe that they can not find work. This category of discouraged persons is included in the inactive population category.

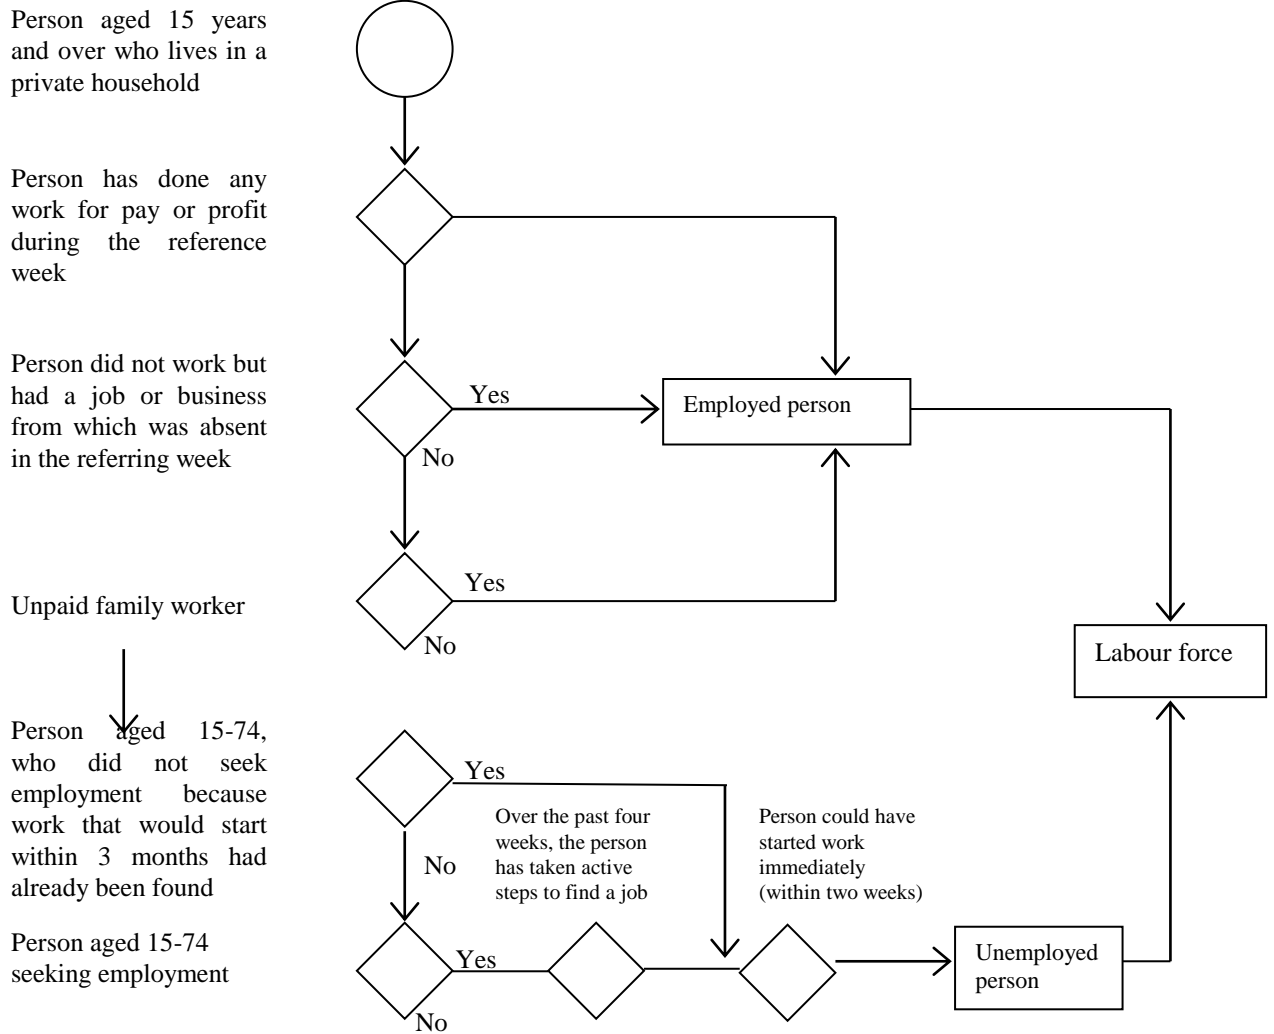

**Youth unemployment** refers to the unemployment rate of persons aged 15-24 years.

**NEET** form part of young people (age 15-24) who are neither employed nor attending school nor not even training.

**Unstable employment** refers to self-employed persons who have no employed persons or unpaid family workers. These kind of employees are less likely to have formal work arrangements and more likely for lacking appropriate working conditions.

The diagram below illustrates the criteria used for classification of the population in working age as employed, unemployed or inactive.

