## CAUSES OF DEATH IN KOSOVO 2014 AND 2015

Prishtina, December 2018

## **F o r e w o r d**

The Kosovo Agency of Statistics (KAS), Department of Social Statistics (DSS), has compiled and published the results of causes of death in an analytical manner, through standard tables and classifications recommended by the World Health Organization (WHO) and Eurostat.

Publication of causes of death for the years 2014/2015 was done on the basis of processing of the part of the "Medical death certificate" of the statistical questionnaire for death, DEM-2.

This publication was made possible through the common work of the DSS and the National Institute of Public Health of Kosovo (NIPHK).

Information on causes of death provides wide opportunities for medical analyzes in respective fields of interest. Questionnaire for death – DM-2, in the part "Medical death certificate", the question - the cause of death, enables the recording of the disease, trauma or injury that caused the death and the same is processed and tabulated according to ICD-10.

The standard grouping and table presentation enables the analysis and comparisons with other countries. Coding of diseases according to the International Classification of Diseases, third revision (ICD - 10) is considered by WHO as an advanced analytic encoding applied by the developed countries.

The Kosovo Agency of Statistics will continue to publish the data every two years as a regular research.

To realize this significant statistical research, it is necessary that doctors in hospitals, clinics, medical centers, health facilities, etc. do the right description of the diagnosis in the statistical questionnaire DEM-2 and the question 23 - The cause of death from the "history" of the person treated in hospitals, the "cardboard" for the person treated in ambulances or other valid documents that clearly show the diagnose of the deceased person.

When using data published in this publication, the Department of Social Statistics of KAS will accept suggestions, proposals and any remarks which will help us to enrich the content of this publication in the future.

## Methodology

### Definitions related to the causes of death

**The cause of death** is disease, symptoms that caused or stimulated the death, and the circumstances of the accident that caused the trauma (Description in the death certificate).

**Preliminary cause** means the disease or trauma that helps the development of the disease which caused the death and when it is an accident, the circumstances of the accident or violence that caused the deadly trauma.

**Other important conditions** that could have caused the death but are related to main cause of death.

**Death** means sustainable elimination of all signs of life at any moment after live birth (end of life functions with no possibility of reanimation). This definition excludes the fetal death.

**Perinatal mortality rate** represents the number of perinatal deaths (fetal deaths - stillbirth or an early neonatal death) expressed per 1.000 live births.

**Early neonatal deaths** represents infant live births who died within the first 7 days of life (0-6 days).

**Late neonatal death** represents death occurred since day 7 (7-27 days), but before the end of 28th day.

**Postneonatal death** represents death occurred from the 28th day after live birth to the 364th day of the postnatal life (not over 1 year of life).

**Maternal death** is the death of a woman while pregnant or within 42 days of termination of pregnancy, irrespective of the duration and site of the pregnancy, from any cause related to or aggravated by the pregnancy or its management but not from accidental or incidental causes.

**Mortality** is the death as a component of population change which occurs to every member of the population.

**Coefficient of mortality by cause of death** is accounted for 100 thousand inhabitants since for many causes of death the rate of occurrence is very low.

**Number of deaths from a specific cause group** is a percentage of deaths occurring in the group in relation to their total number.

To realize this significant statistical research, it is necessary that doctors in hospitals, clinics, medical centers, health facilities, etc. do the right description of the diagnosis in the statistical questionnaire DEM-2 and the question 23 - The cause of death from the "history" of the persons treated in hospitals, the "cardboard" for persons treated in ambulances or other valid documents that clearly show the diagnose of the deceased person.

***Dear doctors!***

For the continuity and quality of this publication we need your help, which is to determine the exact **cause of death**, according to the **ICD – 10** in order to minimize avoidance of the real cause of death.

