## Foreword

Kosovo Agency of Statistics, respectively the Department of Agriculture and Environment Statistics, has started to collect data on agriculture output prices since November 2003. At the beginning, the number of items was limited. With the change of the base year from 2003 to the base year of 2005, prices have been collected for 64 different agricultural outputs. Whereas, with the change of the base year 2005 to 2010, prices for 67 agricultural outputs were collected. Currently, with the change of the base year from 2010 to the base year 2015, prices are collected for 71 different agricultural outputs. The purpose of the agricultural output index is to measure the price movements for the products sold by the farmer. The plan for the future is to increase the number of outputs. In addition to the output price index is also the input price index.

This is the sixty-three (63) on the agriculture output price index and the average absolute prices of agriculture outputs, prepared by the Kosovo Agency of Statistics. In this publication, the agriculture output price index has been presented for some major agricultural products.

KAS thanks the Swedish International Development Cooperation Agency (SIDA) for their support for building the agro-monetary statistical system. KAS also thanks all collaborators of its regional offices, other co-operators (respondents) of point-of-sale places such as: agricultural farms, industrial enterprises, trade, etc.

In particular, KAS thanks Swedish price statistics expert, Mr. Anders Grönvall and others who directly or indirectly assisted in finalizing this publication.

Suggestions and remarks regarding this publication can be sent to the department's email address: [agriculture@ks-gov.net](mailto:agriculture@ks-gov.net)

Publication was prepared by:

Bajrush Qevani – Director of Department,

Violeta Arifi – Gashi – Head of Division,

Kademsha Bajramaga – Officer.

## Agriculture Output Price Index

The data presented in this publication include data on the monthly, quarterly and annual index covering the period 2015-2020. To make the comparisons and to observe the changes, data for 2015-2020 are presented in the base year of 2015 (2015 = 100)

KAS has changed the base year from 2010 = 100 in 2015 = 100 according to Eurostat methodology. In this publication are collected the prices of local agriculture outputs in Kosovo. Price collection is done in markets, farms and other places.

The products that make up the base for the agriculture output price index are divided into two main groups: Crop and Animal Output (plant and livestock products). Within crop output, prices are collected for these groups: cereals, forage plants, vegetables, potatoes and fruits.

In animal output, prices have been collected for livestock and livestock products. Within livestock, prices are collected for four categories of animals: cattle, sheep, pigs and poultry. These prices are based on live weight of animals. Within livestock the output prices are collected for: milk, eggs and honey. All prices are calculated in Euro and the units are in kg, liter and pieces.

### Annual change of index 2020 compared with 2019 (change in %)

In 2020, the annual price index of crop output increased by (4.4%) compared to 2019. Meanwhile, the animal output price index increased by (2.3%) in 2020, compared to 2019. While, the general price index of agricultural outputs for this period increased by (3.2%).

### Annual change of index 2020 compared to 2015 (change in %)

In 2020, the annual price index of crop output increased by (12.5%) compared to 2015. Meanwhile, animal output price index increased by (8.2%) in 2020 compared with 2015. While, the annual general index of agricultural outputs increased by (10.0%) in 2020, compared with 2015.

Graph 1 presents the annual price index for crop and animal output for the period 2015-2020, as well as the general index of agricultural outputs with the base year (2015 = 100).

## Methodology

Prices and Price indices in this publication have been calculated according standards for price statistics in European Union. The project for calculating these Prices and Price Indices was conducted in the frame of the project of “Improving agro monetary statistics” in cooperation with Statistic Sweden and with financial support by Sida (Swedish International Development Cooperation Agency).

Prices have been collected since November 2003 and are collected in seven regions: Pristina, Mitrovica , Peja, Gjakova ,Prizren, Ferizaj and Gjilan,. Prices are collected around the 15<sup>th</sup> in every month. Since the start the number of different prices that are collected have increased step by step. Therefore some prices are not available for the whole period. Prices are now collected for 71 products and measures prices that farmers receive for the part of their production that are sold. Weights to calculate aggregated indices are mainly based on Economic Accounts of Agriculture (EAA) from 2015, which is the base year in the indices (2015=100). It should be pointed out that the weights, in value or promille, only reflect the part of the agricultural production in Kosovo that are sold outside the agricultural household. For some products the value of the total production can be considerably higher than what is reflected in the weights.