**Graph. 1: Classification of the workforce in the Labour Force Survey of the European Union**

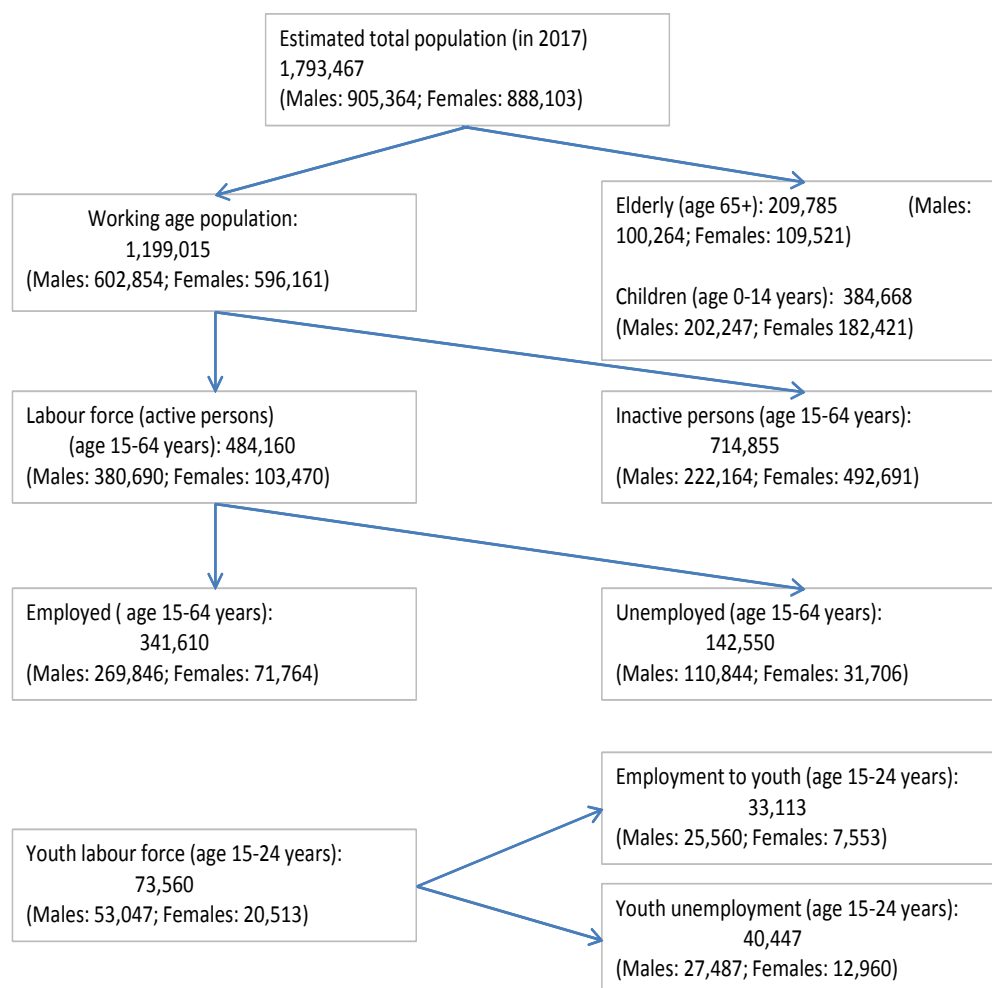

## Key indicators

Graph 1 presents a summary of the state of the labour market of Kosovo's population based on the Labour Force Survey in the second quarter 2018. Among the main results of the LFS in the second quarter of 2018, as shown in Graph 1 and elaborated further in this report, are:

- Almost two thirds of Kosovo's population is of working age (age 15-64). It is expected that the working age population to increase rapidly over the next decade as Kosovo is among the countries with the youngest population in Europe.
- Of the working age population, 59.6 % are not economically active, which means that they are not employed and have not been active in search of employment during the past four weeks and / or are not ready to start working within two weeks.
- From 40.4 % of the population that is economically active, 29.4 % (142,550 persons) are unemployed. This means that 59.6 % (484,160) of economically active persons are employed, by creating an employment to population ratio (employment rate) of 28.5 %.
- 59.6 % of the working age population is inactive.
- There are significant gender differences in all labour market.
- One in five (17.4 %) females of working age are active in the labour market, compared with about three-fifths (63.1 %) of working-age males
- Among persons in the labour force, unemployment is higher for females than for males (30.6 % compared to 29.1 %).
- The employment rate among working age females is only 12.0 %, compared with 44.8 % for males.
- This very low degree of unemployment among females stems from the combination of very low participation in the labour force and high unemployment.
- Females were mainly employed in the education, health and trade sectors (52.8 % of employed females). Males were mainly employed in the sectors of trade, construction, and manufacture (employing 41.5 % of employed males).
- Youth unemployment is very high in Kosovo.
- In the second quarter of 2018, young people in Kosovo had two times more likely to be unemployed than adults. Among persons aged 15-24 in the labour force, 55.0 % were unemployed.