## **CAUSES OF DEATH IN 2014**

**Tab.1. Cases of deaths in Kosovo by gender, 2014**

Gender	Number of deaths	%
Male	4831	58,5
Female	3425	41,5
Total	8256	100,0

**Graph 1. Deaths in Kosovo by gender, 2014**

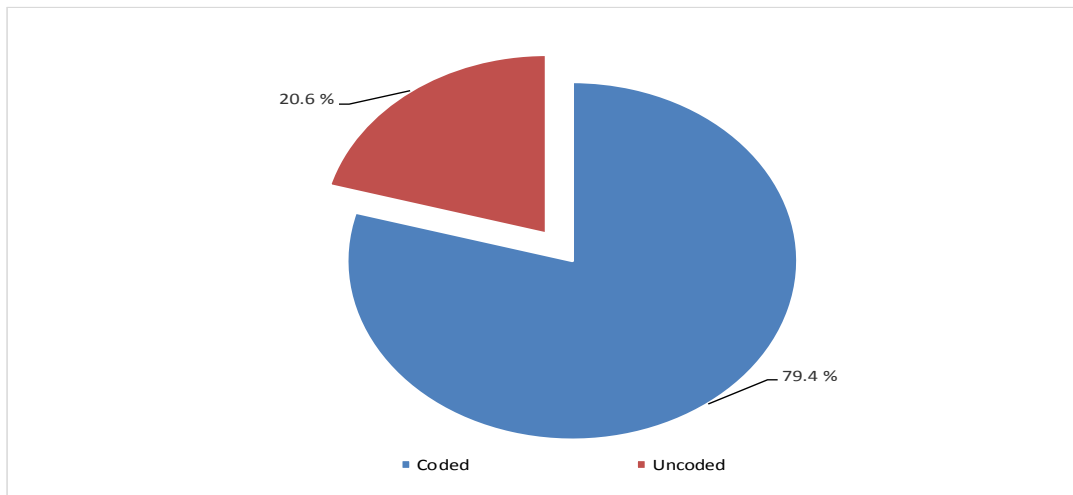

In 2014, in Kosovo are reported a total of 8256 deaths. Of these, 4831 or 58.5% male, and 41.5% or 3425 female .

**Tab. 2. Coded and uncoded deaths, 2014**

Coding	Number of deaths	%
Coded	6552	79,4
Uncoded	1704	20,6
Total	8256	100,0

**Graph 2. Coded and uncoded deaths, 2014**

Of the total deaths reported in 2014, coded (with diagnosis) are 6552 or 79.4% while uncoded are 1704 or 20.6%. The incidence of unregistered cases (uncoded) of 20.6% is a consequence of the lack of a diagnosis by the medical staff responsible for determining the death and the cause of death.

Table 10 provides data presented in absolute and relative numbers. The first two columns represent the participation of the group of diseases in total with diagnosis per age group. To group-diseases of endocrine, nutritional and metabolic diseases dominates age group 65+ with 80.4%. Respiratory diseases occupy the second place with 77.5%, age group 0-64 dominates external causes of morbidity and mortality by 85.3%, while the second group occupies blood and bloodstream diseases and immune disorders with 75%, and so on. The other two columns represent the age group participation in the total group-related diseases.

# Kosovo Agency of Statistics

## *short description*

**Kosovo Agency of Statistics** is a professional institution which deals with collection, processing and publication of official statistical data. As such acts since 1948 and has passed through several historical stages, structured according to state regulation of those times.

On 2 August 1999, the Agency has resumed his professional work (after nine years of interruption of all statistical series detrimental to the interest of Kosovo), as an independent institution under the Ministry of Public Administration. Since 12.12.2011 the Agency operates in the frames of the Prime Minister's Office. Office is funded by the Kosovo Consolidated Budget, but also by donors for specific projects and for technical professional support.

**Kosovo Agency of Statistics** acts according to the Law No. 04/L-036 which entered into force on 12.12.2011. Programme of Official Statistics 2013/2017 is in implementation for the development of statistical system in correlation with the European Union statistics (EUROSTAT).

**Kosovo Agency of Statistics** has this organizational structure: production departments; Department of Economic statistics, Department of National Accounts, Department of Agriculture and Environment statistics and Department of Social statistics. **Support Departments**; Department of Methodology and Information Technology, Department of Policy Planning, Coordination and Communication, Department of Census and survey and Department of Administration. **Within the Agency are also established Regional Offices**; Gjakove, Gjilan, Mitrovica, Peja, Prizren, Pristina and Ferizaj

In KAS are employed in total 155 workers, of whom 100 (68,0 %) at the headquarters of the Agency, while in the Regional Offices, 47 (32,0%). Agency's educational qualifying structure is as follows: 75,5% with university education, 12,3% with with non-tertiary education, and 12.3% with secondary education.

We have professional and technical cooperation with all Ministries of the Government of Kosovo, especially with the Ministry of Economy and Finance, Central Bank of Kosovo, with international institutions, EUROSTAT, International Monetary Fund, World Bank, Sweden's SIDA, DFID, UNFPA, UNDP, UNVEF, and with the statistical institutions of the countries in the region.

**Kosovo Agency of Statistics** almost completely covers the territory of Kosovo, based on the statistical structure of the enumeration areas as the basic unit and sole in the country from which it gets first hand information. All surveys conducted in the field use the extension of the samples in these enumeration areas but also a statistical methodology according to international recommendations. During the collection of statistical data and reports from reporting entities are involved professionals, technicians, administrators, servants of the country offices, field enumerators from regional offices, etc.

In 2011, the project of Population Census , Households and Dwellings was successfully implemented, and in 2014 was successfully carried out the Agriculture Census. The result obtained from these censuses will have an important role in the development policies.

**The mission of the Agency**; to meet the needs of users with qualitative statistical data, objective, in time and space so that users have reliable base to conduct regular analysis in the interest of planning and project development at the municipal and country level. To support government institutions, scientific institutes, research academies, businesses in order to provide proper information for decision-makers and other users in Kosovo.