According to EU standards, quarterly and annual indices are supposed to be calculated by each member state. The EU indices in this publication follow the methodology developed in EU. For national needs, also a monthly index is calculated. This index is calculated slightly different from the quarterly index. In short, the monthly index does not use monthly weights on aggregated level (when calculating code 10, 13 and 14). However, for most crop groups (code 01, 03, 04 and 06) monthly weights are used within the group to calculate the group aggregates. On the other hand, the quarterly index has variable quarterly weights everywhere. For this reason, the monthly and the quarterly indices might have slightly different developments if they are compared. However, the EU annual index and the Kosovo annual index are exactly the same. In both cases, the index is calculated as weighted annual index with monthly respectively quarterly weights.

The total weights, quarterly weights and monthly weights are fix during the base period. They all reflect the situation that was present in 2015. By having fix weights, the index is guaranteed only to measure price movements, which is the purpose of the index.

To compare the EU index presented in this publication with other countries, the Eurostat website is recommended (<http://epp.eurostat.ec.europa.eu/portal/page/portal/eurostat/home>).

### Calculation of elementary Price Index

Calculations of elementary indices are in general done by using following formula, with un-weighted arithmetic mean price.

$$R_i^t = \frac{\frac{1}{n} \sum P_{ij}^t}{\frac{1}{n} \sum P_{ij}^o} \cdot 100$$

$R_i^t$  – Elementary index for month t and product i

P – Collected price

i – Product i

j – Price j recorded for product (in general price for region 1,2,...,n)

t – Observed month

0 – Base month

### Calculation of aggregated Price Index

Calculating aggregated index for total Output or subgroups of Output Index is done using following formula.

$$I^t = \sum \left( R_i^t \cdot \frac{w_i^0}{\sum w_i^0} \right)$$

$I^t$  – Aggregated index for period t

$w_i^0$  – Weighting factor in base period for product i

i – Product i

t – Observed month

0 – Base month

# Kosovo Agency of Statistics

## *short description*

**Kosovo Agency of Statistics** is a professional institution which deals with collection, processing and publication of official statistical data. As such acts since 1948 and has passed through several historical stages, structured according to state regulation of those times.

On 2 August 1999, the Agency has resumed his professional work (after nine years of interruption of all statistical series detrimental to the interest of Kosovo), as an independent institution under the Ministry of Public Administration. Since 12.12.2011 the Agency operates in the frames of the Prime Minister's Office. Office is funded by the Kosovo Consolidated Budget, but also by donors for specific projects and for technical professional support.

**Kosovo Agency of Statistics** acts according to the Law No. 04/L-036 which entered into force on 12.12.2011 and Amendment of Law No. 06/L-058 which entered into force on 17.01.2019. Programme of Official Statistics 2018/2022 is in implementation for the development of statistical system in correlation with the European Union statistics (EUROSTAT).

**Kosovo Agency of Statistics** has this organizational structure: production departments; Department of Economic statistics, Department of National Accounts, Department of Agriculture and Environment statistics and Department of Social statistics. **Support Departments**; Department of Methodology and Information Technology, Department of Policy Planning, Coordination and Communication, Department of Census and survey and Department of Administration. **Within the Agency are also established Regional Offices**; Gjakove, Gjilan, Mitrovica, Peja, Prizren, Pristina and Ferizaj

In KAS are employed in total 156 workers, of whom 115 at the headquarters of the Agency, while in the Regional Offices, 41. Agency's educational qualifying structure is as follows: 123 with university education, 15 with non-tertiary education, and 18 with secondary education.

We have professional and technical cooperation with all Ministries of the Government of Kosovo, especially with the Ministry of Economy and Finance, Central Bank of Kosovo, with international institutions, EUROSTAT, International Monetary Fund, World Bank, Sweden's SIDA, DFID, UNFPA, UNDP, UNVEF, and with the statistical institutions of the countries in the region.

**Kosovo Agency of Statistics** almost completely covers the territory of Kosovo, based on the statistical structure of the enumeration areas as the basic unit and sole in the country from which it gets first hand information. All surveys conducted in the field use the extension of the samples in these enumeration areas but also a statistical methodology according to international recommendations. During the collection of statistical data and reports from reporting entities are involved professionals, technicians, administrators, servants of the country offices, field enumerators from regional offices, etc.

In 2011, the project of Population Census, Households and Dwellings was successfully implemented, and in 2014 was successfully carried out the Agriculture Census. The result obtained from these censuses will have an important role in the development policies.

**The mission of the Agency**; to meet the needs of users with qualitative statistical data, objective, in time and space so that users have reliable base to conduct regular analysis in the interest of planning and project development at the municipal and country level. To support government institutions, scientific institutes, research academies, businesses in order to provide proper information for decision-makers and other users in Kosovo.
