F o r e w o r d

The Kosovo Agency of Statistics (KAS), the Department of Social Statistics (DSS), has published basic data and some indicators on Births inside and outside Kosovo (abroad) in the year of 2018.

The data in this publication are final and are the result of regular monthly surveys, while processing and the publication of the data is on annual basis.

Source of data for births are Civil Status Registers no. 2004/46 for Births. Reporting units are the Civil Status Offices in Kosovo.

Collection of the data is done through special statistical instruments: statistical questionnaire for births (DEM-1).

According to legal provisions on managing the civil register books, cases of births are mandatory to be registered in the register books at the settlement where the event (birth) occurred, regardless of the persons who are related to the event, if their permanent residence is in that settlement or somewhere else.

The data on demographic statistics for births are processed and published according to the principle of permanent / usual residence of the mother that, according to international rules, answers the concept of permanent population (resident) which principle is applied also in the case of the census.

When using this information published in this publication, the KAS Department of Social Statistics will accept suggestions, proposals and remarks which will help to enrich the content of this publication in the future.

Avni Kastrati - Director of the Department of Social Statistics
Valdete Navakazi - Head of the Division of Population Statistics

In preparation of the publication have contributed:

Arijeta Sojeva - Senior Officer for Vital Statistics
Sanije Uka - Senior Officer for Population Statistics
Elvira Tahiri - Officer for Population Statistics
Vjollca Berisha - Officer for Vital Statistics
Ahmet Cakolli - Officer for Design

Prishtina, June 2019

Chief Executive Officer, KAS
Isa Krasniqi

Questionnaire for the case of birth DEM-1	48

Brief history

Data on births during the years 1900-1912 were obtained through Turkish tefters' books, which were led by the special administrative offices and by religious institutions.

Also in the period of 1921-1939, the data for vital statistics were provided mainly through religious institutions (churches and mosques), a small portion is provided through the state civil status offices.

After World War II, on May 9, 1946, the Law on State Register Books was approved, and this matter was carried in competencies of the state bodies.

Data collection was done on a monthly basis by clerks in a summarized review, for births, which contained only the total and gender. Collected monthly data were **preliminary** demographic results.

After 1951, demographic data were collected through individual questionnaires, processed afterwards in order to gain **final** data, according to permanent residence and the time when the event occurred.

Destruction of the Demographic Statistics System starts with the beginning of political disorder in Kosovo in 1989, while total destruction happened during the war in 1999, and continued with the disorder and collapse of many register offices and the liquidation and stealing-withdrawing many register books (in some municipalities also the register books from 1900) in Serbia.

The first attempts to start the operation of this institution are made at the end of 1999 when UNMIK establishes new civil register with new registry books and certificates.

In 2000, the priority was "Reactivation of the Vital Statistics System" planned in the Department of Population Statistics in KAS. General technical assistance was provided by the University of Montreal in Canada, and later by the Dutch government.

In August 2001 starts the collection of the data on births

After the war in 1999, demographic statistics initially were supported by CIDA (Canadian International Development Agency) for the first phase and the Dutch Government for the second phase – the UNFPA was as an executive agency of the project.

In December 2011 came into force the Law on Official Statistics of the Republic of Kosovo No. 04/L-036.

Data sources

Reporting units of data for Births are the Civil Status Offices.
Data are collected by special statistical questionnaire DEM-1.

According to legal provisions on managing the civil status register books, cases of births are mandatory to be registered in the registry books in the Civil Status Office where the event occurred, without considering that the persons with whom the event is related live in that place or somewhere else.

The results of demographic statistics are processed according to the principle of permanent residence of the mother of a child born. So the demographic statistical outcomes are processed according to the principle of permanent residence, which corresponds to the concept of permanent population (resident) applied in the population census.

This bulletin contains information about vital phenomena that occurred in 2018, presented in tabular form, nationally and according to municipality, according to characteristics such as age, gender, ethnicity, education, fertility, etc. which is also usually required in the population census, in the level of Kosovo, municipality and permanent residence.

Inclusion

The implementations of regulations on registration of vital events is of special importance - births in civil registers, in civil status offices.

Births:

Live birth

is the complete expulsion or extraction from its mother of a product of conception, irrespective of the duration of pregnancy, which, after such separation, breathes or shows any other evidence of life, such as beating of the heart, pulsation of the umbilical cord, or any definite movement of voluntary muscles, whether or not the umbilical cord has been cut or the placenta is attached.

