Series 3: Economic Statistics

Kosovo International Trade Statistics June 2020

Foreword

The Kosovo Agency of Statistics (KAS) has started to publish data on the flow of import and export in Kosovo in 2001, but these data are considered reliable since 2005.

Publication of Kosovo International Trade Statistics is based on the data from the Kosovo Customs Service.

All monthly publications are preliminary data, which vary from yearly data (final data). This publication contains data on the flow of goods, statistical procedures, and sections of the Standard International Trade Classification (SITC), sections of the Harmonized System (HS) and by partner country. Methodology and methods have been adapted in order to integrate and compare external trade statistics of goods at international level.

Imports are presented by country of origin and Exports are classified by country of final destination.

Comments, remarks, suggestions and proposals regarding this publication are welcome and they can be sent to the e-mail: ekonomik@rks-gov.net

Publication was prepared by:

Ilir T. Berisha - Director of Department
Ismajl Sahiti - Head of Division
Mensure Çerkezi - Head of Sector

July, 2020

Chief Executive Officer, KAS
Isa Krasniqi

Kosovo International Trade Statistics – Methodological notes

Data sources

The statistics of trade are compiled mainly from the documents supplied by importers and exporters (or their agents) to the Customs authority. The document is the Single Administrative Document (SAD) used for Customs clearance purposes. The information on the document is captured by the Customs Information System.

Responsibility for data collection, compilation and publication

The Customs administration is responsible for the collection, data entry and processing of the data from customs statements. Data regarding the field of statistics are registered within this documents (SAD), and they are reported to the Kosovo Agency of Statistics in monthly bases by the Customs Administration via electronically.

KAS is responsible for external trade data processing, compilation and publication. These statistics include data by the type of customs procedures. Additional work involves editing and validation (or approval) of customs data.

Coverage

Kosovo International Trade Statistics (or external trade) does not cover temporary imports and exports of goods which will be returned in an unchanged condition after a certain period of time, as are: services, repairs, money as means of payment, money in gold, fuel supply of Kosovo's vehicles abroad, imports of goods for foreign liaisons offices and other diplomatic missions in Kosovo, travelers personal baggage, commercial samples and postal packages of minor value.

Recording system

Kosovo International Trade Statistics are compiled in accordance with the 'special' system (facilitating definition) of international trade recording or registration. By this system, imports and exports are recorded at the time when goods move across the territory (or area) under the free flow which is the part when goods may be sold without any customs restriction. The facilitating definition means that beside regular export and import transactions, both external and internal processing is included.

Special exports include exports of goods: exports after inward processing, exports for outward processing and exports that are not registered in customs.

Special imports consist of imports of goods from: inward processing imports (S.S), imports after outward processing and imports that are not registered at customs.

Excluded are goods that are in transit.

Valuation

For imports, the “cif” value is used (including the cost, insurance and transport of goods at the entry point in Kosovo). The export value is “fob” (free on board). This is the cost of goods purchased abroad, including packaging, transport within the country, the charge cost, insurance, and other costs incurred when the goods are placed on the vessel for export, on airplanes or transported to remote areas. The value of the invoice is recalculated to the value of the Kosovo border by adding or subtracting, in whole or in part, the costs of transport, loading, unloading, which depend on the terms of supply specified in the contract.

The value excludes:

- any sum or amount received by the exporter on the way of refund, reimbursement of customs duty, subversion or any other aid.

- any foreign customs duty or change of cargo of goods other than at the customs point or at the point of exportation.

The value is in euros. For transactions where the value is denominated in another currency, the euro exchange rate is made by using the weekly exchange rate.

Reference period

The calendar month is a basic period to collect the data. Based on customs data, the date of delivery of the customs statement or other valid dates for the implementation of the customs rules, it is time to register the import / export transactions.

Units of quantity

The quantity of imported and exported goods is shown in net weight, if it can be determined, taking into account the nature of the product as well as the additional unit when described by the nomenclature of the customs tariff.

Net weight is the usual unit of the given quantity. The weight of containers, luggage, jars and packaging materials are excluded.

