# Energy Balance Q4 2021

**Prishtina, 14.02.2022** The Kosovo Agency of Statistics (KAS) has released the publication of the results of Energy Balance in Q4 2021.

Kosovo Agency of Statistics (KAS) has compiled data on production and consumption of coal, production and consumption of energy, import and export of energy and import and export of other energy fuels. This statistical publication presents statistical data for the fourth quarter of 2021.

The source of data is the Kosovo Energy Corporation (KEK), Kosovo Company for Distribution and Supply of Electricity (KEDS), and Kosovo International Trade Statistics.

Based on continued demand from various internal and external users and based on indicators of Eurostat which publishes the statistics of energy, here are presented data of interest.

The purpose of the publication is to be mindful on the tendency of development of this sector.

This publication will serve as a useful reference base for all users of KAS statistical data and will serve as useful and relevant economic information for Kosovo.

In particular, we thank the Kosovo Energy Corporation and the Kosovo Company for the Distribution and Supply of Electricity without whose cooperation this publication would not be possible.

Proposals, suggestions and feedback can be sent to: [infoask@rks-gov.net](mailto:infoask@rks-gov.net)

**Publication was prepared by:**

Ismajl Sahiti – Acting Director of Department  
Hysni Elshani – Acting Head of the Division of Economic Statistics  
Bekim Bojku – Officer for Economic Statistics  
Dafina Kumnova – Officer for Economic Statistics  
Guxim Neziri – IT Officer for Economic Statistics  
Vivianit Fejza – Officer for Services Statistics  
Ahmet Cakolli – Design Officer.

February, 2022

Acting Chief Executive Officer, KAS  
Mr. Ilir T.Berisha

## List of Contents

	Page
Production of coal in the fourth quarter of 2021 .....	5
Gross electricity generation at PPs & HPPs in the fourth quarter of 2021 .....	5
Import and export of electricity in the fourth quarter of 2021 .....	5
Import and export of fuels in the fourth quarter of 2021 .....	5
Methodological explanations and definitions.....	6
Production and consumption of coal, electricity production in power plants and hydropower plants, import and export of electricity .....	8
Import and export of oil derivatives and coal.....	10
Final consumers (end consumers).....	13

## **Production of coal in the fourth quarter of 2021**

In the fourth quarter of 2021, 2 352.8 thousand tons of coal were produced (extracted) in Kosovo.

## **Gross electricity generation at PPs & HPPs in the fourth quarter of 2021**

In the fourth quarter of 2021 the gross amount of electricity produced in the Power Plants is 1 833.05 GWh, while alternative energy is about 70.5 GWh.

## **Import and export of electricity in the fourth quarter of 2021**

In the fourth quarter of 2021, Kosovo imported 900.7 GWh of electricity.

In this quarter (Q4 2021), Kosovo exported 548.2 GWh of electricity.

## **Final customers in the fourth quarter of 2021**

In the fourth quarter of 2021, the amount of electricity for consumption was 1,421.7 GWh of electricity. Compared to the same quarter of last year (Q4 2020), the amount of electricity consumed has increased by 4.51%.

(To see the distribution of electricity by final consumers in percentage see Graph.1).

## **Import and export of fuels in the fourth quarter of 2021**

To see the performance of imports and exports of fuels in the fourth period of 2021, see tables 2a and 2b.

## Methodological explanations and definitions

**<sup>1</sup>Electricity** - means the form of energy which is transported through metal conductors.

**Energy** – means any form of manufactured or obtained energy (electricity, heating or natural gas) for supply or sale purpose.

**Energy fuel** - fuels which release the energy during combustion are called energy fuels.

**Energy enterprise** - means electricity company which carries one or more of the following energy activities: production, transformation, transmission, distribution, supply, trading or disposal of electricity, heat or natural gas under a license issued by the Law on Energy Regulator or without a license if such license is not required.

**Production of coal** - represents the amount of coal that is extracted from the mines.

**Production of electricity** - represents the amount of electricity produced in power plants and hydropower plants.

**Power generation** - implies the generation of electricity, heat or any other form of energy.

**Gross energy production** - represents all the amount of electricity production in power plants or hydropower plants.

**Net energy production** - represents the amount of electricity to the brink.

**Imports of electricity** - represents the amount of electricity purchased outside the state.

**Exports of electricity** - represents the amount of energy sold outside the state.

**Exchanges of electricity** - represent the amount of electricity exchanged or produced in the country and abroad.

**Losses of electricity** - represent the amount of electricity that is lost in transmission and distribution.

**Consumer** - means the consumer to purchase wholesale or the end (final) consumer of energy.

**Privileged consumers (220-110kV)** - means any natural or legal person who is free to buy electricity from the supplier to the choice of his/her.

**Distribution** - means that transport of electricity, heat or natural gas through high voltage lines, medium, or medium-pressure pipelines or low, in order of a delivery to customers, but not including supplies.

**Coal** – briquette, egg-shaped and similar fuels produced from solid coal.

**Lignite**- whether or not agglomerated, excluding jet.

**Peat**- (including its waste or litter), whether or not agglomerated.

**Coke** and semi coke of coal, Lignite or of peat. Whether or not agglomerated; retort carbon:

---

<sup>1</sup> Methodological explanations are taken from Energy Law No. 2004/8.

**Coal gas**, water gas, producer gas, weak gas and similar gases (EXTL. petroleum gases and other gaseous hydrocarbons)

**Tar distilled from coal**, from lignite or from peat, and other mineral pitch, whether or not dehydrated or partially distilled including tar rebuilt.

**Oils and other products** of the distillation of high temperature coal tar, similar products in which the weight of the aromatic constituents exceeds those of non aromatic.

**Turpentine and turpentine coke**, obtained from coal tar or from other mineral tars.

**Petroleum oils** and oils obtained from bituminous minerals, crude.

**Petroleum oils** and oils obtained from bituminous minerals, other than crude; preparations unspecified and not elsewhere, containing by weight 70% or more of petroleum oils or oils obtained from bituminous minerals. These oils being the basic constituents of the preparations.

**Petroleum gases** and other hydrocarbon diesel.

**Gelatin oil**, paraffin wax, microcrystalline petroleum wax, liquid wax, ozokerite, lignite wax, peat wax, other mineral waxes, and similar products obtained by synthesis or by other processes, whether or not colored.

**Coconut oil**, bitumen and other residues of oils obtained from bituminous minerals.

**Natural bitumen and asphalt**, bituminous or oil-shale and tar sand, asphalt and asphaltic rocks

**Bituminous mastic** backed and other bituminous mixtures based on natural asphalt, bitumen supernatural, oil bitumen or mineral tar.

## Production and consumption of coal, electricity production in power plants and hydropower plants, import and export of electricity

**Tab. 1: Production and consumption of coal, electricity production in power plants and hydropower plants, import and export of electricity from the year 2002 - 2021**

Period	Coal production in thousand tons	Gross electricity production in TC in GWh	Electricity generation in hydropower plants GWh	Consumption GWh (including consumers 220 - 110kV)	Import of energy GWh	Export of energy GWh
2002	5.527,9	3.151,7	:	1.950,4	816,1	648,2
2003	6.465,9	3.221,1	:	2.041,1	637,3	277,6
