F o r e w o r d

The Kosovo Agency of Statistics (KAS) has prepared the publication of results of industrial production statistics, or PRODCOM in 2018.

Starting from 2016 and onwards this research is an integral part of the KAS Statistical Programme and is based on statements of enterprises. This research is published on a regular annual basis.

The results of this research indicate the evolution of industrial production in the economy of Kosovo. Also these results are used for the purposes of compiling the national accounts and are important in the compilation of Gross Domestic Product by production and expenditure approach on a quarterly basis.

Publication of annual PRODCOM statistics contains comprehensive and detailed data in the field of annual industrial production statistics. The data presented are collected through annual PRODCOM survey on industrial production PRODCOM in 2018.

This publication may be subject to possible revisions due to the application of new methodologies by EUROSTAT.

Publication was prepared by:

Ilir T. Berisha – Director of Department,

Ismail Sahiti – Head of Division,

Hysni Elshani - Head of Sector,

Muhamet Kastrati - IT specialist for SBR,

Bekim Bojku – Officer,

Qendresa Shala – Officer for Transport and Telecommunication Statistics

Dafina Kumnova – Officer for Industry Statistics

(E - Mail: **economic@rks-gov.net**)

Prishtina, December 2019

Chief Executive Officer, KAS

Mr. Isa Krasniqi

1 Objective, methodology and scope of the survey

1.1 Objective

Subject to inclusion in PRODCOM and reporting units of PRODCOM are all commercial enterprises and other legal entities with over 10 employees, which are taking active industrial production or exercised industrial services on own account or on a contract basis, during the reference year, under the definition of industrial sectors B, C and E (only branch 36) of NACE. The survey aims to meet demands for more comprehensive statistical information on the conditions of market economy and provides data on the economic activities of enterprises in the sector of industrial production.

1.2 Methodology and scope of the survey

This publication contains detailed data on industrial production at the country level. The notion or the term "industry" is defined by products (and services) of the sector B, C, D and E (only group 36) by NACE Rev. 2. (Regulation 02/2011). This definition on the industry is harmonized with the definition which is used in the EU PRODCOM statistics.

Sources and methods of data collection: The source of all data published in this publication are the result of statistical PRODCOM survey on industrial production in 2018. Is conducted by KAS under the Law on Official Statistics, the KAS Annual Plan on the implementation of statistical surveys in 2018.

The subject of the PRODCOM survey in 2018 is the possible and realized production of the industrial products, and the quantity and value of sold industrial production.

Does not include the product which is exploited or will be used for further processing in local units which belong to the same business (reporting unit). It Includes realized production for subsistence and production under contract with the customer. Production data are presented at the level of industrial production and product list, by percentage.

Data for processing are collected throughout the country. All PRODCOM data refer to one year period, starting from 1.01.2018 to 31.12.2018. Presented are only the data on production realized within the territory of the Republic

Does not include the product which is conducted outside the territory of the Republic of Kosovo on behalf of local entities or businesses.

Hereinafter are provided specific methodological explanations and are suggested to all users as an indispensable tool for the correct interpretation of the data and their use.

PRODCOM indicators on industrial production.

1.3 Sampling frame and selection

To create (determine) the sampling frame are used data from the statistical register of businesses. All enterprises that have stated one of the taxes during the reference years for previous years are considered active.

The selection of sample is done on the basis of criteria which included all enterprises that represent 80% of turnover for the relevant activity NACE Rev.2.

1.4 Procedures for data collection

In collecting the data we have applied methods that we considered more efficient for the conditions and circumstances in our country.

The survey of the businesses included in the sample was conducted through the direct business interviewing method through questionnaires.

In certain cases when the interview was impossible to be conducted directly, questionnaires are left to responsible persons in companies in order to complete them and after a few days, completed questionnaires were picked up by interviewers.

2 Definitions and key indicators

2.1 Definitions

PRODCOM is the label for production statistics on industrial production of the EU, defined by Regulation No.3924/91. Abbreviation is derived from the name in French "Production Communautaire" (Community Production).

The PRODCOM list – is a list of products, goods and services specified in the labels of the PRODCOM survey.

Product – production

The production is the result of an economic activity. It is used as a notion for products which have physical dimension to services. According to the concept of research, PRODCOM' is according to the list of EU products. In accordance with the concept of ready production - is considered any product which during the process of industrial production has reached a certain level of processing and is encoded with a particular code according to the list of products.

Concepts and definitions used in the PRODCOM survey of the Republic of Kosovo are aligned with the PRODCOM survey of the EU.

Enterprise is the smallest combination of legal entity with manufacturing unit of products or services which has independence in decision-making, especially for the use of its material and monetary resources. An enterprise may carry one or several economic activities.

Active enterprises - are considered only those enterprises that have declared one of the taxes or any employees for the reference year. Enterprise is the smallest combination of legal entity with manufacturing unit of products or services which has independence in decision-making, especially for the use of its material and monetary resources. An enterprise may carry one or several economic activities.

Active enterprises – are considered only those enterprises that have declared one of the taxes or any employees for the reference year.

Statistical units are industrial enterprises and local units of non-industrial enterprises that produce products defined by the PRODCOM list.

Particular criterion of involvement in PRODCOM research is that each class of industry (from 05.10 to 36.00) in NACE to enable sufficient inclusion of statistical units with the participation of at least 90% of gross value added of each class of industry. If that criterion is not met for any class of NACE, then the inclusion is expanded to include statistical units with less than 10 employees.