Other units of quantity used for some of the most important goods such as: live animals, motor vehicles, local equipment, watches, clothes (where the numbering unit is used), shoes (where number of pairs is used), floor coverings (where square meters are used) and beverages (where volume is used).

Partner country

In this publication, imports are recorded by country of origin (as opposed to the country of destination). Goods obtained or produced in a country of origin but from the same country. A product, in the manufacture of which two or more countries are involved, such as the country of origin, is considered the place where the last major processing occurred. Packaging, repackaging, classification are not considered as manufacturing processes.

Exports are classified by country of final destination. The last destination of goods is considered the last state for which the goods are intended. This does not mean that it is the country where the goods will be unloaded or where the final consumption will be made.

Country classification

The country nomenclature is the classification of countries (Geo-nomenclature) according to the Official Gazette of the European Commission published in annual basis. Since January 1999, this follows the United Nations' ISO alpha-2 coding system in which each country is identified by a two-letter code.

Classification of goods

Statistics are collected by using the 8-digit Combined Nomenclature (CN) – the EU tariffs and statistical nomenclature. This nomenclature is managed and upgraded annually by the Commission in cooperation with the Member States. CN is consistent with the 6-digit Harmonized Commodity Description and Coding System (HS) - Nomenclature of the Customs Cooperation Council which is used around the world for the application of customs tariffs and the compilation of external trade statistics. The CN contains about 10,400 8-digit sub-headings, the first six digits of which are the same as those of the Harmonized System (SH).

The Standard Trade Classification (STC), revised version no. 3 (SITC Rev 3), was developed by the United Nations for the advancement of the international comparability of statistics on external trade.

Standard External Trade Classification (SETC), revised version no. 3, contains about 3,100 basic headings (5-digit). These are combined in 261 groups (3-digits), 98 divisions (2-digits) and 10 sections (1-digit). For example, Section 6 (Manufactured goods classified mainly by material) consists of 9 divisions, 61 to 69. Division 64 (paper, paperboard and articles thereof) consists of two groups, 641 and 642, which together consist of 72 basic headings, such as 642.94 (paper handkerchiefs, towels, tablecloths, garments etc.).

SETC revised version no. 3 is identical with the structure of the Harmonized System. Each category of SETC (including all the basic headings) is equivalent to the combination of HS headings (and therefore the combination of CN headings).

Data publication

Monthly data are provisional and published 24 days after the reference month.
Annual data are published in June.

Publication

Released data for external trade statistics are:
Aggregated data are published on the KAS web page 24 days after the reference period.

Final data
Kosovo International Trade Statistics

Flow of Export and Import in June 2020

Data from Kosovo International Trade show a high trade deficit by (1.3%) in June 2020 compared with the same period of 2019, i.e. in the amount of 246,1 million euros compared to the deficit of 243,0 million euros in 2019. Export covers import (15.3%).

The export of goods in June 2020 was worth 44,6 million euros, while the import was 290,8 million euros, i.e. with an increase by (39.0%) for exports and a (5.7%) for imports compared to the same period of the year 2019.

According to the data of the main group for export: (40.9%) of exports consists of base metals and articles thereof, (11.4%) consists of plastics, rubber and articles thereof, (10.2%) consists of prepared foodstuffs, beverages and tobacco, (8.9%) consists of various manufactured articles, (5.6%) consists of chemical industry products, (4.6%) consists of vegetable products, (4.3%) consists of machinery, mechanical and electrical equipment, (3.6%) consists of mineral products, etc.

According to the data of the main groups for imports: (13.4%) consists of machinery, mechanical and electrical equipment, (12.9%) consists of prepared foodstuffs, beverages and tobacco, (11.8%) consists of base metals and articles thereof, (9.4%) consists of transport means, (9.0%) consists of mineral products, (9.0%) consists of chemical industry products, (7.0%) consists of plastics, rubber and articles thereof, (4.7%) consists of vegetable products, (4.7%) textiles and textile articles, etc.

Foreign trade of goods with EU-28

Kosovo's exports to EU-28 countries reached 18,1 million euros, or about (40.7%) of total exports, with an increase by (89.0%). The main partners for export of goods in EU are: Germany (9.4%), Italy (6.7%), Great Britain (3.9%), Sweden (2.7%), Netherlands (2.6%), etc.