- Unemployment is higher among young females (63.2 %) than young males (51.8%).
- Nearly one-third (30.2 %) of those aged 15 to 24 years in Kosovo were not in education, employment or training (NEET). This figure is 29.6 % for young females compared with 30.7 % for young males.
- Most of those employees reporting to work fulltime.
- 96.3 % of respondents reported working full time in their main job.
- The reasons for working part-time differ between the genders, as females, taking on the role of care within the family, reduce the hours available for employment.
- The number one reason for males not working full time, was the lack of a full-time job.
- 18.8% of employed people belonged to the category of unstable employment. This means that they are either employed in their business (own-account workers), or contribute to a family business (paid or unpaid).
- Only 20.4 % of employed persons had a permanent contract in their main job, while 79.6 % had temporary contracts, no significant differences between males and females. People who had temporary contracts were asked why they had this kind of contract and 80.4 % of respondents reported that there was no other available contract.
- Net salaries of most employees were between € 400 to € 500 per month. Gender differences were observed with 5.2% higher for males than for females.

**Graph. 2: Classification of the labour market for the population of Kosovo, Q2 2018**

**Tab. 1: Key indicators of the labour market**

Key indicators of the labor market (%)	Male	Female	Total
Rate of participation in labor force	63,1	17,4	40,4
Inactivity rate	36,9	82,6	59,6
Employment to population ratio (employment rate)	44,8	12,0	28,5
Unemployment rate	29,1	30,6	29,4
Unemployment rate among young people (15-24 years of age)	51,8	63,2	55,0
Percentage of young people NEET youth population (15-24 years of age)	30,7	29,6	30,2
Percentage of unstable employment to total employment	19,4	16,7	18,8

## 1. Employment

### 1.1: Employment by gender

Out of the entire population of working age, 28.5 % were employed. The employment rate was higher for males than for females: 44.8 % of males of working age were employed compared to 12.0 % of females of working age.

Compared with the previous LFS (Q1 2018) in Kosovo, there is a drop by 0.3 % in employment rate, where this decrease to males was 0.7% while to females there is an increase by 0.2%.

Compared with the same period last year (Q2 2017) of LFS in Kosovo, we have a decrease in the employment rate by 1.4%, where this decrease in females was 0.7% while to males the decrease was by 2.0 %.

**Graph. 1.1: Employment rate by gender**

### 1.2: Employment by age group and educational level

The employment rate in the age group was highest among persons aged between 35-44 years (39.0 %) and lowest among youth (15-24 years) (9.7 %).

The employment rate for females for the age group 25-54 ranges from 13.3% to 16.4%. In the age group 25-34, the employment rate is 16.4%, with a 0.4 % decrease in the age group 35-44 (16.0%) and again a decrease by 2.7 % compared to the age group 45-54 years (13.3%). While females employed in the young age group (15-24 years) were only 4.7 % while in the age group (55-64 years) were 12.7%.

To males (Table 1.1), the employment rate was highest for the age group 35 to 44 (66.2%), followed by the age group 45 to 54 (65.4%) and the lowest for young people (14.1%).

**Tab.1.1: Number of employees and employment rate by gender and age group**

Kosovo	Male	Female	Total
<b>EMPLOYMENT (IN THOUSAND)</b>			
15-24	25,6	7,6	33,1
25-34	62,1	18,9	81,0
35-44	68,5	19,2	87,6
45-54	72,9	15,5	88,5
55-64	40,7	10,6	51,4
<b>15-64</b>	<b>269,8</b>	<b>71,8</b>	<b>341,6</b>
<b>Employment to population ratio (%)</b>			
15-24	14,1	4,7	9,7
25-34	48,7	16,4	33,4
35-44	65,4	16,0	39,0
45-54	66,2	13,3	39,0
55-64	51,6	12,7	31,6
<b>15-64</b>	<b>44,8</b>	<b>12,0</b>	<b>28,5</b>

**Tab. 1.2: Employment by educational level**

Kosovo	Male	Female	Total
<b>EMPLOYMENT (IN THOUSAND)</b>			
No formal education	0,3	0,4	0,7
Primary	34,9	9,1	44,0
Secondary education, vocational	94,3	18,2	112,5
Secondary education, gymnasium	76,2	9,4	85,6
Tertiary	64,2	34,6	98,8
<b>Total</b>	<b>269,8</b>	<b>71,8</b>	<b>341,6</b>
<b>EMPLOYMENT RATE (%)</b>			
No formal education	5,9	2,5	3,3
Primary	20,6	3,1	9,5
Secondary education, vocational	48,0	14,4	34,9
Secondary education, gymnasium	51,9	9,8	35,2
Tertiary	75,6	54,2	66,4
<b>Total</b>	<b>44,8</b>	<b>12,0</b>	<b>28,5</b>

Table 1.2 shows that the higher the education is, the higher will be the possibility for employment (66.4%).

