Series 3: Economic Statistics

Short-term Retail Trade Statistics Q4 2018

AGJENCIA E STATISTIKAVE TË KOSOVËS
AGENCIJA ZA STATISTIKE KOSOVA
KOSOVO AGENCY OF STATISTICS

F o r e w o r d

The Kosovo Agency of Statistics (KAS) has compiled the publication of the quarterly results of the Retail Trade Statistics for the period Q4 2018 (2013 = 100).

These statistics are an integral part of the KAS Statistical Programme and are based on the statements of enterprises. This research is published on a quarterly basis.

The results of this research show the performance in retail trade in quarterly periods.

These results are also used for the purposes of compiling the national accounts and are important source in the preparation of Gross Domestic Product by production and expenditure approach on a quarterly basis.

Publication was prepared by:

Ilir T. Berisha - Director of Department of DESNA

Ismail Sahiti - Head of Division,

Hysni Elshani - Head of Sector,

Bekim Bojku – Officer

Muhamet Kastrati - IT specialist for SBR,

Dafina Kumnova – Officer

Qendresa Shala – Officer

(E-mail: **economic@rks-gov.net**)

March, 2019

Chief Executive Officer, KAS
Mr. Isa Krasniqi

1 Objective, methodology and scope of the survey

1.1. Objective

The main objective of the short-term retail trade statistics is the presentation of quarterly trends in the retail sector, through several economic indicators, enabling comparability of data at international level in accordance with the European standards for quarterly statistics. The survey aims to meet the demands for more comprehensive statistical information on the conditions of market economy and provides data on the economic activities of enterprises in the retail sector.

1.2. Methodology and scope of the survey

Short-term statistics of economic enterprises in the retail sector provides the data for the fourth quarter of 2018 according to the Nomenclature of Economic Activities NACE Rev. 2.

In summary, the survey covers the retail sector with the exception of retail trade (distribution) of energy supply.

The methodology used for compiling the survey instruments, nomenclature and preparation of data for publication is in accordance with the Eurostat rules and recommendations. The questionnaire was compiled in co-operation with the experts from International Monetary Fund.

The survey was conducted throughout the territory of Kosovo and includes the retail sector.

1.3. Sampling frame and sampling selection

For creating (determining) the sampling frame, were used the data from the statistical register of businesses. All enterprises that have declared one of the taxes during the reference years for the previous years are considered active. Sample selection was made on the basis of the criterion where all enterprises representing 80% of turnover for the corresponding activity according to the four-digit level of NACE Rev2 were included. The number of enterprises involved in the survey is 586, in the retail trade sector.

1.4. Data collection procedures

The data collection from the field was conducted through the interviewers, mainly by applying the method of direct interviews of enterprises by surveyors using the questionnaire, also the methods of leaving the questionnaire to businesses and in certain cases the method of sending the questionnaire via electronic form or e-mail.

The field survey takes 20 days after the end of the reference quarter and the deadline for collecting data from the field is 30 days after the field work.

2 Definitions and key indicators

2.1. Definitions

Enterprise - is the smallest combination of legal entity with the manufacturing unit of products or services which has independence in decision-making, especially for the use of its material and monetary resources. An enterprise may carry one or several economic activities.

Active enterprise - is considered the enterprise that declared one of the taxes or any employees for the reference year.

Value of turnover from trade - represents the turnover made by trade by excluding value added tax.

Indices - express change in time of a given variable or variables as a whole. Volume index is calculated by the Laspeyres formula.

$$P_L = \frac{\sum(p_{c,t_n} \cdot q_{c,t_0})}{\sum(p_{c,t_0} \cdot q_{c,t_0})}$$

Turnover value index of retail trade - is the difference in a quarterly turnover of retail trade compared with a quarterly average of the base year (2013).

Number of employees - total number of paid employees working in enterprises (excluding family members who work without pay).

Index of number of employees - employment index represents the evolution of employment in the surveyed enterprises.

2.2. Key indicators

Indicators - are given in index form, the annual change in percentage, quarterly change in percentage in the reference base year, currently 2013 = 100. The data do not represent absolute values.

Quarterly change in percentage - measures the change in percentage of the economic indicator of the current quarter versus the previous quarter of the same year.

Review - indexes can be reviewed for several reasons: additional information, methodological changes or revaluations of coefficients used, etc.

3 Retail trade

3.1. The structure of turnover in retail sector

Fourth quarter 2018 – Third quarter 2018

In the fourth quarter of 2018, compared with the third quarter of 2018, there was an increase to: Retail trade of cultural and entertainment goods in specialized stores by 15.3%, Retail trade not in stores, stalls or markets by 4.6%, Retail trade in non-specialized stores by 2.1%, Retail trade of food products, beverages and tobacco in specialized stores by 1.6%, Retail trade of other household appliances in specialized stores by 0.2%.

While, during this quarter, decrease was observed to: Retail trade of other goods in specialized stores (9%), Retail trade of IT and communication equipment in specialized stores (3.1%) and Retail trade of fuel for vehicles in specialized stores by -1.0%.