Fetal death / stillbirths

A fetal death is death prior to the complete expulsion or extraction from its mother of a product of conception, irrespective of the duration of pregnancy, as indicated by the fact that after such expulsion or extraction the fetus does not breathe or show any evidence of life, such as beating of the heart, pulsation of the umbilical cord, or definite movement of voluntary muscles.

Based on information collected in this publication, in 2018, in Kosovo were registered 29080 births, of them birth that occurred in Kosovo were 22870 born live or alive were 22761, while 109 were fetal deaths, and births outside Kosovo were registered 6210 births, of them 6209 live births and 1 fetal death..

Vital coefficient is 2.5 (ratio between live births and stillbirths in Kosovo in total). Coefficient of masculinity is 109.

The birth rate of fetal deaths (birth rate of fetal deaths) in 1000 births was 4.8 promil (Births in Kosovo).

In medical institutions occurred 99.9% of births, while the rest occurred elsewhere.

The largest number of mothers who gave birth is the age group of 25-29 with 35.9%, age group 30-34 with 25.9%, age group 20-24 with 19.6%, and the other age groups constitute 18.5% of the total number of births.

The average age of females who gave birth in 2018 was the age of 29.

The first child was born by 37.4% of mothers, 32.0% of mothers gave birth to the second child and 19.9% mothers gave birth to the third child, and so on.

According to the weight of the born child in medical institutions, the largest number of infants is with weight 3000-3499 grams or 37.3%, 3500-3998 gr. 31.5%, 2500-2999 gr. 13.2% etc. Babies born alive weighing less than 1000 grams make up only 0.2%.

For children born outside medical institution, according to the research methodology, the data are not required for their weight.

According to the educational level, mothers with secondary education compose 40.8%, secondary and tertiary completed 27.8%, and primary school completed with 24.2% etc.

The most frequent name for 2018 for girls was the name Alea 118, Jara 97, etc., while for boys was the name Ajan 153, Amar 144, etc.