**Tab. 1.3: Higher level of education by type of employer (15-64)**

Kosovo	Public sector, government	State-owned enterprise	Private company	Individuale, private
<b>HIGHEST EDUCATIONAL LEVEL (%)</b>				
No formal education	0,2	0,0	0,1	0,0
Primary	5,0	4,9	11,1	52,8
Secondary education, vocational	16,6	20,3	43,0	8,9
Secondary education, Tertiary	19,0	14,6	29,1	24,5
	59,2	60,2	16,7	13,9
<b>Total</b>	<b>100,0</b>	<b>100,0</b>	<b>100,0</b>	<b>100,0</b>

Table 1.3 shows that the requirements for jobs are higher for government positions, where over half of all employees (59.2%) have completed higher education.

### 1.3: Employment status

In the second quarter of 2018, 73.3% of employed persons were employees, 7.9% were self-employed and had other employees, 13.4% were self-employed with no other employees and 5.5% were family workers (Table 1.4). The majority of employed females had the status of employees (81.1% compared with 71.2% for males).

**Tab. 1.4: Employment status by gender (%)**

Kosovo	Male	Female	Total
<b>Employment status (%)</b>			
Employee	71,2	81,1	73,3
Self-employed with employees	9,3	2,2	7,9
Self-employed without employees	13,8	11,6	13,4
Unpaid family worker	5,6	5,1	5,5
<b>Total</b>	<b>100,0</b>	<b>100,0</b>	<b>100,0</b>

### 1.4: Unstable employment

Besides the low level of employment in Kosovo, 18.8 % of employed persons worked in unstable jobs. Workers in unstable jobs are either self-employed people without employees or those who work without pay in a family business. These two groups of workers are likely lower to have a formal work agreement compared to workers with pay and salary.

Males are more likely to hold such unstable jobs (19.4 % of employed males compared with 16.7% of employed females). Expressed in absolute numbers, 64,358 of 341,610 employees belong to the category of unstable employment (Table 1.5). Employees in occupational areas are less likely to be employed in unstable jobs (Table 1.6), as well as persons with higher level of education (Table 1.7).

**Tab. 1.5: Unstable employment by gender**

Kosovo

## 1.5: Types of contracts

Regarding the type of contract that the interviewed employees had, the majority (87.7%) had an individual contract, while the rest worked without a contract. For young adults (age 15 to 24 years), the percentage of those who worked without contracts was 33.9 %.

From people who have an employment contract, only 20.4 % had permanent contracts for their main job, while 79.6% had temporary contracts. The figures are similar for males and females. People who have temporary contracts were asked why they had this kind of contract and 80.4% % of respondents reported that there was no other contract type available.

When asked if they had their rights in their main job, to benefit from social security scheme at work, the survey data showed that only 10.9 % of employees had this right.

## 1.6: Employment by activity

Trade, construction, education and manufacturing employ more than half of employed persons in the second quarter of 2018 (see Tables 1.8 and 1.9). Trade employ 16.8%, continuing with education with 11.7%, construction with 11.6 %, and manufacturing with 9.5% of employed persons in Kosovo.

Education, trade, and health care were the three leading female employers (employing 52.8% of employed females). Trade, construction and manufacturing are the most common sectors of employment for males (employing 41.5% of employed males).

**Tab. 1.8: Employment by activity and gender (in thousand)**

<b>Total</b>	<b>100,0</b>	<b>100,0</b>	<b>100,0</b>

## 1.7: Employment by occupation

In the second quarter of 2018, most of the employees were working in positions of service and sales, as professionals, in elementary occupations and craft workers (Table 1.10).

Almost half of employed females were professional, technical and related occupations with (42.2%), 21.6% were in services and sales and 9.8% in elementary occupations. Males were distributed across sectors, but most were employed in service and sales (26.4%), 13.2% as craft workers and work related, in elementary occupations (20.8%) and 14.1% were professionals (Table 1.10).