Fourth quarter 2018 - Fourth quarter 2017

In the fourth quarter of 2018, compared to the fourth quarter of 2017, increase was observed to: Retail trade of cultural and entertainment goods in specialized stores by 40.3%, Retail trade of food products, beverages and tobacco in specialized stores by 39.2%, Retail trade not in stores, stalls or markets by 27.2%, Retail sale of other household appliances in specialized stores by 25.9% Retail sale in non-specialized stores by 19%, Retail sale of fuel for vehicles in in specialist stores by 14.5%

While, the decrease was observed to: Retail trade of IT and communication equipment in specialized stores (11.5%) and Retail trade of other goods in specialized stores (10.6%).

3.2. Number of employees in the retail trade sector

Fourth quarter 2018 – Third quarter 2018

In the fourth quarter of 2018, compared to the third quarter of 2018, the number of employees increased to: Retail trade of other goods in specialized stores by 6.1%, Retail trade of IT and communications equipment in specialized stores by 4.2%, and Retail trade in non-specialized stores by 0.2%.

While, the decrease was observed to: Retail trade of cultural and entertainment goods in specialized stores (11.8%), Retail trade of fuel for vehicles in specialized vehicles (6.6%), Retail trade of food products, beverages and tobacco in specialized stores (5.2%), Retail trade not in stores, stalls or markets (2.2%), and Retail trade of other household appliances in specialized stores (0.3%).

Fourth quarter 2018 - Fourth quarter 2017

In the fourth quarter of 2018, compared to the same quarter of 2017, increase was observed to: Retail trade of other goods in specialized stores with 47.1%, Retail trade not in stores, stalls or markets by 28.6%, Retail sale of IT and communications equipment in specialized stores by 26.8%, Retail sale of other household appliances in specialized stores by 9%, Retail sale in non-specialized stores by 5.4%, Retail trade of food products, beverages or tobacco in specialized stores by 1.3%.

While, during this quarter, decrease was observed to: Retail trade of cultural and entertainment goods in specialized stores (20.6%) and Retail trade of fuel for vehicles in specialized stores (1.3%).

Kosovo Agency of Statistics

short description

Kosovo Agency of Statistics is a professional institution which deals with collection, processing and publication of official statistical data. As such acts since 1948 and has passed through several historical stages, structured according to state regulation of those times.

On 2 August 1999, the Agency has resumed his professional work (after nine years of interruption of all statistical series detrimental to the interest of Kosovo), as an independent institution under the Ministry of Public Administration. Since 12.12.2011 the Agency operates in the frames of the Prime Minister's Office. Office is funded by the Kosovo Consolidated Budget, but also by donors for specific projects and for technical professional support.

Kosovo Agency of Statistics acts according to the Law No. 04/L-036 which entered into force on 12.12.2011. Programme of Official Statistics 2013/2017 is in implementation for the development of statistical system in correlation with the European Union statistics (EUROSTAT).

Kosovo Agency of Statistics has this organizational structure: production departments; Department of Economic statistics, Department of National Accounts, Department of Agriculture and Environment statistics and Department of Social statistics. **Support Departments**; Department of Methodology and Information Technology, Department of Policy Planning, Coordination and Communication, Department of Census and survey and Department of Administration. **Within the Agency are also established Regional Offices**; Gjakove, Gjilan, Mitrovica, Peja, Prizren, Pristina and Ferizaj

In KAS are employed in total 155 workers, of whom 100 (68,0 %) at the headquarters of the Agency, while in the Regional Offices, 47 (32,0%). Agency's educational qualifying structure is as follows: 75,5% with university education, 12,3% with with non-tertiary education, and 12.3% with secondary education.

We have professional and technical cooperation with all Ministries of the Government of Kosovo, especially with the Ministry of Economy and Finance, Central Bank of Kosovo, with international institutions, EUROSTAT, International Monetary Fund, World Bank, Sweden's SIDA, DFID, UNFPA, UNDP, UNVEF, and with the statistical institutions of the countries in the region.

Kosovo Agency of Statistics almost completely covers the territory of Kosovo, based on the statistical structure of the enumeration areas as the basic unit and sole in the country from which it gets first hand information. All surveys conducted in the field use the extension of the samples in these enumeration areas but also a statistical methodology according to international recommendations. During the collection of statistical data and reports from reporting entities are involved professionals, technicians, administrators, servants of the country offices, field enumerators from regional offices, etc.

In 2011, the project of Population Census , Households and Dwellings was successfully implemented, and in 2014 was successfully carried out the Agriculture Census. The result obtained from these censuses will have an important role in the development policies.

The mission of the Agency; to meet the needs of users with qualitative statistical data, objective, in time and space so that users have reliable base to conduct regular analysis in the interest of planning and project development at the municipal and country level. To support government institutions, scientific institutes, research academies, businesses in order to provide proper information for decision-makers and other users in Kosovo.