2.2 Key indicators

Table 1. Production and sales made under the PRODCOM List in 2018

Sector	Class	PRODCOM Code	Product description by PRODCOM	Unit of measure	Total value sold
B	729	07291300	Extraction of non-metallic minerals	tons	26937646
	811	08111150	Extraction of stone, sand and clay	tons	38229123
	1011	10113100	Processing and preserving of meat and meat products	tons	34194610
	1012	10121010	Processing of fresh and frozen meat	tons	300368
	1031	10311300	Processing and conservation of potatoes and its products	tons	8981145
	1032	10321100	Processing and production of juices from fruits and vegetables	tons	6350400
	1039	10391100	Other processing and preservation of fruits and vegetables	tons	23842580
	1041	10411100	Processing of vegetable and animal oils and fats	tons	293612
	1051	10515241	Production of dairy products	tons	42495426
	1052	10521000	Production of ice cream	tons	891035
	1061	10611100	Processing of cereal, starch and starch products	tons	36697543
	1071	10711100	Production of bread, confectionery, pasta products	tons	23437812
	1072	10721130	Production of long-lasting cakes and sweets	tons	4678406
	1073	10731130	Production of pasta and similar	tons	1857782
	1081	10811100	Production and processing of sugar products	tons	29281
	1082	10821100	Production of cocoa, chocolate and confectionery products	tons	6060431
	C	1083	10831130	Processing of tea and coffee	tons
1084		10841130	Production of other spices for food	tons	1279964
1085		10851100	Production of ready food	tons	182338
1089		10891100	Production of other food products	tons	7902621
1091		10911010	Processing of prepared animal feeds	tons	1729262
1101		11011020	Production of alcoholic beverages	tons	1202589
1102		11021130	Production of wine from grapes	tons	5451928
1104		11041010	Production of other fermented and non-fermented beverages	tons	2919865
1105		11051100	Production of beer	tons	33462125
1107		11071130	Production of refreshments, bottled mineral water	tons	61948960
1200		12001130	Manufacture of tobacco products	tons	449889
1310		13101010	Preparation and weaving of textile yarn	tons	2201133
1330		13301110	Final textile processing	tons	5215634
1392		13921130	Manufacture of finished textile products other than clothing	tons	2487443
1396		13961100	Manufacture of other textiles	tons	3710945
1412		14121120	Manufacture of clothing, work uniforms and other clothing other than fur clothing	palé	4852270
1419		14191100	Manufacture of other clothing and parts for clothing	palé	979816
1511		15111030	Tannin and leather trimmings, production of luggage, bags, horse cutlery and other cutlery, fur coat and dyeing	piece	637139
1520		15201100	Manufacture of footwear	palé	5958143
1610		16109100	Wood sawing and wood processing and storage	cubic meter	4510933
1623	16231900	Manufacture of wood products, carpentry and wood elements (windows, doors and more)	piece	12730616	
1629	16291200	Manufacture of other wood products, tables and kitchens	piece	3399136	
1712	17121100	Manufacture of paper dough, paper and cardboard	cubic meter	5640926	
1721	17211100	Manufacture of paper and cardboard articles	cubic meter	5164686	
1722	17221210	Manufacture of household paper and toilet paper products	cubic meter	6194155	
1723	17231100	Manufacture of office paper material	cubic meter	137500

Kosovo Agency of Statistics

short description

Kosovo Agency of Statistics is a professional institution which deals with collection, processing and publication of official statistical data. As such acts since 1948 and has passed through several historical stages, structured according to state regulation of those times.

On 2 August 1999, the Agency has resumed his professional work (after nine years of interruption of all statistical series detrimental to the interest of Kosovo), as an independent institution under the Ministry of Public Administration. Since 12.12.2011 the Agency operates in the frames of the Prime Minister's Office. Office is funded by the Kosovo Consolidated Budget, but also by donors for specific projects and for technical professional support.

Kosovo Agency of Statistics acts according to the Law No. 04/L-036 which entered into force on 12.12.2011. Programme of Official Statistics 2013/2017 is in implementation for the development of statistical system in correlation with the European Union statistics (EUROSTAT).

Kosovo Agency of Statistics has this organizational structure: production departments; Department of Economic statistics, Department of National Accounts, Department of Agriculture and Environment statistics and Department of Social statistics. **Support Departments**; Department of Methodology and Information Technology, Department of Policy Planning, Coordination and Communication, Department of Census and survey and Department of Administration. **Within the Agency are also established Regional Offices**; Gjakove, Gjilan, Mitrovica, Peja, Prizren, Pristina and Ferizaj

In KAS are employed in total 159 workers, of whom 100 (68,0 %) at the headquarters of the Agency, while in the Regional Offices, 47 (32,0%). Agency's educational qualifying structure is as follows: 75,5% with university education, 12,3% with with non-tertiary education, and 12.3% with secondary education.

We have professional and technical cooperation with all Ministries of the Government of Kosovo, especially with the Ministry of Economy and Finance, Central Bank of Kosovo, with international institutions, EUROSTAT, International Monetary Fund, World Bank, Sweden's SIDA, DFID, UNFPA, UNDP, UNVEF, and with the statistical institutions of the countries in the region.

Kosovo Agency of Statistics almost completely covers the territory of Kosovo, based on the statistical structure of the enumeration areas as the basic unit and sole in the country from which it gets first hand information. All surveys conducted in the field use the extension of the samples in these enumeration areas but also a statistical methodology according to international recommendations. During the collection of statistical data and reports from reporting entities are involved professionals, technicians, administrators, servants of the country offices, field enumerators from regional offices, etc.

In 2011, the project of Population Census , Households and Dwellings was successfully implemented, and in 2014 was successfully carried out the Agriculture Census. The result obtained from these censuses will have an important role in the development policies.

The mission of the Agency; to meet the needs of users with qualitative statistical data, objective, in time and space so that users have reliable base to conduct regular analysis in the interest of planning and project development at the municipal and country level. To support government institutions, scientific institutes, research academies, businesses in order to provide proper information for decision-makers and other users in Kosovo.