**Tab. 1.10: Employment by occupation and gender (in %)**

Kosovo (age 15 and over)	Male	Female	Total
<b>EMPLOYMENT BY OCCUPATION (IN THOUSAND)</b>			
Legislators, senior officials and managers	19,5	5,2	24,8
Professionals	38,4	26,0	64,3
Technicians and related occupations with them	9,7	4,5	14,2
Clerks	14,3	6,2	20,5
Service and sales workers in shops and markets	71,8	15,6	87,4
Skilled agricultural, forestry and fishery workers	8,7	0,4	9,1
Craft and related trades workers	35,9	7,0	42,9
Plant and machine operators, and assemblers	17,3	0,3	17,6
Elementary occupations	56,7	7,1	63,8
<b>Total</b>	<b>272,3</b>	<b>72,2</b>	<b>344,5</b>
<b>EMPLOYMENT BY OCCUPATION (IN %)</b>			
Legislators, senior officials and managers	7,2	7,3	7,2
Professionals	14,1	35,9	18,7
Technicians and related occupations with them	3,6	6,3	4,1
Clerks	5,2	8,6	5,9
Service and sales workers in shops and markets	26,4	21,6	25,4
Skilled agricultural, forestry and fishery workers	3,2	0,6	2,6
Craft and related trades workers	13,2	9,6	12,4
Plant and machine operators, and assemblers	6,3	0,4	5,1
Elementary occupations	20,8	9,8	18,5
<b>Total</b>	<b>100,0</b>	<b>100,0</b>	<b>100,0</b>

\* From the first quarter and onwards (Q1 2018), for employees by occupations will be used the new classification of occupations "Classification of Occupations 08".

## 1.8: Employment models

Only 0.3 % of the employed population reported that they had a second job during the reference week.

In their main job, 96.3% of respondents reported working full time and 3.7% part-time. Gender differences were observed, with females more likely to work part-time (4.4% compared with 3.5%).

For those who do part-time work, reasons differed between the genders, females take a greater role in family care thus reducing the hours available for work (Table 1.11). The number one reason for males not working full time was the lack of availability of full-time work.

**Tab. 1.11: Reasons for working part-time by gender (%)**

Kosovo	Male	Female	Total
Caring for children or adults with disabilities	0,0	0,0	0,0
Disability or illness	0,0	0,0	0,0
Other personal or family reasons	0,7	41,2	8,1
A student	5,0	8,4	5,6
No option to make a full-time job	91,3	41,9	82,3
Does not want a full-time job	1,4	0,0	1,1
Other reason	0,0	0,0	0,0
<b>Total</b>	<b>100,0</b>	<b>100,0</b>	<b>100,0</b>

Three-fifths of the employees worked between 40-48 hours a week. Almost two-tenths (13.4%) of employees worked 60 or more hours per week. Within a week, 7.6% of employees worked less than 40 hours.

Males tend to work longer hours than females, 25.3 % of males work more than 48 hours a week compared with 4.5 % of females (Table 1.12). A greater proportion of employed females (13.6%) worked less than 40 hours compared with 6.1 % of males.

**Tab. 1.12: Employment by hours of work per week and by gender**

Kosovo	Male	Female	Total
<b>EMPLOYMENT BY THE NUMBER OF HOURS (IN THOUSAND)</b>			
Less than 25	7,7	3,5	11,2
25-34	7,8	6,2	14,0
35-39	0,7		0,7
40-48	185,3	58,8	244,1
49-59	24,0	1,9	25,9

## 1.9: Net monthly wages

The net wages of the majority of employees were between 400 € and 500 € per month. Gender differences were observed with 5.2% higher for females than for males.

**Graph. 1.2: Net monthly wages for employees by gender**

## 2. Unemployment

### 2.1: Unemployment by gender

According to the second quarter of LFS 2018, in Kosovo there were 142,550 persons aged 15-64 years who were unemployed, 110,844 of whom were males and 31,706 females (Table 2.1). Unemployment rate was 29.4%, highest in females by 30.6% than in males by 29.1% (Graph 2.1).

Compared to the previous quarter of the LFS (Q1 2018) in Kosovo, there is an increase in unemployment rate of 2.9%, where this increase in males was 3.2%, while in females was by 1.9%.

Compared to the same period last year (Q2 2017) of LFS in Kosovo, there is a decrease of the unemployment rate by 1.2%, where this decrease in females was 6.0% while in males increased by 0.3%.

**Graph. 2.1: Unemployment rate by gender**

**Tab. 2.1: Number of unemployed and unemployment rate by gender**

Kosovo	Male	Female	Total
UNEMPLOYMENT (IN THOUSAND)			
15-64	110,8	31,7	142,5
UNEMPLOYMENT RATE (%)			
15-64	29,1	30,6	29,4

## 2.2: Unemployment by age group and educational level

The young population in Kosovo has a very high unemployment rate of 55.0% (Table 2.2). As for other age groups, the lowest rate of unemployment has been observed among people aged 55-64 (8.8%).

**Tab. 2.2. Number of unemployed and unemployment rate by gender and age group**

Kosovo	Male	Female	Total
<b>UNEMPLOYMENT (IN THOUSAND)</b>			
15-24	27,5	13,0	40,4
25-34	41,2	12,6	53,7
35-44	22,5	3,7	26,3
45-54	15,1	2,1	17,2
55-64	4,6	0,4	5,0
<b>15-64</b>	<b>110,8</b>	<b>31,7</b>	<b>142,5</b>
<b>UNEMPLOYMENT RATE (%)</b>			
15-24	51,8	63,2	55,0
25-34	39,8	40,0	39,9
35-44	24,8	16,3	23,1
45-54	17,1	11,8	16,2
55-64	10,2	3,2	8,8
<b>15-64</b>	<b>29,1</b>	<b>30,6</b>	<b>29,4</b>

The unemployment rate was highest for people without formal education (53.4% of this group were unemployed) and lowest for persons who had completed higher education (17.5%).