Kosovo's imports from EU-28 countries reached about 133,3 million euros, or (45.8%) of total imports, with an decrease by (2.6%). The highest shares of imports were from: Germany (13.8%), Italy (5.7%), Greece (5.0%), Bulgari (2.8%), etc.

Trade with CEFTA countries

In June 2020, Kosovo's exports to CEFTA countries reached 20,5 million euros, or (46.1%) of total exports, with an increase by (52.0%). The main partners for export from CEFTA countries are: Albania (25.4%), Macedonia (8.1%), Serbia (7.3%) and Montenegro (3.8%).

While imports from CEFTA countries in June 2020 reached 60,2 million euros, or (20.7%) of total imports, with an increase by (46.2%). The countries with the highest share of imports were: Macedonia (6.3%), Serbia (6.2%), Albania (6.1%).

Trade with other countries of the world

Kosovo's exports to other countries reached 5,8 million euros, or (13.2%). The most important partners for export are: Switzerland (7.1%).

While Kosovo's imports to other countries reached 97,2 million euros, or (33.5%). The countries with the highest share of imports in this group were: Turkey (14.5%), and China (8.5%).

Kosovo Agency of Statistics

short description

Kosovo Agency of Statistics is a professional institution which deals with collection, processing and publication of official statistical data. As such acts since 1948 and has passed through several historical stages, structured according to state regulation of those times.

On 2 August 1999, the Agency has resumed his professional work (after nine years of interruption of all statistical series detrimental to the interest of Kosovo), as an independent institution under the Ministry of Public Administration. Since 12.12.2011 the Agency operates in the frames of the Prime Minister's Office. Office is funded by the Kosovo Consolidated Budget, but also by donors for specific projects and for technical professional support.

Kosovo Agency of Statistics acts according to the Law No. 04/L-036 which entered into force on 12.12.2011 and Amendment of Law No. 06/L-058 which entered into force on 17.01.2019 . Programme of Official Statistics 2018/2022 is in implementation for the development of statistical system in correlation with the European Union statistics (EUROSTAT).

Kosovo Agency of Statistics has this organizational structure: production departments; Department of Economic statistics, Department of National Accounts, Department of Agriculture and Environment statistics and Department of Social statistics. **Support Departments**; Department of Methodology and Information Technology, Department of Policy Planning, Coordination and Communication, Department of Census and survey and Department of Administration. **Within the Agency are also established Regional Offices**; Gjakove, Gjilan, Mitrovica, Peja, Prizren, Pristina and Ferizaj

In KAS are employed in total 156 workers, of whom 115 at the headquarters of the Agency, while in the Regional Offices, 41. Agency's educational qualifying structure is as follows: 123 with university education, 15 with with non-tertiary education, and 18 with secondary education.

We have professional and technical cooperation with all Ministries of the Government of Kosovo, especially with the Ministry of Economy and Finance, Central Bank of Kosovo, with international institutions, EUROSTAT, International Monetary Fund, World Bank, Sweden's SIDA, DFID, UNFPA, UNDP, UNICEF, and with the statistical institutions of the countries in the region.

Kosovo Agency of Statistics almost completely covers the territory of Kosovo, based on the statistical structure of the enumeration areas as the basic unit and sole in the country from which it gets first hand information. All surveys conducted in the field use the extension of the samples in these enumeration areas but also a statistical methodology according to international recommendations. During the collection of statistical data and reports from reporting entities are involved professionals, technicians, administrators, servants of the country offices, field enumerators from regional offices, etc.

In 2011, the project of Population Census , Households and Dwellings was successfully implemented, and in 2014 was successfully carried out the Agriculture Census. The result obtained from these censuses will have an important role in the development policies.

The mission of the Agency; to meet the needs of users with qualitative statistical data, objective, in time and space so that users have reliable base to conduct regular analysis in the interest of planning and project development at the municipal and country level. To support government institutions, scientific institutes, research academies, businesses in order to provide proper information for decision-makers and other users in Kosovo.