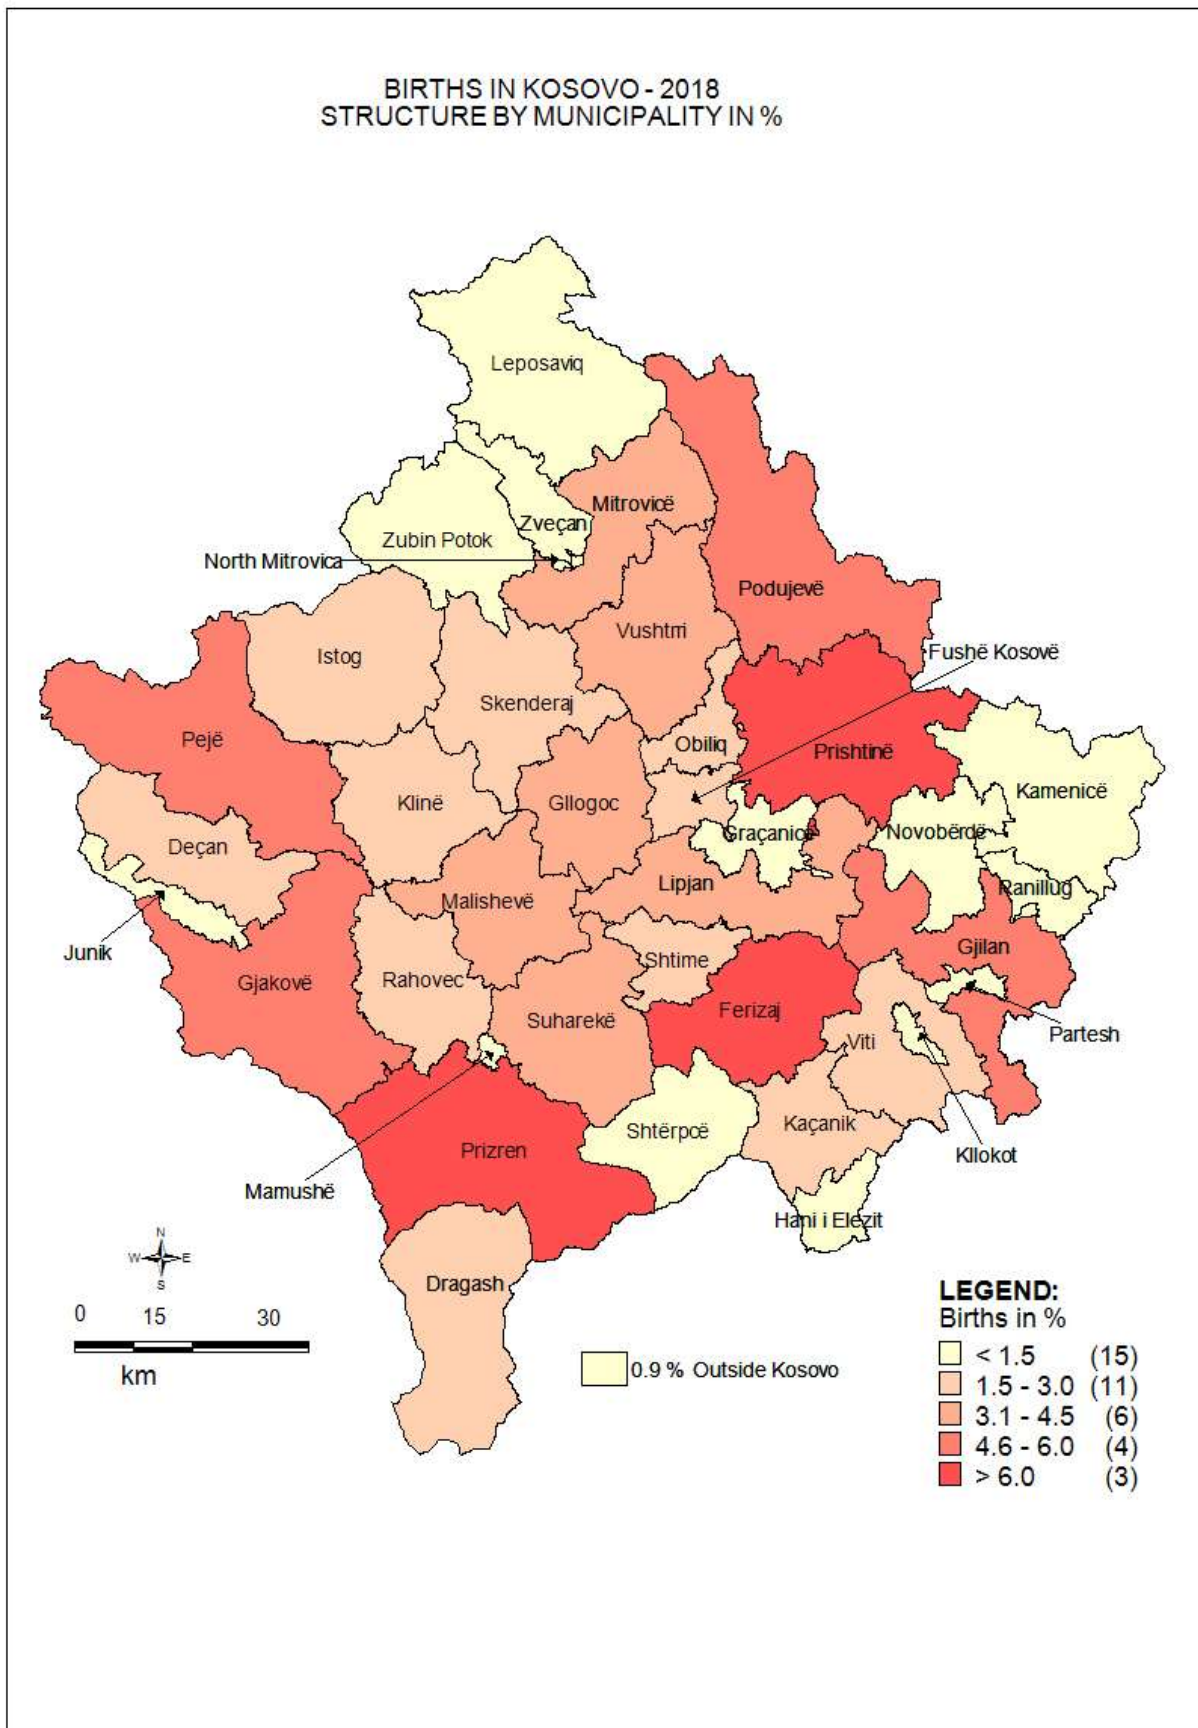

365 babies were born twins, and 13 babies were born triplets and a mother gave birth to four babies or quadruplets.