**Table 2.3. Number of unemployed and the unemployment rate by educational level and gender**

Kosovo	Male	Female	Total
<b>UNEMPLOYMENT (IN THOUSAND)</b>			
No formal education	0,8	0,0	0,8
Primary	25,5	2,8	28,2
Secondary vocational education	49,1	11,5	60,6
Secondary education, gymnasium	23,3	8,5	31,9
Tertiary	12,1	8,9	21,0
<b>Total</b>	<b>110,8</b>	<b>31,7</b>	<b>142,5</b>
<b>UNEMPLOYMENT RATE (%)</b>			
No formal education	73,7	0,0	53,4
Primary	42,2	23,2	39,1
Secondary vocational education	34,2	38,8	35,0
Secondary education, gymnasium	23,4	47,6	27,1
Tertiary	15,9	20,5	17,5
<b>Total</b>	<b>29,1</b>	<b>30,6</b>	<b>29,4</b>

Education has improved prospects in the labour market, especially for males, since 73.7 % of males without formal education were unemployed, compared with 15.9 % of those who had completed tertiary education.

## 2.3: Youth unemployment

Based on the second quarter of LFS 2018, 28.4 % of the unemployed in Kosovo were young people (aged 15-24 years) with 16.1 point difference between males and females.

A significant proportion of the young population is unemployed (55.0%) and youth unemployment among females is higher (63.2 %) compared to males (51.8%).

**Tab. 2.4: Percentage of unemployed youth in total unemployment and unemployment rate among young people by gender**

Kosovo	Male	Female	Total
Percentage of unemployed youth in total unemployment (%)	24,8	40,9	28,4
Percentage of youth as unemployed in young population (%)	51,8	63,2	55,0

In the second quarter of 2018, young people in Kosovo were two times more likely to be unemployed compared to adults, with figures almost similar for males and females (Table 2.5).

**Tab. 2.5: Unemployment rate of young people to adults, by gender**

Kosovo	Male	Female	Total
The rate of youth unemployment to adult unemployment	2,0	2,8	2,2

## 2.4: Duration of unemployment

Unemployed respondents were asked how long are unemployed. A large number (60.2%) of the unemployed reported that they are unemployed for longer than 12 months. Small differences were observed according to gender (62.1% males and 53.4% females).

(Table 2.6) shows that the likelihood of being unemployed for more than a year increased with age.

**Table 2.6: Duration of unemployment for more than a year by age group and gender (%)**

Kosovo	Male	Female	Total
15-19	38,6	37,2	38,2
20-24	52,4	42,3	49,0
25-29	55,2	55,1	55,2
30-34	65,4	67,2	65,7
35-39	75,2	64,5	73,4
40-44	63,7	54,3	62,6
45-49	67,4	70,8	67,9
50-54	85,1	77,6	84,4
55-59	89,4	100,0	89,6
60-64	75,4	100,0	82,1
<b>Total</b>	<b>62,1</b>	<b>53,4</b>	<b>60,2</b>

Graph 2.2 shows that the age group 30-34, although young, female unemployment for more than a year reaches 67.2% compared with 65.4 % for males.

**Graph. 2.2. Duration of unemployment for more than a year by age group and gender (%)**

### 3. Participation in the workforce

In the second quarter of 2018, out of the total estimated population of 1,793,467, the total population of working age (15 to 64) was 1,199,015 people. 40.4% of people of working age participate in the labour force (economically active). This means that they were either employed or unemployed (but actively looking for work and available for work). The remaining 59.6% were economically inactive (Graph. 4.1). Economically inactive persons include students, housewives, discouraged workers and others who were not actively looking for a job and this category is examined in more detail in the next chapter.

Compared with the previous quarter of the LFS (Q1 2018) in Kosovo, there is an increase in the rate of participation in the workforce by 1.2%, where this increase for males was 1.7% while for females this increase was 0.8%.

Compared with the same period last year of LFS (Q2 2017) in Kosovo, there is a decreased the rate of participation in the workforce by 2.6%, where this decrease was the same as for males and females by 2.6%.

**Graph. 3.1: Participation rate in the labour force by gender**

Graph 3.1 clarifies that workforce participation among females was much lower than among males: 17.4 % of females were active compared to 63.1 % of males.

The rate of participation in the workforce was highest among people aged 30-34 (55.9 %) and the lowest among people aged 15 to 19 with 6.6 % (Table 3.1). The low participation rate of young people is not surprising as most of this group attend school.

Males aged 40-44 years had higher participation rates (87.4%), while for females the highest rate was in the age group 30-34 years (29.8%) (Table 3.1).

**Tab. 3.1: Labour force and the participation rate in the labour force by gender and age group**

Kosovo	Male	Female	Total
Labour force (in thousand)			
15-19	8,8	2,9	11,7
20-24	44,2	17,6	61,9
25-29	54,3	18,3	72,5
30-34	49,0	13,2	62,2
35-39	42,7	11,2	53,9
40-44	48,3	11,7	60,0
45-49	49,6	9,8	59,4
50-54	38,4	7,9	46,3
55-59	30,1	7,1	37,2
60-64	15,3	3,9	19,1
<b>Totali 15 - 64</b>	<b>380,7</b>	<b>103,5</b>	<b>484,2</b>
Rate of participation in labour force (%)			
15-19	9,5	3,4	6,6
20-24	49,9	23,0	37,4
25-29	77,5	29,8	55,2
30-34	85,4	24,5	55,9
35-39	86,3	20,3	51,5
40-44	87,4	18,0	49,9
45-49	85,2	16,0	49,8
50-54	74,0	14,1	43,0
55-59	65,5	14,8	39,5
60-64	46,3	10,9	28,0
<b>Totali 15 - 64</b>	<b>63,1</b>	<b>17,4</b>	<b>40,4</b>

## 4. Inactive persons

Special attention is paid to the description and estimation of the employed population and the unemployed, which together comprise the Labour Force (or economically active persons). However, the category of "inactive" is equally important. Changes in activity rates are an important part of labour supply impact on potential economic growth. This is due to the large number of potential workers among those currently inactive.

Compared with the previous quarter of the LFS (Q1 2018) in Kosovo, there is a decrease of inactivity rate by 1.2%, with this decrease for males being 1.7%, whereas for females this decrease was 0.8%.

Compared with the same period last year of LFS (Q2 2018) in Kosovo, there is an increase in inactivity rate of 2.6%, where this increase for males was 2.6% whereas for females was also 2.6%.

Graph 4.1 clarifies that the largest participation is among females than among males: 82.6% of females were inactive compared to 36.9% of males.

**Graph 4.1: Inactivity participation rate by gender**

## 4.1: Inactive young people not in education, employment, or training (NEET)

The youth of this group (NEET) involves young people who are unemployed, not in school, nor trained, i.e. they are completely detached from the labour market and does not participate neither in the education system. High rates of this group in the population of young people raise concerns about youth employment in the future as it indicates detachment from the labour market. In addition, a large number of young people not engaged in countries with high unemployment of young people, such as Kosovo, can cause reduced profits due to increased competition, and has the opportunity to contribute to social problems.

In the second quarter of 2018, 103,423 of young people (aged 15 to 24) in Kosovo do not attend school, were not employed or in training, and account for 30.2 % of the young population. Part of NEET for females is 29.6% compared with 30.7% of males (Table 4.2).

**Tab 4.1: Young people who are not employed, do not attend school or training (NEET) by gender**

Kosovo	Male	Female	Total
Youth NEET (in thousand)	55,8	47,7	103,4
Percentage of youth NEET in young population (%)	30,7	29,6	30,2

Kosovo	Male	Female	Total
Youth NEET (in thousand)	55,8	47,7	103,4
Percentage of youth NEET in young population (%)	30,7	29,6	30,2

## 5. Demographic and economic dependency ratios

Presented in Table 5.1 are three levels of economic dependency (data presented as the proportion of dependents per 100 out of working-age population):

- The degree of dependence of young people (respondents aged under 15 / respondents aged 15-64)
- The dependency of the elderly (respondents aged 65 + / respondents aged 15-64)
- The age dependency ratio (the respondents younger than 15 or older than 64 / respondents aged 15-64).

**Tab 5.1: Demographic dependency ratios**

Kosovo 2018	Rate of youth dependency	Rate of elderly dependency	Rate of age dependency
<b>Q2 2018</b>	32%	18%	50%

Another level used often, particularly in the publications of Eurostat, the degree of effective economic dependency of the elderly. This is an important indicator for assessing the potential impact of age on the social costs related to employment (pensions, etc.). This indicator is calculated as the ratio between the population aged 65+ (all classified as inactive) and total employment. For this report, Eurostat has determined the age range of employees from 20 to 64 years. According to projections, this indicator will increase to 68% in 2060 to EU28. In Kosovo, this ratio was 50 % in the second quarter of 2018.

**Tab 5.2: Economic dependency ratios**

Kosovo 2018	Effective economic dependency ratio of the elderly	Total rate of economic dependence
<b>Q2 2018</b>	66%	274%

The total economic dependence rate is calculated as the ratio between the total inactive population (15+) and employment (age 20-64). It measures the average number of persons aged 15 years and over, that "support" each employee. This ratio was 274% in the second quarter of 2018.

According to projections, by 2023 the ratio will continue to rise in the EU, at 122.2% in 2023 and 141.6% in 2060.

## 6. Data accuracy

The reliability and accuracy of the outcomes of the Labor Force Survey (LFS) is dependent on the lack of responses during the interview process, data processing errors, and during design and sampling selection.

The odd effect due to sampling means that the results calculated from different samples deviate somewhat from each other. Employed and unemployed figures that are derived based on a larger and more representative sample are more accurate than those based on smaller samples.

Non-accuracy due to design and sample selection is assessed by the standard error of estimation. The size of the standard error is influenced by the size of the sample and variance of the variables that are the subject of the study. The standard error can be used to calculate the confidence interval within which the value of the population stands at a certain probability. The country-wide estimation of the number of unemployed based on LFS for the second quarter of 2018 is 29.4% and its standard error is 1.0% while the confidence interval for the number of unemployed is (27.6%; 31.3%).

**Tab. 6: Accuracy of LFS-based estimates in the second quarter of 2018 at country level**

Kosovo Q2	Quarterly estimates (%)	Standard error	Reliability Interval 95%		Variation coefficient (%)
			Low	High	
Employment rate	28,5	0,5	27,5	29,5	1,8
Unemployment rate	29,4	1,0	27,6	31,3	3,3
Rate of participation in the workforce	40,4	0,5	39,4	41,4	1,2

The accuracy of the ratings is presented based on their standard error. The standard error (square root of sample variance) describes how accurately the value of the parameter estimated by the sample is concentrated around the population parameter.

The main reliability figures derived from the standard error are the confidence intervals and the relative standard error (coefficient of variation). The confidence interval describes the width at which the real value of the parameter is in relation to the estimate calculated by the sample. When you calculate the confidence interval, the desired risk level is fixed. The 5% risk level applied to the workforce survey means that if the samples are retracted, in 95 cases out of a hundred, the real value of the parameter would be within the confidence interval and in 5 cases out of a hundred will be outside the confidence interval.

# Kosovo Agency of Statistics

## *short description*

**Kosovo Agency of Statistics** is a professional institution which deals with collection, processing and publication of official statistical data. As such acts since 1948 and has passed through several historical stages, structured according to state regulation of those times.

On 2 August 1999, the Agency has resumed his professional work (after nine years of interruption of all statistical series detrimental to the interest of Kosovo), as an independent institution under the Ministry of Public Administration. Since 12.12.2011 the Agency operates in the frames of the Prime Minister's Office. Office is funded by the Kosovo Consolidated Budget, but also by donors for specific projects and for technical professional support.

**Kosovo Agency of Statistics** acts according to the Law No. 04/L-036 which entered into force on 12.12.2011. Programme of Official Statistics 2013/2017 is in implementation for the development of statistical system in correlation with the European Union statistics (EUROSTAT).

**Kosovo Agency of Statistics** has this organizational structure: production departments; (Department of Economic statistics and National Accounts, Department of Agriculture and Environment statistics and Department of Social statistics. **Support Departments**; Department of Methodology and Information Technology, Department of Policy Planning, Coordination and Communication, Department of Census and survey and Department of Administration. **Within the Agency are also established Regional Offices**; Gjakove, Gjilan, Mitrovica, Peja, Prizren, Pristina and Ferizaj

In KAS are employed in total 147 workers, of whom 100 (68,0 %) at the headquarters of the Agency, while in the Regional Offices, 47 (32,0%). Agency's educational qualifying structure is as follows: 73,5% with university education, 13,6% with with non-tertiary education, and 12.9% with secondary education.

We have professional and technical cooperation with all Ministries of the Government of Kosovo, especially with the Ministry of Economy and Finance, Central Bank of Kosovo, with international institutions, EUROSTAT, International Monetary Fund, World Bank, Sweden's SIDA, DFID, UNFPA, UNDP, UNVEF, and with the statistical institutions of the countries in the region.

**Kosovo Agency of Statistics** almost completely covers the territory of Kosovo, based on the statistical structure of the enumeration areas as the basic unit and sole in the country from which it gets first hand information. All surveys conducted in the field use the extension of the samples in these enumeration areas but also a statistical methodology according to international recommendations. During the collection of statistical data and reports from reporting entities are involved professionals, technicians, administrators, servants of the country offices, field enumerators from regional offices, etc.

In 2011, the project of Population Census , Households and Dwellings was successfully implemented, and in 2014 was successfully carried out the Agriculture Census. The result obtained from these censuses will have an important role in the development policies.

**The mission of the Agency**; to meet the needs of users with qualitative statistical data, objective, in time and space so that users have reliable base to conduct regular analysis in the interest of planning and project development at the municipal and country level. To support government institutions, scientific institutes, research academies, businesses in order to provide proper information for decision-makers and other users in Kosovo.
